MANY MORE BANKS LIKELY TO FAIL

The Columbia's Collapse Reveals Bad Methods of Banking.

CHICAGO, May 18 .- The failure of the Columbia National bank has disclosed a system of shystering without a parallel in American banking. The president and manager of the Columbia is known to have organized about fifty some concerns at insignificant points in Indiana and Ohio, all of which were correspondents of the broken bank, and it is scarcely likely that any of them will survive. But as the places are at places where there is little business, the

moral effect is likely to be more serious than the actual losses.

The Columbia had very little business in Chicago, and such as it had was chicily with customers who, like the bank, were without commercial standing hence the fullure was not felt in reputable business circles, and had it occurred at any other time would have been forgotten in half an

At present, however, there is a very ner-vous feeling, and a triffing failure had an adverse influence by increasing distrust where there is no occasion for it. This is duly appreciated by the strong banks, and they will do all they can to restore econd-

Advices Slearagua in this city. Gherardo Canton, said host evening that he had no other advices from Nicaragua than those published in the papers. He did not think that Mr. memon, the Niearaguan minister, had ny private advices, because the cables are in the hands of the revolutionists. "H," said he, "Doctor Tuuman made those renarks about American expitalists, which

are accredited to him, I have no doubt they refer to the canal company, for there are no other equally important enterprises in Nicaragna backed by American money. The few railroads and steamship com-panies that have obtained concessions in Sicaragus are still in a preparatory stage and therefore scarcely count. I do not be-lieve however, that the Canal Company has really caused any trouble for they have never shown any tendency in that direc-

tion. They have the sympathy of the whole people in their enterprise."

Mr. Canton thought mob violence against the Americans very impropable, because the latter were better liked by the Nicaraguans than any other nationality. The revolutionists, he said, had no need of ap-plying to the Americans for pecuniary aid. He said that the revolutionists had all the money and arms they needed, whereas the government was financially crippled.
