# ALL IS DESOLATION IN HAMBURG

Fewer Deaths Are Reported, But an Increase in New Cases.

## PRAYERS FOR AN ABATEMENT OF THE PLAGUE.

There Have Been 3,888 Cases in the Infected City So Far, and 1,771 Have Proved Fatal—Travel in Germany Almost Entirely Suspended—The Suspected Case at New York Turns Out to be Only a Case of Cholera—Yesterday's Record.

HAMBURG, Sep. 3.—Sedan Day passed without festivities of any kind. There were no processions, no music or meetings. Not a flag was displayed in the city.

In all the churches services of prayer for the abatement of the plague were held. They were attended by crowds which filled the buildings. Hardly a woman in colors or a man without the black badge of mourning on his arm, was to be seen, and the prayers were offered amid the sobbing and groaning of the congregations.

The desolation of the city has been apparent as at no other time since the introduction of the pest. For an hour after the services the streets were filled with sad-faced men and weeping women.

The number of fresh cases up to noon is 738, an increase of 53 since yesterday; the number of deaths 391, a decrease of 48 since yesterday. The decrease in the number of deaths is due to the corresponding decrease yesterday in the number of fresh cases.

According to the official statement 3,888 persons have suffered from the cholera since the epidemic took hold in this city. Of these 1,778 have died. Complaints are coming in from all quarters about the hardships which the quarantine inflicts on almost everybody living here at the present time by choice or otherwise.

The foreign travelers are, of course, the greatest sufferers, though it must be conceded that in many cases they have to thank themselves for their discomforts. Traveling in Germany, and especially in this city, has been almost entirely suspended. The government warns the public not to travel by way of Cherbourg, as vessels from that port are infected and subject to quarantine. Some of the public buildings here will probably be turned into temporary hospitals. Since yesterday a new system of disinfection has been established, which works apparently well.

Moscow, Sep. 3.—The death rate from cholera is increasing, owing to the increasing heat. The number of deaths has doubled within a week.

## CONSTERNATION AT LIVERPOOL.

Shipowners Will Lose Heavily Through the President's Proclamation.

LIVERPOOL, Sep. 3.—In view of the quarantine at New York, the steamship Alaska will not carry emigrants on her next trip.

The shipowners have been thrown into a state of consternation by President Harrison's proclamation. The booking of emigrants for the next two weeks has been very large and the companies will suffer heavy losses through the necessity of refusing to carry them.

## CHOLERA'S FIRST START.

Traced to a Dirty Hut in a Russian Immigrant Camp.

BERLIN, Sep. 3.—The Imperial Board of Health publishes a report according to which Prof. Koch and Dr. Roth in their recent investigations in Hamburg have traced the origin of the cholera in that city to a hut in the camp of some Russian immigrants, from which dirty water found its way into the river Elbe close to the Hamburg water works.

## CHOLERA AT PIEDMONT.

Reported that Its Presence Has Been Officially Suppressed.

ROME, Sep. 3.—The "Corriere Di Napoli" states that the cholera has broken out at Piedmont, and that the fact has been officially suppressed.

It is said that pilgrimages to Rome during the Papal Jubilee will be forbidden for fear that the plague would spread through them.

## Regarding Emigration of Malls.

WASHINGTON, Sept. 3.—The question as to whether or not it is necessary to fumigate the mails arriving in the United States from Canada as a safeguard against cholera has given rise to such conflicting opinions that Postmaster-General Wainwright has telegraphed the Postmaster-General of Canada asking what steps in this direction were being taken by Canadian authorities.

## More Cases at Antwerp.

ANTWERP, Sep. 3.—The agents of the Red Star line say that their ships will cease carrying emigrants in view of President Harrison's proclamation. The "Opinion" states that seven cases of cholera were discovered yesterday. Three of them were fatal.

## Cholera Causes a Riot.

BUDAPEST, Sep. 3.—Pensants in Cleveas started on a riot during the morning because several cholera patients were carried through the town. They tried to beat the men conducting the transport, but were soon driven off by a company of soldiers.

## Little Room in London Hospitals.

LONDON, Sep. 3.—It transpires that 3,650 fever patients occupy all the beds usually available in the hospitals for emergencies. About 1,500 beds have been specially arranged for, however, to meet the requirements of a cholera epidemic.

## Twelve Deaths in Paris.

PARIS, Sep. 3.—Twenty-one new cases of cholera or cholerae were reported in Paris yesterday, and there were twelve deaths from the disease.

## School Vacations Prolonged.

VIENNA, Sep. 3.—On account of the cholera the holidays of school children have been prolonged until the middle of October.

Highest of all in Leavening Power.—Latest U. S. Gov't Report

# Royal Baking Powder

ABSOLUTELY PURE

## CHINESE AND THE FAIR.

Exhibitors and Their Employees May Enter the Country Freely.

