SHOT HIS BROTHER AND FATHER

Result of a Ditpute Regarding This Summer's Harvest of Pickles.

Hot Words Lead to Threats and Then to Blows-Unable to Cope with Two Adversaries, Re Becomes at Once Parricide and Fratricide-Neighbors Shocked at the Crime.

POUDIKERISIE, N. Y., Sep. 3.-News has been received here from Cold Spring, the pretty little Putnam County village among the Highlands, in Phillipstown township, on the east bank of the Hudson, about a mile above West Point, of a shocking double tragedy, in which father and son were killed by another son as the result of a trivial quarrel. Frank Scofield is the name of the man

who consigns his name to double obloguy by being at once parrietde and fratricide. Frank engaged in a dispute with his

father and brother concerning their sea-son's harvest of pickies. Hot words lod to threats and then to blows. Finding himself unable to cope with two adversaries, Frank shot and killed both

his father and brother.

Only these meagre details of the tragedy have yet been received from the horror stricken village. The Schofield home-stead is about seven miles distant from Cold Scates Cold Spring.

COMPLETING THE CENSUS. A Portion of it Soon to Be Put in the

Printers' Hands.

WASHINGTON, D. C., Sep. .3-Superin-tendent Porter, of the Census Bureau, who is now giving his entire attention to revising final census reports, says that he expects to have the first 500 pages of the compendium of the eleventh census ready for the public printer on September 15. He has received the last card punched containing population statistics, the number of which is 62,622,206.

number of which is 62,022,006. For the past six months a large num-ber of clerks working night and day have been sugaged upon punching machines, which, corresponding with the enumera-tors sheets, give all the information re-quired by law. Each card will average seventeen holes, being the number of questions answered by each person. The number of holes punched far exceeds 1,239,000,000. 1.259,000,000.

Porter says that since February Sth. 1591, the clerks have punched seven hundred cards per day which is two hun-dred more than the estimates furnished by him when this method of tabulation was adopted. Both men and women were engaged upon the machines, but the latter, he says, showed greater adapta-bility to the work. The backbone of the census work is broken and the few hundred clerks now employed, will be sufficient to complete the work. He evenests to have account

the work. He expects to have several completed volumes ready for Congress in December.

The despatch from Minister Egan, dated three days ago as it was, throws light upon his silence during the trouble in Chili. The tolegraph line between Santiago and Valparaiso is known to have been down, and this cut off Minister Egan from communication with the United States by the Paelife road. This is winter in Chili, and the Andes are deep with snow and ice, and the tele-graph, it is thought at the State Depart-ment, must be broken down.
