### VETERANS AT WASHINGTON.

Very Low Fares via Reading Railroad System.

The 26th National Encampment of the Grand Army of the Republic, at Washington, D. C., will undoubtedly witness a greater gathering of the Union soldiers of the civil war than any that has taken place since the grand review of the returning hosts in the capital at the close of the rebellion. It will be an occasion of intense interest, and to facilitate the attendance of the great numbers who will desire to go, the Reading Railroad, in conjunction with the B. & O. R. R., will sell Special Excursion Tickets at the low price of \$4.00 for the round trip, from all stations south of and including Shamokin. From Su bury the rate will be \$5.12, Lewisburg, \$5.70; Milton, \$5.72; Danville, \$5.71; Muncy, \$6.17, and Williamsport, \$6.54, with proportionate reductions from the intermediate stations.

These tickets will be on sale at Reading Railroad ticket offices from September 13 to 20th, and will be good to return until October 10th, 1892, inclusive. Not only G. A. R. men, but the general public, as well, may take advantage of this very liberal arrangement to witness the immense procession of the veteran soldiers and see the many interesting sights of Washington.

The Pennsylvania Railroad Company will sell excursion tickets from all stations on its lines to Washington, from September 13th to 20th, valid for return until October 10th, inclusive, at a rate of a single fare for the round trip. These tickets will be valid to stop off at Baltimore and Philadelphia in each direction within limit. A stop-over privilege will also be allowed at Harrisburg and other points south of Washington on foreign roads' issue of tickets from the West.

### THE NOTE BOOK.

Some of the Topics That People are Talking About To-day.

"There will be no strike," says President McLeod, of the Philadelphia & Reading Railroad Company. Everything has been satisfactorily arranged. We are glad of it, so are the railroaders and the business men. Nothing demoralizes a community more than a strike and it takes years after before everything is working in the right channels. Again, we repeat, we are glad the impending strike is over and no bad feeling exists.

Even the Democratic free trade pro does not object to taxing the people of the United States to keep the foreign cholera out of our cities and towns. They know if it gains a footing in our cities that it is sure to move inland and spread death in its course. If the money we spend to keep out this dread scourge or keep it down does its work, then it will have been well expended, and the mere cost will have been swallowed up in gain and victory. On the other hand, if it costs something to protect ourselves against foreign goods and protection does its work well, then the great gain is ours. The cholera brings death and free trade brings poverty, which is worse than death. Let free traders expend themselves in pointing out the cost of protective measures, but let the people go on reaping the benefits. While free traders are figuring up the cost of the measure let us go on reaping the harvest.

Rev. John Grubler, of town, is never happy unless he can offer his snuff box to a friend to take a "pinch." We have often accepted of Rev. Grubler's generosity and have sneezed frequently. It is a surprising fact to many that twenty years ago 4,000,000 pounds of snuff per annum were consumed in this country. Much more astonishing is the circumstance that during the fiscal year ended July 1, 1892, 10,000,000 pounds of snuff was used in the United States. You how rarely it is that one sees a pinch of snuff taken! The mystery was explained to a Washington correspondent by the agent of a great snuff manufacturing firm who said: "Nearly all Italian and German music teachers use snuff. Like-wise the Roman Catholic clergy. The priests say that they got into the habit during long sessions in the confessional, where they must sit for hours together and take snuff in order to occupy themselves and keep awake, avoiding sneezing." The snuff that is chiefly used and manufactured in this country is of the yellow or brown kind. Some of it is salted and some plain, but very little of it is scented. It is used to an immense extent in the South by negroes and poor whites for "dipping."

The snuff dipper moistens a little stick in water or alcohol, dips it in the snuff, makes a little ball and puts it between the lips and teeth. The habit is an unpleasant one, but it is practiced in the South by women as commonly as by men. In fact the consumption of snuff in this country is chiefly by dipping, and the bulk of the tobacco manufactured in this shape is consumed below Mason and Dixon's line.

Speaking of Rev. Grubler reminds us that he is one of the best posted clergymen on the geography and condition of Palestine and the Holy Land. He lived there for years before coming to Shenandoah and is well acquainted with the people, their habits, &c. He is a splendid conversationalist and has an interesting fund of information. He is at your service at all times and willing to contribute to your enjoyment if you are interested in Bible history, &c.

It seems to be the policy of some physicians, steamship agents, and others who happen to be interloped on the cholera question, to make light of it. This is hardly justified in the face of the facts, and of the history of the past. The cholera plague always starts in India. They have it there all the time, but not always epidemic. After lying almost dormant for a few years, apparently gaining in viridity all the time, the germs start on a tour of the globe. Neither wind nor rain, heat nor cold, nor change of climate has proven a perfect barrier to its progress.

Don't buy the fast-rising unguents to your souls than the frosts of October or the snows of November will stop it. One of the worst scourges broke out in London in January, and in Russia it has been as virulent in winter as in summer. There is a difference, however, in favor of the cooler, or cold seasons, because the weather is no debilitating. The great scourge of '32 was preceded by an unusually hot, dry spell, and the summer of '63 was noted for dryness, as well as heat.

The disease is just as virulent in winter as in summer, but we are in better condition to resist the attacks after the frosts come and the sun is no longer in a melting mood. PENCIL POINT.
