Suppose Christ were to come again in the flesh and repeat His teachings, how would the modern New Yorker receive Him? This is the question answered in the New York Recorder by several prominent clergymen of that city. The Rev. Charles H. Parkhurst replied to the inquiry: "Just as the Jews did." He explained that while He would not be crucified, He would be gotten rid of in some way, because there was no more fellowship between righteousness and unrighteousness to-day than there was when St. Paul wrote. The Rev. F. DeCosta said: "Multitudes of His pretended disciples would rise up and cry Crank! Lunatic! Anarchist! Away with Him! The stock gamblers now established in the best pew would feel His scourge, and the philanthropists who are stealing at wholesale to give at retail would also hate Him." The Rev. E. E. Eason judged that He would be received by an exceedingly small minority. The Rev. C. H. Eaton held that human nature was the same now as in the first century, but that Christ would escape crucifixion not only by reason of the growth of Christian ideas, but because of civilization. The Rev. Robert Collyer simply remarked: "He would have a very hard time." The Rev. Joabum Elmendorf opined that some would receive Him with joy and others would raise the cry to crucify Him. To the same effect was the reply of the Rev. Dr. Robert McArthur, who added: "To thousands upon thousands in all our cities the announcement that Christ had come would be the most joyous sound. He would certainly be received with fuller sympathy, with greater respect and find a much larger following than before." The Rev. Rabbit, Mendes, replied: "Sorrow, chagrin and disappointment would surely be His lot. In those parts of Christendom which persecute Jews He would be ridiculed. The warring Christian sects would perplex Him. The synod of the Presbyterian church would probably condemn His views on infant damnation, and as a Jew His very presence would be objected to in the Union League Club and many other places."

THE RECORD IS BROKEN The Cruiser, New York, Wins Money and Fame. HER TRIAL TRIP A GREAT SUCCESS. The Great War Ship Ploughs Through the Water at the Rate of 21.69 Knots an Hour—Her Wonderful Performance Off the Massachusetts Coast One That Will Astonish the World. Boston, May 23.—With forward torpedo tubes buried deep in the sea and the water pushed almost as high as her foremast, the armored cruiser New York stemmed across the line yesterday, breaking the world's record and winning for her builders the largest premium ever paid in any country. When twenty-one knots was predicted as the speed of the new cruiser many hoped, but few believed that her engines would be able to drive such an immense mass of steel through the water at this rate. When she crossed the line, however, with a speed of 21.69 knots through the water and some corrections to be added, the enthusiasm on board was intense. Yesterday's performance off the Massachusetts coast will be echoed from one end of Europe to the other, for it places the United States in the van among the navies of the world and gives us not only the most powerful, but the swiftest armored cruising vessel. There has been great enthusiasm in England over the performance of the cruisers Blake and Blenheim, some claiming that the latter has attained a speed of twenty-two knots.

Would you rather buy lamp-chimneys, one a week the year round, or one that lasts till some accident breaks it? Common glass may break or not the minute you light your lamp; if not, the first draft may break it; if not, it may break from a mere whim. Tough glass chimneys, Macbeth's "Pearl-top" or "Pearl-glass," almost never break from heat, not one in a hundred. Where can you get it? and what does it cost? Your dealer knows where and how much. It costs more than common glass; and may be, he thinks tough glass isn't good for his business.