WASHINGTON, Sep. 3.—The Secretary of the Treasury has issued a circular letter concerning Chinese exhibitors at the World's Fair. After citing the joint resolution of Congress which exempts Chinese exhibitors from the operation of the Chinese Exclusion act, the circular says:

"In pursuance with said joint resolution Collectors of Customs at ports where Chinese persons who are exhibitors or employees of exhibitors at the World's Fair Columbian Exposition may first arrive, are instructed to admit such persons upon the presentation to them of satisfactory evidence that they are bona fide exhibitors or employees, whose services are required by such exhibitors, at the Exposition. In such cases the certificate will not be required.

## THE FLOWERING BROOM.

A Rare and Beautiful Plant Growing in Madeira.

The plant known under this name, Genista virgata, at Kew, is one of the largest and finest members of the entire genus, says the London Field, and should be made a note of by anyone anxious to select the best of our hardy flowering shrubs. It forms a freely-branched bush of rounded outline that reaches a height of ten feet or more, and about the end of June it is so thickly laden with its golden blossoms as to present quite a mass of that hue, which, especially at that season, is particularly attractive, for though the bulk of our hardy leguminosae produce yellow blossoms, most of them are over before this species commences to unfold its flowers.

Though it has been such a conspicuous feature during each recurring season at Kew for many years, it appears to be but little known, and may be sought for in vain in the catalogues of many of our nurserymen, at least under the specific name of virgata. There is certainly a good deal of confusion with regard to its correct nomenclature, for the Genista virgata of the "Dictionary of Gardening" is described as a native of Madeira, attaining a height of three to four feet, and flowering in March, so that it is presumably a greenhouse plant; while by Loudon G. virgata is given as synonymous with G. aphylla, an inhabitant of the Siberian deserts, of about the same height as the preceding, but with violet flowers. The Kew plant is certainly neither of these; indeed, it was there for a long time grown under the name of G. elata, but within the last few years this has been superseded by the name it now bears.

## BIG REWARD OFFERED.

The Captors of McWhirter's Murderers Will Receive \$25,000.

FRESNO, Cal., Sep. 3.—There are no new developments in the McWhirter murder mystery. The Vigilance Committee seems to be waiting for the capture of the assassins before deciding to take action.

Mrs. McWhirter has offered an additional reward of \$10,000 for the arrest and conviction of the murderers, and her family has added \$5,000 to this amount, making a total of \$25,000. The authorities expect to have the men in custody before Sunday evening.

## NEWS OF THE DAY.

President Harrison has returned to Leon Lake.

George William Curtis was buried from his late home on Staten Island, N. Y., yesterday.

The colored voters of New Jersey will meet in convention at Trenton, Sept. 12, to perfect an organization.

The State Board of Fair Managers will probably select Sept. 3, 1893, as "New York's Day" at the Chicago Exposition.

New York State's Women Managers of the World's Fair Board will attend the Columbus celebration on Oct. 10, 11 and 12.

Roger S. Searle, of Montrose, Pa., was nominated as the Democratic candidate for Congress from the 15th Pennsylvania district.

Lieut.-Gov. Royal has prorogued the Northwest Territory Legislature, thus killing the School bill and breaking the deadlock.

Considerable of the crops in Trough Creek Valley, Pennsylvania, have been nipped and perhaps seriously injured by early frosts.

Isaac A. Stillwell, a printer fifty-two years of age, residing at W. 11th street, Brooklyn, committed suicide last evening by inhaling gas.

Proceedings will be taken at once for the extradition of John A. McShane, of Chicago, Ill., arrested in Nova Scotia on a charge of embezzlement.

The Cement Laborers' Union, after a ten-day strike in New York city, won its fight. The 340 workmen will return to work at an advanced wage rate of \$2.50 a day.

A \$5,000 mortgage has been registered at Louisville in favor of the Central Trust Company of New York upon the Louisville, St. Louis & Texas Railroad.

The entire interests of the Armour family, representing fifty millions, are to be harmoniously united on the first of October. The amalgamation affects Chicago, New York and Kansas City.

Thomas Devine, 41, for many years watchman and gate keeper for the Union Metallic Gas Company of Bridgeport, Conn., hanged himself yesterday after being on a three days' spree.

Two hundred iron molders in the Carrers & Haas foundry, in Brooklyn, N. Y., are on strike, owing to an order issued by the superintendent prohibiting the men from leaving work to purchase beer.

J. N. Whitney, chief clerk of the Bureau of Statistics of the Treasury department, Washington, is in Ottawa in consultation with George Johnson, the Dominion statistician, in reference to the uniform collection of statistics of domestic imports.

George Vernon, who ran New Jersey's first locomotive, John Bull, on the Camden & Amboy railroad in 1831, when the engine was brought from Newcastle-on-Tyne, is dead, in his 87th year, at Bordentown, N. J.

# SAYS JENKINS IS RIGHT

The Doctor May Hold Vessels as Long as He Pleases.

## OPINION OF THE ATTORNEY-GENERAL

Much Comment on the Health Officer's Statements—Not Believed That He Will Attempt to Ignore the President's Proclamation—Collector Hendricks Will Enforce the Order.

