THIRD EDITION

TO MEET A DEMAND.

A Good and Cheap Weakly Newspape The publishers of the WEEKLY HEBALD have decided to greatly increase its circulation this year and for that reason have made many changes in its general appearance and make up and have reduced the subscription rate from \$1.50 to \$1 per year. It will be sold at 3 cents per copy and will be one of

the best weeklies in the interior of the state. The columns will be filled with the latest and best news and articles of all kinds, including local and foreign affairs, but nothing objectionable to the fireside circle will be allowed space. Special attention will be given to the sporting department and efforts will be made to furnish only the latest and most reliable news of the sporting world. First class serials by eminent writers will be published in each number. The opening chapters of "Robert Balfour" will be published next Saturday, Hooks & Brown, booksellers and stationers, 4 North Main street, are the sole agents for the WHEELY HERALD.

USE DANA'S SARSAPARILLA, CO "THE KIND THAT CURES.

Delayed Issue.

The scarcity of water in town yesterday caused by the break in the main supply pipe inconvenienced many, but none more than the HERALD. It was after five g'clock before a supply could be secured to operate the presses and consequently it was very late before the paper was issued. This explanation we think is due our subscribers.

MILWAUKEE BANK FAILS. The Crash the Besult of a Furniture Com-

pany's Fallure. MILWAUEEE, June 2 -The Plankinton bank which failed yesterday has made an esignment, the court appointing William Plankinton assignee. His bond was fixed at \$1,600,000, which was immediately urnished. The suretles are Congressman John Mitchell, David Fergmoon, vice president of the Wisconsin Fire and Marine Insurance bank, and Charles Ray. president of the National Exchange bank. The bank opened as usual at 10 o'clock

and did very little business. At five minutes after 10 o'clock William Plankin-ton, the vice president, appeared on the scene and smost simultaneously the notice of suspension was posted up.

There has been no regular run on the bank of late. Since the scare of two weeks ago, however, the large depositors who did not take part in the run that oc-surred at that time, had been steadily withdrawing their accounts from the Plankinton and transferring them to other

The suspension is largely due to the failure of F. A. Lappen & Co., and the Lappen Furniture Company two weeks ago, with liabilities that will probably amount to three fourths of a million, when the worst is known. The Plankinton bank was the pet project of the late Laby Plankington the millionairy work. John Plankinton, the millionairs perk packer and hotel owner who died two years ago. It was organized in 1887 and Mr. Plankinton was its first president. The capital stock was \$200,000. On the death of Mr. Plankinton, F. T. Day, who was then vice president became president and a son of the dead millionaire assumed

the office of vice president.
At the time of the heavy run on the bank, three weeks ago, it was said that Phil Armour, the Chicago packer, was in-terested in the Plankinton bank, and with great show a huge safe was sent from Chi-cago, accompanied by an armed guard, and was escorted to the bank by a dozen olicemen carrying drawn revolvers. It was then said that Mr. Armour had sent \$600,000 in gold to the assistance of

the bank. Mr. Armour denied the story, but the move restored confidence and snded the run. The heavy depositors, however, were not deceived, and for two weeks they have been guardedly withfrawing their funds.

The condition of the bank at the hour of

the suspension cannot be learned. It is believed that the showing will not be a satisfactory one. William Plankinton. actisfactory one. William Plankiston, vice-president, said he could not tell how the bank stood or what would be done Among bankers and business men the opinion prevails that Mr. Plankinton will personally see that all claims are paid, in order to clear his father's connection with

Seeing Stars In Daytime. I once saked this question of a well I once asked this question of a well known editor, expecting a logical answer in the "Notes and Quertas" column of his paper. Query, "Is it a fact that one can see stars in broad daylight if he descends into a well or deep mining shaft 10s feet deep or more, and then looks out at the opening above?" In due time the answer came as follows: "Stars can be seen in the daytime from the bottom of a well or shaft. The long dark tube shuts out all rays of sunlight, and the eye, accustomed to the gloom, sees stars which would be into the gloom, sees stars which would be in-distinguishable by broad daylight." That answer never satisfied my curio by, and I

again in regard to the matter. I have two reasons for being disestisfied with the answer as it stands—our old "Philosophies" taught us that the reason we cannot see stars in daytime is because the rays of the sun are so strong or powerful that shey college the feeble light given y'ne by the stars. If this is the case, why hould the simple act of having one's self that a well lessen the power of smilight, frangthen the power of starlight or make human vision more penetrative? Secondly, the writer of this is an amateur geologist has been in mining shafts on hundreds of

am not sure but that I wrote the editor

occasions, in those varying in depth from 30 to 700 feet, and has never yet seen a star upon looking out upon the vaulted canopy above, naless it was startime. This "seeing stars in daytime" is a favorite with would be smart Alaxa, but I want to register my opinion that no man ever

saw a star upon looking out of a well or shaft unless he chose nighttime for mak-ing his observations.—St. Louis Republic.

AT THE "WHITE CITY."

