OBE'S OBSERVATIONS.

What He Sees and Hears During his Travels.

Fifteen men and eight dogs circled about a rup containing two large rats on East Centro street yesterday and notwithstanding the recautions of the army one of the redents onde its encape.

The street paving work is progressing at a andl's pace and threatens to become an all summer affair. This is not due to slowness on the part of the contractors, but to stoppages of the work on account of a difference of opinion between the contractors and property owners as to the kind of foundaion the paving should have, and also to a discitisfaction about the grade of the street. it is quite likely that all differences will be sottled to-morrow night, when the Borough Council will hold its regular meeting.

During the past tan days over seventy immigrants have been added to the population of the town. Fortunately most of the arrivals are of the exceptional class. The men are well clothed and, their faces appear quite intelligent. They exuld find many better places to locate in than Shoundouli, for we have more than enough people to work all the collicties on full time.

The suspension of the Shemandesh City and West Shenandosh collicres has put a damper on the life of the town. It is hoped there is foundation for the report that the two collieries will remain title but a short time. Poline Ridge collicry will in all grabability resume operation on the 15th Inst.
