NEW PLEASURE

GROUNDS SELECTED

LOCATED BELOW AND NEAR WM. PENN.

ANOTHER STROKE OF ENTERPRISE

Picnic Grounds That Will be Reached by the Electric Railway—Ample Shade, Water and Electric Lights.

JOY HAS reigned supreme in the hearts of the people along this valley since the electric railway company decided to establish picnic and pleasure grounds on the mountain southwest of Wm. Penn. Since the abandonment of Columbia Park there have been no grounds for picnics or other pleasure events in the valley. It is true that there are grounds east of Wm. Penn and about Girardville at which picnics have been held, but they are in a crude state and there is nothing about them to indicate a permanency or that makes a visit to the grounds a source of pleasure. They have platforms for dancing of the most crude design and here and there are boards laid upon uprights from which refreshments are sold, but the surroundings are bare and dismal and when one wishes a seat he or she must select a stump of some long departed tree or squat upon the ground.

These disadvantages did not escape the watchful eyes of the enterprising men at the head of the electric railway and they realized that a first class pleasure resort within easy distance of the towns and patches in the valley would be an excellent investment. Now that the railway is in good running order and the officials have time to attend to other matters occasionally they have established new pleasure grounds.

They are on the mountain south of the electric railway and directly opposite Cleary's hotel. The walking distance from the main line of the electric railway is about half a mile. The railway company will run a branch track to the grounds from the west end of Wm. Penn and the distance will be about three-quarters of a mile.

The branch has been surveyed and workmen broke ground for it on Saturday. They worked all day yesterday and will be kept going as steady as possible with a view to have the road ready for travel in time for the formal opening of the grounds on July 4th.

The site selected for the grounds is a delightful one. There is plenty shade and nice walks, and a spring of excellent water is near. In addition to this the eminence of the grounds give an excellent opportunity for a sweeping view of the valley.

The dancing pavilion now in course of erection will be second to none in the county. It is the large platform that afforded delight to the patrons of Columbia Park in years past, but in putting it on the new grounds the company will give the structure new and first class flooring and a new roof. One of the features of the grounds will be illumination by electric lights and the old-time, dirty, oily torches now in use at such places, will be relegated to the scrap pile.

What more can be wished for in a pleasure ground? Direct communication by electric railway, grounds with and without shade, first class water direct from an excellent near-by spring, one of the largest and best dancing platforms in the county, and the whole under the brilliant and inspiring lights of an electric plant.

The electric railway will not control the park. An organization to be known as the Schuykill Athletic Association has been formed and will control the grounds, working, of course, in harmony with the electric railway company, so that whenever the grounds are occupied there will also be ample means for travel to and from the place at all hours.

The Association will spare no means or pains to make the grounds first class in all respects and that the place will eventually become the most popular resort in the valley is beyond doubt.

Some people have questioned the advisability of running the electric branch to the grounds. They are parties who are not acquainted with the place and who seem to think there is too much grade for a safe road.

There need not be the slightest fear in that connection. The ascent up the mountain is easy, less than six per cent. It should also be remembered that the electric road is one of the best equipped in the state and there are four means by which the motor man can bring the car under control in case of a mishap on the grade. He has the front brake. If that fails to work the conductor can apply the rear brake. If both brakes should fail, the motor man has his reverse motor lever and fourthly, the switch above his head. So it is clear that there is no chance of a serious

mishap on the grade to the pleasure grounds.

The ground will be ready on July 4th and the electric branch will also be running by that time.

GIRARDVILLE GLEANINGS.

A Newsy Letter From a Wide Awake Correspondent.

There is joy in the household of Thomas Durkin. "Tom" has been married fifteen years, but until Sunday he never was a father. Bright and early on the morning of that day his wife presented him with a bouncing boy and now the fathered calf is being killed and friends from all sections of the valley are flocking into the house of Mr. Durkin to extend congratulations. The Herald joins them in wishing Mrs. Durkin speedy recovery and the child long and healthy life.

