WASHINGTON, Dec. 24.-The talk of possible trouble with Chill, although wholly unofficial and unauthorized, has at no time been so general as it is to-day among oilleers of the army and navy. Moreover, this gossip is given color by no little external evidence. It is known, for example, that the State Department is quite well informed as to the probable answer of Chill, based upon the finding of the judicial inquiry into the Baltimore outrage, and that this reply will not be satisfactory.

Then there are some significant facts. The War Department is forwarding re-cruits, in squads of forty or fifty, as rapidly as possible, to fill the complement of regiments in the far West and on the Facilic coast. General Schoffeid has said that 10,000 men were available to sund out of the country, but that no more could be spared from the regular army.

Gun carriages are being shipped to Sun Francisco in Sections, and the guns will follow at an early data. Three 10-inch guns will probably be shipped oarly in January. The first 12 inch riffs has just been tested at the Indian Head proving grounds with satisfactory results. restilts

results. The whole force at the Washington Navy Yard is at work turning out pro-jectlies and the men are kept at work night and day. The Navy Department has jout ordered twelve Einckman's range finders, although they have never yet been officially approved by any offi-cial board, a predeeding very unusual. The harbor of San Francisco is being buoyed so that the range of every war vessel will be accurstely known as the vessel will be accurately known as the result of experiments in firing. General Schofield has been twice sum-

General Schofield has been twice sum-moned before the Cabinet, and has given it as his opinion that if 10,000 men are sent out of the country it will be quite possible to fill their places in the regular army at home by temporary enlistments from the militia, a certain quota of regulars, equipped for actual service at the army posts, to be called for from each State. In case the 10,000 men transported to Chill should not be enough it is reported that the Freshenough, it is reported that the Bresi-dent may call for 20,000 volunteers for a

Add to all these facts and rumors the And to all these facts and rumors the general inderstanding that the Presi-dent will insist upon immediate and full reparation by Chill, and that seve-ral of Spreckel's stoamers in the Aus-tralian and Hawaiian trade have been conditionally chartered, the war talk so current here to-day seems to have some apparent foundation.
