It is prescribed The voters of our borough went to the palls yesterday and decided whether we should and recommended the world over, by the medical profession, as the best medicine produced for the cure of all diseases have city or syndicate water in the future. The advocates of both ideas have been airing their opinions pretty freely in the matter, with the balance of opinion, slightly in favor of Syndicate, or, Old Water Company Water. Those who thought the borough should distribute the precious liquid have been loud in their claims of the beauties of a pumping system that would give a never falling supply of water, similar to the one now in operation at Shenandoah? a system that would eventually (in a century or two) pay for itself and afterwards be a standard means of income and keep the treasury in a burnting state for all time. These people have been pretty numerous and make their wild assertions by the same course of reasoning that some of your people have been guilty of, Practical people here who have gone over the as in territory of the proposed new plant are satisfied that instead of one pumping station two will be necessary to perform the work re- from nouquired, which would almost double the estimated cost of the new works. Now the friends of the old Water Company say there is plenty of water being furnished and that the Company will be able, when contemplated improvements are made, to supply a town of ambition. twice the population of Mahanoy City, and his that searcity of water in the future will be a thing unknown.
