Revolution In Eating

has been brought about by the introduction of COTTOLENE, the new yegetable shortening. The discovery of this product, and the demonstration of its remarkable qualities, has attracted the widest interest. Hitherto the common shortening has been lard, or indifferent butter. Every one has probably suffered occasional discomfort from land-cooked food: while it is well known that thousands are obliged to abstain entirely from everything of that kind. To such people, COTTOLENE is of peculiar value, widening as it does, the range of what may be eaten and enjoyed. COTTOLENE is a cooking maryel. It combines with the food-imparts to it a tempting color, a delicate flavor, and an appetizing crispness. No trace of greasiness remains. to offend the taste, or disturb the digestion.

COTTOLENE is worthy of the careful notice of all those who value good food, of itself or for its hygienic properties.
