THE RESOLUTIONS.

The Republicans of Schuylkill county, in convention assembled, reaffirm their devotion to the principles of the great political party whose achievements constitute a record of thirty years intellectual, moral and political advancement among the most enlightened, invenendent and particule people in the civilized world. This convention, representing and speaking for the Republicans of the great county of Schuylkill, make the following declarations:

1. We heartily endorse the pure, prudent and patriotic administration of Pfesident Harrison, which, by its suitemanship, dignity and

patriotic administration of Pfesident Harrison, which, by its statesmapship, dignity and lirmness, has evoked the enthusiastic approbation of Americans, regardless of political affiliations, and won the respect and confidence of all civilized nations.

2. We congratulate not alone the Republican party, but the entire country, upon the beneficent results of the system of protection to American industry, as embodied in the law universally known as the McKiniey bill, and regard the attacks being made upon it by the present Democratic Congress as assistions attempts to destroy the unprecedented industrial and commercial prosperity attained under its influence and operation, and to drag American labor down to the level of the semi-slavery of the represent unities.

PRESENT SYSTEM OF ROAD MAKING BAD.

THE STONE CRUSHER THEORY.

It Upon the Streets Will Not Make the Roads any Better-Hints for Improvements.

INCE the construction of the electric railroad has been nushed in town and the gangs of workmen have made the trenches on Coal and Main streets for the sills and ralls, the

subject of good street work has come to the front again. The digging up of the streets shows the false theory upon which the so-called road improvements of the past have been based,

That the condition of the common roads has much to do with the prosperity of a town, raises it socially, commercially and financially, widens its influence, and bringit in touch with all the improving and civilizing influences of the busier world

The question asked is, "How should were inflicted and the condition of the roads be made?" The evil results of this shiftless and unsystematic use of broken stone may not only be seen in the long and toilsome process of rolling this material into passable shape by the wheels of wagon traffic, but it involves questions of economy in use of material, and in the permanency of the road itself, which ought to be considered. HUSTLING ON THE ROAD.

One of the Foolish Arguments Made

Against the Construction. The pick and shovel gang on the electric railway are plowing their way down Main treet at a rattling pace, and the trench is now down to Oak street. The work is being pushed with all possible speed to complete the road in town at an early date and have the mounds of dirt cleared away.

This morning the track and wire men mmenced work on Coal street, and at con tracks were laid and spiked as far as Jardin street. Rails will be in position as far as Main street by the time the gang juits work to night.

It is understood that one or two of the Councilmen caused the spe ial meeting of Council to be called for this evening with view to applying for an injunction against the railway company. If the grounds of complaint are no better than those stated by one Councilman the chances for an injunction will be very slim. This Councilman maintains that the road should be laid on one square at a time and the digging should not be pushed as it has been the past three days. It should be plain to any intelligent man that the pick and shovel man must be in advance of the rackmen and that both gangs cannot work at the same time on one square; and t would certainly be unreasonable to expect the company to have pick and shovel men make a trench on one square, then rest upon their tools until the trackmen finish their work; and then have the latter gang lay idle until another trench is made

The work done since Monday shows that the company is doing all it can to get through its work in town as as soon as possible. The p ople realize this, and they will not bridge any obstacles from parties who wish to vent a personal prejudice.

The April number of Judge's Library or Monthly Magazine of Fun, Ante Up, is filled with pictures devoted to the American national game-not base ball, but poker.
