"Tarm Rassian approximation, one they have repeate fly done, have been withholding information as to the rawages of the cholers in that country, and with thousand results. The plague mas been spreading until it has invaded a large portion of the empireand is rapidly approaching the western borders, threatening adjacent countries in that direction. However inexcusable such neglect of duty may be, it only serves to emphasize the Importance of more strict watchluiness on the part of our own authorities. There is a large distance between the United States and Russia, where the cholera prevails so extensively to day but it requires little time for the pestilence to overcome that distance and assert itself here unless such measures are resorted to as will keep it at respectful distance.

I was afflicted with Inflammatoty Rheumarestanting, as there was nothing going on tism for 15 years, so severe that I was supposed to be crippled for life. I doctored
