PUSHES THE QUILL

The Leading Topics of the Day Presented and Commented Upon by a Fluent and Able Writer.

INING districts, as rule, says the School Journal, take much greater interest' in education than the farming districts of Pennsylvania. For merly the miner seemed to care les than any other clas-

for the education of their children. The boys were put to work in the mines almost as soon as they could walk. Now this can no longer be done, under penalty of a heavy fine. Consequently the parents are willing to have them attend school so long as they cannot become bread winners This is not the only reason, however, that is operating to improve the schools of the mining districts. The parents, although for the most part uneducated foreigners, realize the benefit of a public school education. Another reason is the fact that the miners, who very seldom own real estate, do not feel the burden of local taxation. while the farmers usually own their farms and therefore feel that tax and keep it down to the minimum. In the mining districts the percentage of attendance is high, and the proportion of children between the ages of six and sixteen, who do not attend the public schools, is comparatively small. The farming districts present no such gratifying statistics.

I must extend my hearty congratulations to the Republican leaders of town. Previous to the Minneapolis convention each had his personal preference as to who should be the nominee for President, but now you cannot find a single politician of that faith who is not an enthusiastic Harrison man. All differences ended with the adjournment of the National Convention, and the battle cry now is all along the line, 'Harrison and Reid."

But I doubt if it will be possible to say the same in reference to the Democratic hosts. Still, should Cleveland secure the nomination, there will be little effort made at reconcilliation, I imagine, for the very good reason that the Hill coherts in this town are confined to the office of your teemed Sunday contemporary.

. Almost daily evidences occur to warrant me in making the statement that Shenandoah has the finest police force of any town n the county.

Pottsville is noted for its large amount of that commodity some people term "gall," but which the "blue-bloods" of the county eat term justice. Shenandoah has witness many instances in which they have displayed their abilities in this respect upon our people and it was only a few days ago that our town was flooded with appeals for aid to support a purely Pottsville organization. This is gall seasoned with a little ginger. I think the citizens of the county seat should pattern after those of our own town and support their organizations, and not compel them to seek assistance from Luncheon and Corned Beet, other places throughout the county.

Girardville will present a pleasant scene on the 25th instant, the occasion when the Company F, 8th Regiment, of that town. The cadets are said to be experts at drilling, and their appearance in the coal region will certainly redown to the pleasure of both the young soldiers and their large circle of friends and admirers. The Read-Fresh Creamery and Dairy Butter, ing company have kindly tendered a special train for them on the occasion.

The Philadelphia & Reading railroad company made a good move when they placed the early Sunday morning newspaper train on the road, thus enabling the people of town to procure the city papers

# THE ELECTION VERY QUIET

The Opponents of the Increase of Debt Are Confident of a Defeat for the New Water Works

point unmistakably to the utter defeat of the new water works boomers. One of their most enthusiastic followers remarked at noon that the advocates of the old water company would wind in the Third ward

with a good majority.

This is the ward where the joint committee have exerted their greatest effort, and in the Fifth ward, which the latter yesterday openly boasted that they exected to carry by at least 200 majority, now consider themselves fortunate if they are able to come out of the ward even.

It is conceded by friends of the joint committee that the second will vote two to ne against the new water works.

Much unfriendly feeling was exhibited last evening between the friends of the old company and the followers of the joint ommittee. In several instances the argument resulted in fistic encounters between the respective adherents. In one case an ardent advocate of the new water works deserted them and came out boldly for the old company. He is also a member of the joint committee.

## Columbus Day Celebration.

The proposal for a National Columbian Public School Celebration on October 12, 1892, is one of the most sensible suggestions yet made about the Columbian year. It is to be commended most heartily, and it is not too much to say that it will be almost universally observed. It will at once commend itself to every reader who has a spark of patriotic pride of country in his the proposed new water works, and that an heart. What an inspiring sight would be a great procession of all the school children of Shenandoah, together with all the patriotic organizations of the town.

# Things Worth Remembering.

When you feel a kind of goneness about the stomach it is a sign that your food does not sit well and that you are about to have a fit of indigestion.

When you begin to feel nervous and are unable to sit still comfortably; when your clothes suddenly seem to lose their fit and bome too tight in places the fit of indigestion is surely upon you.

When this fit of indigestion is repeated from day to day it finally resolves itself into dyspepsia.

Remember that three to ten of Brand-Bucknell University, Lewisburg, Pa., will reth's Pills will cure the worst case of indigestion or dyspepsia, or both, and that a regular course of them, say two every night for a week or ten days, will act as a preventive of either complaint.

# The Coal Trade.

The anthracite coal trade is unchanged in any material feature. The weekly output of coal continues at the rate of about eight hundred thousand tons, and No better known remedy exists for all the markets are absorbing all the newly forms of Rheumatic diseases than the mined product, so that there is no surplus stock accumulating at tidewater shipping 50 cents a bottle. To be had at C. H. points worth mentioning. The Reading company is short of coal at Port Richmond, and there is some delay there in filling orders for eastern shipment. The eastern markets, however, are not suffering for coal, the dealers having sufficient stock on band to supply their immediate requirements. There is considerable coal going to the western lake ports for distripution. The southern trade is taking an
