Thousands of Cat Fish.
There is a curious sight at the Wm. Penn dam and many people of town have made special trips to see it. The surface is covered with the dead bodies of thousands of catfish, many of which are seven inches and more in length. In one of the outlets a gentleman of town who visited the dam on Sunday counted five hundred as five specimens as many fishermen ever caught on the hook. How so many of them died at one time seems to be a mystery to some, but it is explained that the water, which is not very deep, was frozen to the bottom of the dam during the winter. Arrangements are being made to have the fish removed.
It has been proven by living witnesses that Pottsville is a remarkable specific for the cure of the difficult and dangerous throat and lung troubles—its equal can't be found. Write to our office. Pottsville is sold at P. P. D. Kirtin's drug store.
Electric Flashes.
The new electric railway of Reading guarantees a dividend of 8 per cent, the first year; 9 per cent, the second; 10 per cent, for each year for the next five years, and thereafter 12 per cent, each year.
Within a year the Schuylkill Traction Company will pay no less than 8 per cent, judging from the amount of business it is doing over present lines.
The open cars used on the electric road, which were quite favorites last summer, are being prepared for the summer traffic.

OBSE'S OBSERVATIONS.

What He Sees and Hears During His Travels.
It is gratifying to see that some people are heeding the "clean up" warnings and hauling away the ashes and other rubbish that has accumulated on their premises during the past winter. It wouldn't be a bad idea if these people would go a step farther by thoroughly disinfecting the refuse bins after they empty them. In a letter issued last week a eminent German medical authority stated that the people in America will have hit one method by which they can ward off the cholera next summer and that is by a perfect sanitary system.
I detest a liar, especially a newspaper liar, and more particularly an "affidavit liar." The latter class is beyond redemption. In the course of time he will believe his own affidavit, and eventually come to the conclusion that his readers think his "sworn statement" is gospel truth. In the latter state he is a detriment to any community in which he may be allowed to breathe, thus polluting the very air upon which he exists.
The "affidavit liar" must go, and the sooner the better for conscientious newspaper men.
A gentleman of town is working upon a secret process by which he says he will in time revolutionize the present system of preparing coal at the breakers for market. He claims that with his process he can take all coal down to egg size as it is mined and with out the aid of slate pickers or jigs can dump it into the cars cleaner than any colliery in the region is now sending its coal to market.
A number of people have called at the HERALD office during the past few days and asked if there are any empty houses in town. It is suggested that it would be a good idea for landlords who have vacant houses to advertise them. The cost would be trifling and several of the applicants have stated that they would willingly pay a small advertising bill if they could secure a house without being put to the inconvenience of searching the town. This system would also lead the paper to keep a record of all empty houses and applicants for them, and thus all hands would be benefited.

AN EXCITING TIME.
Constables Tosh and Phillips Make a Fight for a Prisoner.
Some time ago Joe Pachulla, a Pole, was arrested and John Balcis secured his release by furnishing bail for trial. Yesterday Balcis learned that Pachulla was about to "skip" and he notified Justice Shoemaker that he wished to surrender the bail. As it was necessary to procure a bail piece at Pottsville and as Balcis feared the man would disappear pending the arrival of the writ the Justice issued a warrant for Pachulla's arrest.
When Phillips and Tosh went to execute the warrant they found Pachulla, his wife and a male friend in fighting condition. The trio gave defiance and when the officers made a grab for Pachulla a fight was started. Tosh's star was torn from his vest, and Phillips had his face scratched in several places, but the officers succeeded in taking their man and putting him in the lockup. While going along Centre street an immense crowd was attracted by Mrs. Pachulla's conduct. She made threats of all kinds against Tosh and struck him once across the chest with a piece of board. While in the Justice's office the woman made repeated attempts to strike Tosh and when "Squire Shoemaker" intervened she threatened to whip him, too. Notwithstanding her conduct the woman was not prosecuted.
Clean Up Your Premises.
Every information of life received points to breaking out of the cholera pest in Europe on the return of warmer weather, and once the general outbreak occurs there it will not be long before it crosses the Atlantic through the agency of the myriad of passenger ships that ply its waters. All experience proves that sanitary conditions prove futile in keeping out epidemics as violent as the cholera, hence the only way to act is to use every precaution against its introduction so that if it does make its appearance we will be prepared to curtail its ravages through proper sanitary preparations. Clean up your premises.
Coughing Leads to Consumption.
Kemp's Balsam will stop the cough at once.