Poller of Retrenchment to be Inaugur

sted in All Departments. WORLD'S FAIR GROUNDS, CHICAGO, June 2.—Owing to the unexpectedly small attendance during the first month of the Fair, the trensury of the Fair is pressed for ready money. The banks, which are represented in the local corporation, stand ready, however, to advance it. But money is owing to contractors and employes, and the former find much difficulty in getting quick and full payment of their claims.

Treasurer Seeberger is surrounded in his office at the grounds and in the city every day by contractors or their agents who need the money due them for work done on buildings, etc. He is compelled to resort to all kinds of dignified excuses for putting them off, but some have been waiting two months after their contracts have been completed and their vouchers

passed.

There will be a severe policy of retrenchment in all the departments of the Fair beginning next mouth. The discharge of 2,000 amployes is contemplated, the discribution of passes is to be kept within the narrowest limits possible, and even Major Handy, who deals with the press representatives of the world, is now preparing under orders a detailed statement of passes given, with a view to a heavy

eduction of the list.
The directors are heavily interested in the financial success of the Exposition, and they can be relied on to do all in their power to reduce expeditures and increase receipts, in spite of public opinion or insi-vidual interests. Before the opening the enthusiasts connected with the Fair talked about an average daily attendance of 100,000, but that number has only been reached twice—on the opening day and Memorial Day. Special fete days and single fare excursions from different points will swell the crowds for the next five months, but the European patronage

is not being relief on to any great extent in figuring up the prospective receipts. An official concomments will soon be sent through the country by the commis-sioners that the Fair is in shape, and that it is a good time to see it at once. It is intended to counteract the charges of incompleteness and extertion.

The document is a long affair, explain-ing the immense scope of the Exposition and its advantages from an educational standpoint. It will recite that there is enough to busy the mind of a studious man for many months. It advises no one to say away, since the occasion is the grandest of any age in any country. There are no excessive prices for essential things it declares, and it is time that reliculous

stories should be branded as untrue.

The second excursion party to the Fall from Berlin arrived yesterday. Among those in the party were the Count and Countses Prell, Herr Brandt, director of the famous Pilsner Brewery, and M. Hermes, of the Imperial Printing Com-

The Electricity Building will be formally The Electricity Building will be formally opened to the public to-night. The building has been open to the public since the opening of the Fair, but the exhibitors have been slow in getting their wares in position. At 7:30 o'clock the machinery will be put in motion and the 60,000 are reconficient and accept hames will be scent and search lamps will be

The feature of the building is the electric The feature of the outlang is the electric shaft at the center of the structure. It is eighty-five feet in height and arranged about it in every conceivable manner are 20,000 incandescent lamps. It is surmounted by a large prismatic globe which will east a flood of light throughout the entire building.

TRAINS LEFT IN THE FLOOD. The Elver Near Arkansas City threaten-Ing Again.

AREARBAS CITY, June 2.—The river has fallen one-tenth during the past twenty-four hours. The gauge this morning shows 49.15. The backwater is still rising at the rate of four inches in twenty-four hours, and it is now 2.2 feet of the highest point reached by the backwater of 1890, and within five feet of the highest point reached

by the backwater of last year.
It is over the Missouri Pacific tracks, est this side of Rayou Macon, and is cutting the dump badly. The probability is that the company will lose several hundred feet of the dump at that point. It is over the track at another place between Trippe and Bayou Macon, but is not cutting the dump. Trains between Trippe and McGhee were abandoned yesterday on int of the high water just south of

MoGhee junction.

A private telegram from Varner yester. day afternoon reported that the water be-gen running out of the break on the Ar-kansas river. This is due to the rise that kansas river. This is due to the rise this coming down the Arkansas. To amount of damage that will be done by will depend altogether on the height to which the Arkansus goes. The rise that came down the Arkansus about four weeks

came down the Arkansas about four weeks
ago came out through the Auburn break
and destroyed the dam around Reedville,
Kearney, Fumas and Walnut Lake.
This water left the country, however,
two weeks ago, and the furmers have all
replanted, and these replanted farms are
now doing well. If the present rain continnes and the Arkansas goes to 23 feet at Little Bock, this territory is doomed

BICYCLE AND BOAT COMBINED.

The Odd Craft That Is to Be Seen on the Thames, England.

A queer combination of the triplet bicy-A queer continuation of the triplet bicycle and a racing shell recently made its appearance on the Thames, England. It is simply a boat with bicycle handle bars, saddles and pedals for three men who go through the motion of ruling a bicycle and turn paidle wheels which send their craft through the water at a very high rate of speed. Three athletes named Cooper, Bates and Atkinson ride the hydrocycle— as they term their novel craft—and they

THE HYDROCYCLE ng manner. They recently rode from Ox and to Putney, a distance of 101 miles and furlougs, in the fast time of 17 hours and

The best time over made by three scut) ers over the same route was 22 hours no 28 minutes, and the hydrocyclists cons mently lowered the record four hours. The n keeping their strange boat upright, al-hough they were seated some distance have the water. The flow of the stream sided them very little, and as they rought of the way at night and during th part of the way at hight and during the early morning they were not interfered with by river craft. Now that the hydro-cycle has proved itself to be such a swift craft, interesting races between English carsman may be looked for. Whether the hydrocycle will become popular on this side of the Atlantic remains to be seen.
