QUARANTINE, Sep. 14 .- Viewed from the Health Officer's official residence this morning the cholera scare is not the pleasant picture of progress in stamping out the disease which has existed for the past few days. The report that actual cases of Asiatic cholera have existed in New York the last week, in spite of the daily official bulletins to the contrary, spreads a wet blanket over the doctor's keeping the scourge from passing the ocean guteway.

The flash of discouragement which spread o'er the face of the Health Officer when told of the official admission made by the New York Board of Health yesterday afternoon was certainly 'natural, while his instant exclamation: "I don't believe it got in by quarantine," simply veloced the belief of all who have been stationed here and watched the enforcement of quarantine regulations. All these deaths were reported to the Board of Health and investigated with the utmost care. All of them were of a

snepicious character. Nothing but the decision of the microscope was needed to complete the diagnos-is of Asiatic cholers, and that diagnosis Prof. Biggs has now made.

He communicated his decision to the Board of Health, and President Wilson summoned President Martin of the Pollee Hoard. After consultation behind closed

doors the cholera was announced. Two physicians of Dr. Moreau Morris's stalf are on duty in each of the infected houses. Their orders are never to leave houses. Their orders are never to leave the house. One physician must always be there

Diseases is also of the opinion that there will be no cholera epidemic here. "I think its spread will be less than typhus fever," said he. hotel was the headquarters of the baymen. A number of the women on Fire Island will be removed to the foating hotel which Mr. Bayard Cutting offered to the Health officers and which was accepted by them, as soon as it gets to the landing at Fire Island. The hotel will accommodate about fifty persons and will be more comfortable than the Surf Hotel. Several of the passengers were seen and talked to by a reporter. They described the terrible experience they had had abcard the stear boat and their suffering while they were prisoners aboard the vessel. They told in pathetic words of a woman who Monday night gave birth to a

little child on beard the bost. Several other women were also shortly to give birth to children, and their situation was Some of the female passengers and

children are still suffering from the effects of their terrible experience, but none are regarded as serioualy ill. The woman who gave birth to a child while on board of the Cepheus is re-

Among the vessels which were released were the Netherlands Steamers Didam and Maasdam, which arrived here Tues-day; the Red Star steamer Belenland, which arrived on Monday from Ant-worp and the National Line steamer England which arrived here during tha morning from Loudon.

The situation on the pest ships now in Lower Quarantine and on the islands where the immigrants are being cared for has shown little change in the past twenty-four hours, and Dr. Jenkins is greatly pleased at the outlook. The fact that but one case of the

plague has developed in several days strengthens the hope that the worst has

been met and successfully repulsed. Dr. Walser, however, fears the effects of the heavy early morning rains and the extreme humidity on the health of those confined on the ships and islands in the lower bay, and while it does not neces-sarily mean an increase of cholers cases, it is favorable to the propagation of cholera germs and may result in the more ordinary sickness due to confine-

ment in crowded quarters. The Pegasus, with the men of the 69th Regiment and the Naval Reserve aboard, returned to her dock shortly before noon, after's night's battle with a heavy sea and utheast storm.

Much anxiety was felt throughout the night and morning when no news was re-ceived of the arrival of the boat at Fira Island. It was very rough on the ocean, and some fears were had that the boat might have met with an accident.

The steamship companies of this city are now paying a heavy penalty for their correlessness with their storrage passengers, as may be seen from the fact that the North German Lloyd steamship Spree left this port yesterday for liremen with only ten first cabin and twenty-five second cabin passengers. She carried no take passongers.

The Hamburg-American liner Columbia will sail for Southampton to day without a single passenger, cabin or steerage, and also without a single ounce of freight,

BULLETIN OF THE PHYSICIANS

The Tappings to Withdraw the Watery Substance in the Lung Cavity Attended With Great Danger-Russell Harrison and Mrs. MoKee at the Redside-A Slight of Union Improvement This Morning.

LOON LANE HOUSE, N. Y., Sep. 15. The anxiety of the President and his fam ily over the critical condition of Mrs. Harrison is intense, and they make no attempt to conceal their great alarm at the situation. The physicians advise them to hope for the best, but offer no real encouragament. They have, so it is said, quietly intimated to the President the strong probability of a fatal result.

The President is a most faithful com-panion, and rarely leaves Mrs. Harrison's In fact, he really shares the bedaids. nursing of the invalid with a professional attendant.

Russell Harrison and Mrs. McKee, the President's son and daughter, are also in constant attendance. The former was summoned from New York as soon as the ise took a dangerous turn.

Dr. Gardner made a careful examina-tion of Mrs. Harrison late last night. He found that the accumulation of the watfound that the accumulation of the wat-ery substance in the lung cavity was not sufficient to justify another operation for its withdrawal. "These tappings," Dr. Gardner said, "are attended with great danger on account of the weak condition of Mrs. Harrison, and each time a punc-ture is made she suffers from the shock." Her respiration this morning is less labored and she is able to take small quantities of liquid nourishment at intervals.

The great danger lies in the watery accumulation and constant watchfulness on the part of the doctors is required to pre-vent it from bringing about a fatal termination. The accumulation has a ten-dency to smother the patient by filling the air valves, and it also brings abnor

mal pressure to bear on the heart. The first operation of tapping was per-formed Sunday, and the second 24 hours Inter

Asked That II he Taken from Costudy of the Clerk of the Court.

Bosron, Sep. 15 .- Senator William E. Chandler, Chairman of the Senate Bank Investigating Committee, has written to Thomas P. Beale, Receiver of the Maverick National Bank, formally asking him to apply at once to the court for a revocation of its order placing President Asa P. Potter's trunk in the keeping of the clerk of the court.

Testimony is cited in proof that a written engagement was entered into between Mr. Potter and his counsel by which Mr. Beale and Mr. Hutchins are to have at all times access to all the papers in the trunk. The committee do not understand that any agreement made in behalf of the United States by which the receiver and his counsel may examine this trunk and its contents while the Comptroller of the Currency and a committee of Congress are excluded there-

from. The Senator, therefore, asks Mr. Beale to the trunk, and and several to procure access to the trunk, and understand allow an inspection of its contents by the committee.
