MONEY MARKET EASIER. The Worst of the Credit Panic

> Believed to be Over. A GLEAM OF HOPE FOR WALL STREET

The Prospects of the Repeal of the Sherman Law When Congress Meets, Said to Give a Great Deal of Strength to the Financial Situation-Less Currency Being Shipped Abroad.

NEW YORE, June 26 .- There is a grow ng assurance in the public mind that the Sherman law will be repealed as soon

as congress meets and the growth of of cod-liver oil with hypo-phosphites a rich fat-food in a subsidance of the credit panie at various interior centres and Wall street cures the most stubborn begins to see a rift here and there in cough when ordinary medi- the clouds which so long have hovered over that interesting locality. The increased export of wheat and the purchase of options on that cereal for foreign account, co-operating with the high rates of money here, has depressed the sterling xchanges to such a level that there is no pprehension of further exports and the proach of the season in which the precius metal ordinarily flows here from Eu-

ope encourages hopes of an influx at distant day. The engagement of \$500,000 last week to come from London was a special transaction, and oversauguine people who fancied that it was the beginning

of a sustained movement in this direction were sadly disappointed. However, it is positive that the efflux of the precious metal from this country is over, at any rate, and there is every indication that the flow of currency westward has culminated. During the past day or two shipments to the rabidle and western states have been very light, and Chicago has begun to accumulate credit balances again with the New York banks. The loss of cash shown in the epitomized bunk statement issued from the clearing house

represents for the most part of the with drawal of balances by San Francisco banks. some of the largest are represented here by rivate banking houses, and these were arced to rake and scrape together all the gold certificates they could lay hands upon for deposit at the sub-treasury for tele-graphic transfer to the Pacific coest. The certificates were also in demand for abip ment to San Francisco by express. As gold

coin is inconvenient to carry across the continent and is not accepted at the sub-treasury for transfer, it is virtually for the ment at a discount as compared with

s paper representatives. In the consequence of this whole move In the government's supply of the preci-ous metal has steadily increased, and talk about the amount of "free gold" in the treasury has ceased. The subsidence of this talk has had almost as much effect as the cessation of gold exports in the way of ilaying apprel