Dame rumor has put her bonnet on again and is among the neighbors telling them that one of Girardville's most popular hotel keepers is about to become a benedict. W. J. Lloyd, the caterer, of Shenandoah, is still in charge of the Palace restaurant. "Billy" has become very popular since his stay here and everybody gives him credit for being a first class caterer.

Considerable money is going up on the Gibson-Donohue fight, which is to take place on July 12th. Some money was received here on Saturday from Shenandoah with instructions that it be placed on Donohue.

The electric railway brings a large number of Shenandoah people to this town every Sunday.

The recent kicking against the electric railway by a few of our people was due to a misapprehension of a survey that was recently made by the company. A track was surveyed from the west end of Wm. Penn over the mountain to the place where the new pleasure grounds are located and some people here circulated the report that the company was surveying a line that would cross over the mountain from Wm. Penn to Mahanoy Plane and leave Girardville in the cold, so far as the Mahanoy Plane branch was concerned. The kickers are now realizing their mistake.

One of the programmes left behind by the Girard College Cadets contains some interesting information. It shows that the college was originated and endowed by Stephen Girard and was opened January 1, 1848, with 100 pupils. The present number of pupils is 1,600. The area of the grounds is 40 acres and the buildings number 14. The paper also shows that the Girard Estate has in Schuylkill and Columbia counties 6,000 acres of coal lands, 12,500 acres of timber and farm lands and 662 acres of the latter are under cultivation.

POLICE ON THE ALERT.

Numerous Reports of Horse Stealings Keep Them Busy.

In conversation with a Herald reporter last night Chief of Police Davis stated that horse stealings are numerous in Luzerne, Lehigh and Berks counties and that hardly a day passes without the receipt of one or more circulars of reward. The reports have made our police more than ordinarily vigilant and suspicious looking strangers are kept under watch from the time they enter until they leave the town. Saturday two strangers came to town and when visiting several saloons displayed plenty money, but their actions were suspicious. They were put under watch until 2 a. m. yesterday, when they left the town, saying they were going to Wilkes-Barre. The police believe that the two men are wanted for some of the horse cases, but had no grounds upon which to arrest them.

Steadily Increasing.

Messrs. Hoebner & Co., the Port Carbon regalia manufacturers, have just received an order from Company C, Jr. O. U. A. M. Guards, of Mahanoy City, to furnish them with uniforms. This firm is steadily increasing their trade in this section, and this last order was obtained without any solicitation on their part, an evidence of their popularity as society goods manufacturers.

Fire in the First.

Fire was discovered this morning in a stable in the First ward owned by James O'Hearn. An alarm was sounded and the fire companies responded, but a few buckets of water put the fire at end. But slight damages were done. The fire is supposed to have been started by children who were playing in the stable.

A VERY LIVELY

STREET SCENE

A WOMAN SHOWS HER PUGILISTIC SUPERIORITY.

SHE BEATS A MAN TO HIS KNEES

A Hungarian Prosecutor Skips From the Town After Stealing Two Watches—Watchful Police.

WOMEN do not figure in fights on the streets in this town nowadays, but this morning an Italian woman made an exception to the rule and engaged in lively combat with an Italian man at the corner of Main and Centre streets. The man in the case owns the fruit stand at the northwest corner of the streets stated. The woman passed there this morning and the fight followed.

The man evidently is not a good judge of human nature and miscalculated the fighting qualities of the woman, who pitched into the battle like a true Amazon and when Chief Burgess Smith arrived upon the scene to make arrests she had fought the man to his knees and was belaying him with a stout stick.

People who saw the occurrence say that the man had evidently provoked the woman as she passed the stand and she resented his conduct by striking out right and left until a stick got within reach and then she played a tattoo upon the man's head and shoulders.

Chief Burgess Smith arrested both parties for fighting on the street and the man made a charge of assault and battery against the woman. He claims the woman owes him a bill.

A reporter tried to get the true facts of the case from an Italian who championed the woman's cause. This is the result of the investigation:

"Dat fellows him no good a bit. Too bad it look like a man sue a woman. All right. Dat case Pottsville go."

