The EVENTNO HERALD has a larger circula tion in Shenandoah than any other paper pub tished. Books open to all,

Entered at the Postoffice, at Shenandoah, Pa for transmission through the malls as second-class mail matter.

THE impressional voter was importuned to vote for Cleveland and tariff reform last fall and share in the boom that would certainly follow. Instead of a boom, however, the voter's ballot proved a boomerang, and it has come back and hit him hard.

TWELVE leading representatives of iron and steel firms in Pittsburg unequivocally declare that tariff uncertainty is the cause of the dull times. Possibly the Democrats will have the Galveston to Chicago between May 16 and supreme gall to say that these men do not know what they are about. This, however, will not alter the fact.

ONE year ago all the Paterson, N. J., factories were humming with business. To-day the local papers state that more she was allowed to retain, and \$500 more was added for the four days cut off the than 8,000 people are idle in that city. The threat to destroy the protective policy has been made by a successful political party, and manufacturers are political party, and manufacturers are talk about her journey she said:
"When I left Galveston, I weighed 195 closing their mills. What will be the result of the fulfillment of that threat?

certainly do not deserve it. Farmers certainly do not deserve it. Farmers and others, frightened for fear of bank suspensions, have been withdrawing "There was no end of sport on the trip, their cash from savings institutions and I enjoyed it. I used to carry an umand national banks and keeping it at bad trestle bridge, and the umbrells acted home. This has been "nuts" for bur-over, so I just closed it and threw it as far glars and sneak thieves and our exinto the river as I could. I can walk any
kind of a trestle with a train shaking ichanges are filled with notices of robberies, where \$100 was taken from this about 18 inches to walk on, and that was on farm house and \$50 or \$150 from another farm house and \$50 or \$150 from another river. The trainmen yelled to me to lay with a reckless audacity which is astonishing. It will not take long for else, but I kept right on. The engineer told me if he ever died of heart failure it people to realize that the safest would be caused by my starting it.

"My first walking experience was from New Orleans to Chicago. My husband and savings is, after all in our banks.

THE survey for the inter-continental railway which is to connect North and a street car for a distance of six or seven South America is all finished. The engineers who finished that part of the Mrs. Rodney's husband accompanied ber gineers who finished that part of the survey from Mexico to Bolivia are in her and lost more weight than she did. Washington, completing the calculations of their work. The beginning of thetwentieth century will see this man nificent idea realized and North and South America joined by bands of iron as well as by bonds of amity and compensation of this city is always at olds in regard to religious questions, and yesterday a number of Mahammedans and merce and unity in form of government. If now our sister republics would only keep still and abstain from civil of the festivals commanded by the Koran, while the Hindoos were also taking part war long enough to let both the grass in celebrating a day set apart for religious observance. The consequence was that religious feeling was bligh on both sides, and it took but little to cause the men who were at first involved in the dispute to to the north.

DR. ROBERT D. WATKINS has inoculated himself with pure consumption
germs at the Loomis laboratory, in
New York. He proposes to show
that the bacillus of consumption is not
the cause of that disease, and that in the cause of that disease, and that in persons from whose blood a peculiar the authorities were compelled to call out condition is absent the consumption bacilus is absolutely innocuous. Dr. The rioting was generally in the business part of the city, and during its continuance traffic was entirely stopped. Many contagious, and that it can not be of the participants are now in the hos communicated by association with an The communicated by association with au The feeling between the two sects has infected subject, even if the healthy been repdered more bitter by the fighting. person is constantly kept in an atmos- another outbroad phere where the luvasion of the germs persistent, unless, indeed, there ex- are massed in the chief antive centers and is, in the blood a granular, irregular man to which he has given the name streets. MANY ho were under the impress ion that the are no modern improve ments in the cities of Slam were surprised to real that Bangkok has an electric railway q operation, It is three miles long a was put into successful operation the aid of American en that city by plant was put up by the Brise. The Company, of Cleveland, O. Electric about \$50,000, W. J. Davidso cost of been engineer in charge of the King ation. This is the first electric s. ear line in the extreme Orient. success is such that the receipts of the line have already increased 30 per cent. and the management contemplate building an extension. The vice consul general is of the opinion that if the American electrical companies were to send competent representatives to large cities of Asia they could secure a number of contracts similar to the with my back and free one that has been so satisfactorily exscuted by the Cleveland firm.

NERVE AND ENDURANCE.

How Mrs. Rodney Trumped From Galveston to the World's Fair,

The World's fair is developing a new crop of long distance pedestrians. From all sec-tions of the country men and women are walking thither, some on wagers, some for the notoriety that is to be gained, and some it is to be feured, because the saving of rail road fare is an object. Other odd means of getting there, are also in vegue—that is, means that seem odd in these days of capid transit. Bicycles, cows, horses and all sorts of vehicles are freely used for distances that a man gets tired thinking of. A whole family of six people is en route from one of the southern states in a wagen, and they expect to reach Chicago before the fair closes.

But the pedestrians attract the most atdate Mrs. Lucille Rodney has been most no ed. Mrs. Rodney made the trip from Gaiveston to Chicago between May 16 and July 27, losing 10 or 11 days by the way one on account of Illness and the rest because of bad weather. She is about \$6,000 richer because of her long tramp, which was undertaken to settle a wager of \$20,000 be-tween Chicago clubmen. The club agreed to give Mrs. Rodney \$5,000 if she covered the ground within 76 days and collected \$500 by the sale of photographs on the road. The \$500

specified time Mrs. Redney is a pleasant little woman about 23 years old and 5 feet 6 inches in

ABSOLUTELY PURE

CONVICTED BY MACHINERY.

The Emotions of a Murderer on Trial Reg istered by Electricity.

A remarkable case where science was called to the aid of justice in a criminal trial is thus recorded by an electrical jour-

The murder had been one of unwenter atrocity, and the prisoner appeared absolutely indifferent. In fact, it was impossible for the keepest eye to detect any change in life countenance or attitude di ing the examination of the witnesses whe gave the most damaging testimony against

gave the most damaging testimony spagest him. The prescuting atternay, however, noticed that he never once relaxed his hold on the arms of the chair in which he say, but seemed to support himself by the pressure which he brought to bear on them.

Knowing that under intense mental excitement, no matter how outwardly distant individual may be, the hands will involuntarily contract and relax according to the intensity of the emotion and the succeptibility of the person effected, the came set saw here a chance of securing evidence of great value.

He called an electrician to his aid, and during the absence of the prisoner from the courtroom the arms of the chair were spli in half, and in each was placed a hard on bon plate, which served as a variable re-sistance. Wires were run from metal place on either side of the carbon through the legs of the chair and under the floor to a telephone receiver and battery placed in an adjoining closet. The arms were again upholstered and the chair replaced.

Every increase in pressure on the arms of the chair now affected the carbon, which, the chair now affected the carbon, which acting as a transmitter, caused sounds to issue from the mouth of the receiver. On the resumption of the trial a court official was placed in the closet, and by a series of signals arranged beforeband signified the feelings of the prisoner as they were betrayed through the moscles of his hands.

The main points against the prisone, were thus determined. They were present by formulated and read to him in privacy and he was so overcome that he made confession of his crime.

Out of the Car Window.
