The sheriff of Bardwell, Ky., has been notified, and it is provided to be the man, it is claimed another lynching is in prospect. To Have Fun With Bees. Just Try If This Story is Really Based on a Scientific Fact. It is a fact not generally known, says science, that if one holds his breath, bees and hornets can be handled with impunity. The skin becomes stinging proof, and by holding the insect by the feet and giving her full liberty of action you can see her drive her weapon against the impenetrable complex with a force that lifts her body at every stroke; but let the smallest quantity of air escape from the lungs and the sting will penetrate at once. I have never seen an exception to this in twenty-five years' observation.

Typical American Students. Two Colossal Statues on Exhibition in Boston.—The Dimensions of Each. Two interesting statues, the result of much hard work, were put on exhibition in Boston recently. One was that of a young man and the other that of a girl. They were designed to represent the American college student, not the ideal American student of either sex, but the actual typical student, the measurements used having been the average, or mean, of development of students from various parts of the country. The statues are described by the Rochester Post and Express as representing "fairly well built young persons, symmetrically developed, with a certain serious physical defects." The figures have an easy pose, standing firmly and gracefully. The faces, which were modeled after composite photographs made from the students from whom the measurements were taken, are handsome and thoughtful, with a marked air of refinement.

SHE HAD A FIGHTING PARTNER.

French Women Journalists Have Shown the Side Partners for Daring Purposes. A rather curious illustration is arising in Paris, that of dueling associates of lady journalists. Recently, says the London News, the lady known as Miss Severine, who was intimately connected as a friend, literary helper, and disciple of M. Jules Verne, contributed an article to the Journal at which a M. Massard, a socialist, took offense. He called on M. Xau, the editor, to ask for satisfaction. It being impossible to call Miss Severine on the matter was that, in virtue of a fiction adopted for the purpose of releasing M. Xau from all responsibility in such cases, Miss Severine was supposed to be the joint author with M. Labryere of all her articles. He had agreed to be answerable for all offense she might give.