WASHINGTON, Sep. 3.—The statement of Dr. Jenkins, Health Officer of the port of New York, to the effect that President Harrison's proclamation directing a quarantine of 20 days in the case of all vessels carrying emigrants from Europe would be ignored, is the subject of discussion in official circles. Its tone of indifference, not to say hostility, causes considerable comment.

Dr. Jenkins says that he has power to determine how long vessels should remain in quarantine, and, notwithstanding the President's proclamation, he proposes to use his own discretion, and if necessary, or as the case demands, suspicious ships will be held a longer or shorter period than twenty days. His action will be taken with the understanding that he alone is responsible, and the President will not be considered.

"Dr. Jenkins is technically right," said Attorney-General Miller to a representative "when he says he is vested with power to hold any vessel as long as he deems it necessary under the statutes. The general government has no power to enforce a quarantine on its own motion. That was the conclusion reached in the opinion furnished by the Department of Justice to the President Thursday. That opinion stated that the Surgeon-General of the Marine Hospital Service and the Secretary of the Treasury, together with the President's approval, had authority to make needful rules and regulations, not inconsistent with the State laws and regulations, for the quarantining of ships coming into our harbors with a view to the protection of the health and lives of our people.

"That means that nothing can be done by the Federal government in opposition to or inconsistent with State laws on the subject, and whatever force the President's proclamation will have must be given to it by the State authorities.

"It was said," continued Attorney-General Miller, "because it was believed the government should do whatever it possibly could to prevent the introduction of the scourge. It has exhausted every power within control, and whatever more is desired from the government must be authorized by Congress.

"In view of the unanimous approval which has met the President's action in issuing his proclamation, I very much doubt Dr. Jenkins will attempt to ignore or override it. Should he do so, however, the consequences, whatever they may be, must rest with him."

In conclusion Attorney-General Miller said: "If Dr. Jenkins should decide that the President's proclamation should not be enforced, I would advise the summoning of Congress, to meet within 10 days, to clothe the general government with the power it now lacks to act in such emergencies as the present."

## HENDRICKS VS. JENKINS.

The Collector Will Enforce the President's Proclamation.

NEW YORK, Sep. 3.—Collector Hendricks says there will be no nonsense about the enforcement of the instructions in the President's circular recommending a quarantine of 20 days.

Although he intimates that there will be no conflict between the Federal and State authorities, he makes it plain that no evasion of its provisions will be permitted.

Health Officer Jenkins may exercise his prerogative of passing a vessel coming from an infected port within 24 hours after its arrival if he chooses, but the customs authorities will prevent that vessel discharging cargo or passengers removing their baggage until the 20 days' quarantine recommended by the President has expired.

The collector takes the stand in accordance with instructions received from Washington. He has issued the following to George W. Lyon, Surveyor of the port of New York:

"In accordance with the provisions of Department Circular, No. 150, you are instructed in all cases in which vessels are at anchor in the bay, and to prevent them from coming to their docks, and to prevent the landing of passengers, baggage and freight from them until due application has been made on behalf of such vessels to the Treasury Department and a special order received therefrom, allowing such vessels to make entry.

"You will also see that vessels leaving a foreign port after September 1, 1893, are prevented from coming to their docks, and also to prevent the landing of passengers, baggage or freight until the expiration of the 20 days, or of such further time as the State authorities may require."

"FRANCIS HENDRICKS, Collector."

## Held for the Grand Jury.

POTOMAC, N. Y., Sep. 3.—Mrs. Sarah Hoffman, who is accused of the murder of her baby girl, whose remains were found in a creek at Rock City, Dutchess county, last Saturday, was committed to jail by Coroner Carroll to await the action of the grand jury. The woman has maintained absolute silence, and has refused to speak a word to anyone since her arrest last Monday.

## Re-arrested on a Murder Charge.

HARRISBURG, Pa., Sep. 3.—James Madden, who was arrested on the charge of murdering John Kennedy of Scotton several weeks ago, and who was afterwards exonerated by a coroner's jury, has been re-arrested and committed to the county jail in this city. This charge was made by the wife of the murdered man, and it is said to have been on the strength of new evidence.

## The Letters of Acceptance.

WASHINGTON, Sep. 3.—It is understood that President Harrison's letter of acceptance will be made public on Monday morning next. Mr. Whitelaw Reid will follow about Sept. 15. Mr. Cleveland has not yet indicated when his letter of acceptance will be given out, but it is expected to be made public not later than Sept. 15.

## Are We Right or Wrong?

A Shoe Dressing must restore the brilliancy of a worn shoe, and at the same time preserve the softness of the leather.

LADIES will the Dressing you are using do both? Try it!

Pour a dessert spoonful of your Dressing into a saucer or butter plate, set it aside for a few days, and it will dry to a substance as hard and brittle as crushed glass. Can such a Dressing be good for leather?

## Wolf's ACME Blacking

Will stand this test and dry as a thin, oily film which is as flexible as rubber.

25 Dollars worth of New Furniture for 25 Cents. NOW? By painting 25 square feet of Old Furniture with
