HE COMMITTED SUICIDE! FINANCE AND TRADE.

The Improvement Noted Last Week Becomes More Distinct.

DISASTERS AVERTED BY POOLING.

The Number of Industrial Establishments Now Resuming Compare Favorably with the Number Stopping Work, but the Use of Checks Is Increasing.

New York, Aug. 26,-R. G. Dun & Co.'s weekly review of trade says: The improve-tient noted last week has become much more distinct and general. While actual transactions increased but liftle, the thange in public feeling is noteworthy. There are fewer failures, either of banks or of important commercial or manufacluring concerns, than for some weeks past. Many disasters have been avoided by a more general pooling of resources and a greater spirit of mutual helpfulness and forbearance than were seen some weeks ago. One large stock failure for several million was thus prevented in Wall street on Thursday, and the market for securities, though at times depressed by closing of heavy loans, has been extremely dull, without material decline.

Money on call is more abundant and tower, as many interior loans have been pald since the banks censed to send the currency away and advanced their rates for renewing or extending such loans, but there is little relief as repects murcantile excommodations. The use of checks in place of currency increases, and the diffifulty of collections and the interruption of exchanges are nearly as serious as ever.

The number of industrial establishments resuming begins to compare fairly with the number stopping work. It cannot be jet said that the army of the unemployed has begun to decrease, but the additions to it are much smaller than in previous weeks. Many resumptions only show that the stoppage was really temporary, or that

wage controversies have been settled. The failures for the past week number 110 in the United States and 20 in Canada Of the commercial failures in the United States 149 were in the custern states, 65 in he southern and 190 in the western.
