HENS AS A STUDY.

A Protest Against Making Them Lay More Eggs Than They Want To.

(Copyrighted by Leo & Shepard, Boston, and published by special arrangement with them.)

In our last issue we republished from an agricultural journal an article on feed for hens. We would like to say here that it is the duty of journals to publish all such information, however pertinent it may or may not be. That's the reason we printed the piece in question. We don't know whether the writer knew what he was about when he brought forth the article, and we don't care. There was no choice with us. We submitted; appropriated it just as we do all those matters which pertain to the home and farm department. But what we started out to do was to protest against recipes for making hens lay more eggs than nature designed they should.

Not a day passes but somebody comes forward with a system of diet which he has tested to his entire satisfaction, and which is adapted to every breed and temper of hen in existence. One man gives his fowls oats alone, and finds that they lay a fourth more eggs than they did when he fed them exclusively on corn. This statement fires up somebody to explain that he didn't know what a laying hen really was until he got to feeding his flock on corn alone. Heretofore he had dished them with oats. Here's a decided fix apparently, but the next week the owner of a couple of hens in Kalamazoo modestly states in a card that years of careful experimenting have demonstrated beyond all cavil that oats and corn equally mixed will fire up the ambition of any hen on the face of the earth. So they go on in the matter of food. Then there is the man who advocates lime and oyster shells to prevent the hens from laying soft shelled eggs. As a hen lays about two such eggs in the course of a year a couple of dollars' worth of lime judiciously fed to her will prevent the loss and be money well expended. Then there is the man who advocates better ventilation. Hens are mighty sore on the subject of ventilation, as you may have noticed.

Another recommends an airtight roosting place, and still another advises shutting up the fowls all the time, and is immediately confronted by a poultryer, who says that if they are not allowed to run loose you can't get eggs out of them any way. These things are what give agricultural journals their wonderful variety. But we protest against them. If any one understands a hen's business better than the hen itself we are prepared to listen to him, but until such a phenomenon appears we unqualifiedly refuse to republish hen recipes. A hen's stomach is an appalling mystery. Men who can translate the elegies of the most barbarous of ancient nations and give you the weight to an ounce of a square mile of atmosphere precipitately back down from the analysis of a hen's stomach. An animal that can take down a whole dishcloth at one gulp and regret that it wasn't a roll of stair carpet is not to be told what it shall eat.

Best work done at Brennan's steam laundry. Everything white and spotless. Lace curtains a specialty. All work guaranteed.

Still Drawing.

The Phoenix Fire Company's fair continues to draw immense throngs to Robbins' opera house. Last night the Grant Cornet Band entertained the large gathering with several excellent selections. Don't fail to go to-night.

When it becomes necessary to hire a horse and buggy, whether on business or pleasure, many people like a neat buggy and a nice, quiet, gentle horse that can travel pretty well; others like one that is a little active and showy. Persons in need of horses and buggies can be accommodated with what they want at
