LOCAL BOARD OF HEALTH.

The Bill Which Will Soon Become a Law in this State.
Scarcely a space would not allow the Herald to give the public the full benefit of the bill on Boards of Health which Councilman Finney caused to be read in the Borough Council on Thursday evening and this opportunity is taken to give it publication, which is important in view of the fact that after the reading Council decided to take preliminary steps for carrying out the provisions of the bill when it becomes a law. As previously reported, the bill will undoubtedly be passed and signed within a few days.

The bill is intended to enable Borough Councils to establish Boards of Health. It provides that it shall be the duty of the president of the Town Council of every borough in this Commonwealth within six months after the passage of this act to nominate and by and with the consent of the Council to appoint a Board of Health of such borough to consist of five persons not members of the Council, one of whom shall be a reputable physician of not less than two years standing in the practice of his profession. At the first appointment the president of the Town Council shall designate one of the members to serve for one year, one to serve for two years, one for three years, one for four and one for five; and thereafter one member of the board shall be appointed annually to serve for five years. The board shall be appointed in districts to be fixed by the Town Council representing as equally as may be all portions of the borough. The members shall serve without compensation.

The duties, responsibilities, powers and prerogatives of said board shall be identical with those assigned to Boards of Health of cities of the third class.
The members of the board shall severally take and subscribe the oath prescribed for borough officers and shall annually organize by the choice of one of their number as president. They shall elect a secretary not of their body who shall keep the minutes of their proceedings and perform such other duties as may be directed by the board and a health officer who shall execute the orders of the board and for that purpose the said health officer who shall have and exercise the powers and authority of a policeman of the borough. All fees which shall be collected or received by the board or by any officer thereof in his official capacity shall be paid over into the borough treasury monthly together with all penalties which shall be recovered for the violation of any regulation of the board. The president and secretary shall have full power to administer oaths or affirmations in any proceedings or investigations touching the regulations of the board, but shall not be entitled to receive any fee therefor.

The Board of Health shall have power and it shall be their duty to make and enforce all needful rules and regulations to prevent the introduction and spread of infectious or contagious diseases by the regulation of intercourse with infected places, by the arrest, separation and treatment of infected persons and persons who shall have been exposed to any infectious or contagious disease, and by abating and removing all nuisances which they shall deem prejudicial to the public health; to enforce vaccination, to mark infected houses or places, to prescribe rules for the construction and maintenance of house drains, waste pipes, soil pipes and cess pools, and to make all such other regulations as they shall deem necessary for the preservation of the public health. They shall also have power, with the consent of Council, in case of the prevalence of any contagious or infectious disease within the borough to establish one or more hospitals and to make provisions and regulations for the management of the same. The board may in such cases appoint as many ward or district physicians and other sanitary agents as they may deem necessary whose salaries shall be fixed by the board before their appointment. It shall be the duty of all physicians practicing within the borough to report to the secretary of the Board of Health the names and residences of all persons coming under their professional care afflicted with such contagious or infectious diseases in the manner directed by the board.

The said Board of Health shall have power as a body or by committee, as well as the health officer, together with his subordinates, assistants and workmen under and by order of the said board to enter at any time upon any premises in the borough upon which there is suspected to be any infectious or contagious disease or nuisance detrimental to the public health for the purpose of examining and abating the same and all written orders for the removal of nuisances issued to said health officer by order of said board attested by the secretary shall be executed by him and his subordinates and workmen and the costs and expenses thereof shall be recoverable from the owner or owners of the premises from which the nuisance shall be removed or from any person or persons causing or maintaining the same in the same manner as debts of like amount are now by law collected.

The Board of Health shall have power to create and maintain a complete and accurate system of the registration of all marriages, births and deaths which may occur within the borough and to compel obedience to the same upon the part of all physicians and other medical practitioners, clergymen, magistrates, undertakers, sextons and all other persons from whom information for such purposes may properly be required. The board shall make and cause to be published all necessary rules and regulations for carrying into effect the powers and functions with which they are hereby invested which rules and regulations when approved by the president of the Council shall have the force of ordinances of the borough and all penalties for the violation thereof as well as expenses necessarily incurred in carrying the same into effect shall be recoverable for the same in the same manner as penalties for the violation of borough ordinances, subject to the like limitation as to the amount thereof.

The remaining two sections refer to routine work of the board in connection with its relations to the Borough Council and the

And So It Goes!

When Sewing Machines are mentioned the name of the **STANDARD** rises instinctively to the lips. Why? Because it will sew as much in four hours as others do in five.

Because it is a labor-saver, and makes less noise than any machine on the market.

Pay no attention to the disparaging talk of our competitors, as that only proves that it is their most dangerous rival.

OB'S OBSERVATIONS.

What He Sees and Hears During His Travels.

Some people of town were inclined to criticize the authorities yesterday because no clue had been secured to the party who murdered the new born babe whose body was found in a cess pool on West Lloyd street. People outside the official circles can always find some excuse for complaint because they feel they could always do thus and so if they had the power. In this case there was not the slightest clue—that is anything upon which an arrest can be founded. But let that be as it may, there is very little encouragement for the authorities to enter into the active prosecution of such cases, horrible as the circumstance may seem. Let our people look back for a space of four or five years and they will find that during that period three cases of the same character were pushed vigorously to trial, and what was the result? The body of a baby was found in an outhouse in the southern part of town. The mother was acquitted on the ground of temporary aberration of the mind. Another girl smothered her new born child by placing it between the mattresses of her bed. This girl was acquitted on the same ground and a collection was raised in the court room for her. In the third case the child was found in the bushes near Columbia Park. A piece of rag about the throat showed the child had been strangled. The mother was located and arrested, but she, too, was acquitted on the same ground upon the others esped. It is not reasonable to suppose that the prosecution of such cases is a waste of time and labor and puts an unnecessary expense upon the county? The sympathies of juries seem to have changed the complexion of infanticide.

Grand Display of FINE DRESS GOODS

DRESS GOODS is such a bewildering topic that we will not attempt a full description, but give a partial outline, which you can fill in by a personal inspection. There are the plain and changeable diagonals; plain, plaid, striped and invisible plaid serges; fancy mixtures in all sorts of odd weaves, dots, threads, cross-threads, hair-lines, lines here and there, many at a glance appearing alike, but upon examination are found entirely different. Our assortment of silks is complete—china silks, china surah, plain surah, bengaline, plain, figured and changeable silks, in all the new shot effects. Full line of fancy braids to match any color of dress goods.

.....In Wraps

We find the most stylish and the prevailing mode to be the Cape, in some of its variations, single, double or triple capes. Some are plain, others very highly decorated, with fancy indolent braid, butterfly colors, or some full arrangement at the neck, so much approved this season by the feminine fancy. To some, coats only are the correct garment. To those we would say coats are equally fashionable and stylish, many of these having capes also attached—sometimes one, two or three, as the taste or inclination of the wearer may desire.

We have this season, for the first time, added a Millinery Department, and have spared neither trouble nor expense to make it a success. The result exceeds our most sanguine expectations. This department will be under the same management and conducted on the same principles that have always characterized our entire business. We shall keep everything in trimmed and untrimmed hats, novelties of every description. Having secured a trimmer noted for her artistic and skillful work, we are enabled to suit all tastes. We invite a careful inspection of our entire store. All welcome.