"What was the cause of the trouble?" the reporter asked.

"Yes, I guess so. 'Squire says go Pottsville. Too bad man sue a woman."

The reporter gave up investigating in the Italian quarters and was forced to rely upon tid-bits picked up from statements of some excited Italians and which lead to the conclusion that the fight arose from an old grudge.

ON TRIAL FOR MURDER.

The Kellys on Trial for Killing Policeman Merget.

Thomas and Joseph Kelly, two of the young men charged with the murder of U. & I. Policeman John Merget, at Tamaqua, were put on trial at Pottsville yesterday. E. E. Bakesley, charged with being an accomplice of the Kellys, will have a separate trial. His attorney is D. C. Henning, Esq. The Kellys are represented by E. D. Smith and George Roads, Esqs. The prosecution is conducted by District Attorney Koch and John F. Whalen, Esq., assistant solicitor of the P. & R. C. & I. Co.

A jury was secured from a panel of eighty-two. Among the jurors are Ex-Poor Director George Heffner, A. J. Gallagher, of Shenandoah, and William E. Reese, of Girardville.

Detective John O'Brien, of the P. & R. C. & I. Co., will be one of the most important witnesses for the prosecution and it is expected he will make sensational developments concerning the history of the accused.

THE PROSECUTOR SKIPPED.

And Now the Police Want Him for Larceny.

A few days ago a Hungarian of the First ward named Joe Willustovic caused the arrest of a fellow-countryman on a charge of fraud, alleging that he borrowed eight dollars on false representations. The accused furnished bail for trial. Special Officer Alex is now looking for the complainant. Willustovic got tired waiting for the case to come to trial and resorted to other measures to make good the eight dollars he was out. He borrowed \$5 in cash from one friend and slipped off with two silver watches belonging to another.

WESTERN TRAVEL

As Described by a Townsman Who Recently Enjoyed Them.

As I surmised, our Democratic friends were not so far as well in Chicago as the Republicans were at Minneapolis. There was little or no confusion at the latter place. Every citizen was interested in the good name of the city and exerted himself to make the visit of the strangers as pleasant as possible. The meals were good and reasonable prices charged; nicely furnished rooms and good beds constituted the lodgings, and the rooms were plenty at no greater cost than \$2 per day, each, and forced to occupy a room having seven inmates. The prices asked for meals were equally exorbitant.

In Minneapolis the churches and religious societies furnished meals at reasonable prices and some of the best ladies in the city assisted at the tables. It was a good piece of enterprise for the treasuries of the respective churches and societies were well filled.

Few of the noble (?) red men were seen in Minneapolis during the convention, although there is quite a habitation of these some miles distant. They manufacture trinkets for sale at the many resorts. These articles consist of stone pipes, tomahawks, squares, wampum belts, small birch canoes, etc., for all of which fancy prices are asked. At the Journal office visitors are received very kindly. The press room is one of the most attractive departments of the plant. There are three fine lightning presses, turning out papers complete in every detail—the white paper going in at one end of the press from a large roll and coming out printed on both sides, pasted, folded and counted.

There are many Swedes in Minneapolis and they make citizens of the best kind. They are thrifty and honest and nearly all own their own homes, and are engaged in business of all kinds, according to the signs displayed.

The stores of the city are very fine. Much attention is given to the dressing of windows to make them attractive. This is the case in all the western cities. It pays and the merchants tell you so.

The exposition building is one of the largest in the United States and the Republicans were sensible in holding their convention there. The erection of the building was conceived in one night and the next day work on it commenced, money being subscribed freely and the amount required being raised within a few hours. Similar enterprises have been started in the city in like manner. Nothing is considered too big for an undertaking and no time is lost. A project once broached is acted upon at once.

People speak of going to Chicago or Denver from Minneapolis as the people of Shenandoah speak of going to New York or Philadelphia. Distance is not taken into account. To take a sleeper after supper and rise with the lark next morning at Chicago is a common place thing. B.
