

AGRICULTURAL.

Agriculture Among the Romans.

The Roman farmers, like ourselves, were fond of putting on record any extraordinary crop. Pliny says that there were sent from Byzantium in Africa, to Augustus, nearly 400 stalks, all from one grain; and to Nero, 310 stalks. The soil from which this immense yield was obtained would seem to have possessed a remarkable quality, for Pliny says that "when dry, the stoutest oxen cannot plow it, but after rain it has been seen it opened by a share, drawn by a wretched ass on the one side and an old woman on the other."

When Rome was at her greatest height, in the time of the Caesars, the farmers obtained almost fabulous prices for some of their productions. Varro informs us that "fat birds," thrushes, black birds, &c., were sold at fifty cents each, and sometimes 5000 of them were sold in a year from one farm. [Farms were generally small.] Pea fowls were sold at \$7; an egg at 80 cents. A farm sometimes produced as many of these fowls as to sell for \$25,000. A pair of fine doves were commonly of the same price as a peacock, \$7. If very pretty, they were much higher, no less than \$50. L. Anius, a Roman knight, refused to sell a pair under \$64. The "chicken fever" it seems did not originate in this age and country. Whether the Romans had any Shanghais in those days that could "eat corn off the top of a flour barrel, and stride over a sixteen inch plank without any exertion," we are not informed.

Woodward, in his "Essay towards a Natural History of the Earth," published in 1695, says, those who have written *de arte combinatorie*, reckon up no fewer than one hundred and seventy-nine millions, one thousand and sixty different sorts of earth. Modern science informs us, indeed that all agricultural soils are composed of some fourteen elements, but these are so combined as to form an almost infinite variety of soils, of whose characteristics at the present day, we can hardly claim to know anything. The Romans were equally ignorant. They characterized soil as rich, or poor, free or stiff wet or dry. The best soil they thought had a blackish color, was glutinous when wet, and friable when dry; exhaled an agreeable smell when plowed, imbibed water readily, retaining a sufficiency and discharging what was superfluous; not injurious to the plow iron by causing a salt rust; frequented by crows and other birds at the time of plowing; and when at rest speedily covered with a rich turf. A free soil was always preferred.

The best situation for lands, according to Columella and Palladius, is "not so much on a level as to make the water stagnate nor so low as to be buried in the bottom of a valley nor so exposed as to feel the violence of storms and heats, for in these a mediocrity is always best; but champion land exposed and whose declivity affords the rains a free passage, or a hill whose sides gently decline; or a valley not too much confined and into which the air has easy access; or a mountain defended by a higher top, and thereby secured from the winds that are most pernicious, or if high and rugged, at the same time covered with trees and grass. The situation of lands which Cato reckons the best, are at the foot of a mountain with a southern exposure. Pliny says that the best lands in Italy are so situated.

Planting trees to screen the land from the high winds which frequently prevailed, and for fruit, was recommended by nearly all the Roman writers. Cato says: "A land owner should apply himself to the planting of his fields early in his youth; but he ought to think long before he builds. He ought not to think about planting; but he ought to do it. When he is about thirty-six years of age, he may build, provided his fields are planted." Pliny gives the same advice. "Men," he says, "should plant in their youth, and not build till their fields are planted; and even then ought not to be in a hurry, but take time to consider. It is best, according to the proverb, to profit by the folly of others." Many young American farmers might follow this advice of the old Roman with advantage. Better plant a good orchard, than build a fine house.

The Romans paid much attention to the breeding, breaking, feeding and working of their cattle. "Bulls," says Palladius, "should be tall, with huge members, or a middle age, rather young than old, and of a stern countenance small horns, a brawny and vast neck, and a connived belly." The cows Columella most approved of are "tall make, long, with very large belly, very broad head, eyes black and open; horns graceful, smooth, and black, lairy ears, straight jaws, very large dewlap and tail and moderate hoofs and legs."

Breeders of horses and cows, Virgil observes, should attend principally to the make of the female, who ought to be large in all her parts.

There is a printing office in Paris capable of printing the Lord's prayer in three hundred different languages.

TERMS.

THE BEDFORD INQUIRER AND CHRONICLE will be published every Thursday Morning at two dollars per annum, in advance, two dollars and fifty cents after the year expires.

Non-subscribers will be taken for a shorter period than six months, and no subscriber will be at liberty to discontinue his subscription until all arrears are paid.

Rates of Advertising:

Table with 3 columns: Rate, 1 insertion, 2 do., 3 do. Rows include 1 square (12 lines), 2 squares, 3 squares, 1 square (2 lines), 2 squares, 3 squares, Half Column, and Whole Column.

All advertisements not marked with the number of insertions desired will be inserted until, for and charged accordingly.

Farmers Look to your Interest!

Windmills! Windmills!

The subscriber wishes to call the attention of farmers to his new and latest Improved Patent Mill, which he continues to manufacture at his shop, a few doors east of Brice's Hotel, of the best material and warranted. He has also procured the right of J. Bamboor's celebrated Patent Box Screen, which he uses in all of his mills, which renders for sale the best now in use, in the removal of chaff, cockle and snail.

THE NEW YORK TRIBUNE, 1855-6.

The Tribune is now in the middle of its fifteenth year; Vol. XV. of its weekly issue commenced on the 1st of September last. The American public need no be made acquainted with its character or its merits. It is considered with but subordinate regard for prudence, policy or popularity, it has aimed to stand for Righteousness, for Truth, for Humanity, against fortified Iniquity, for Freedom of Opinion. There is no slaveholder on this Continent, though he may never read anything but his bills of sale and notes-payable, who does not know and hate THE TRIBUNE; there is not an extensive fabricator of drugged and poisoned goods who does not understand the danger and danger of its publication in a commercial, cotton-buying City like New-York. The Newark Mercury once forebore to remark that it had never known a man griping, screwing, varnishing, or who did not understand the danger of its publication in a commercial, cotton-buying City like New-York.
