In Paint the best is the cheapest. Strictly Pure White Lead is bent; properly applied it will not scale, chip, chalk, or rub off; it firmly adheres to the wood and forms a permanent base for repainting. Paints which peel or scale have to be removed by scraping or burning before satisfactory repainting can be done. When buying it is important to obtain

properly made. Time has proven that white lead made by the "Old Dutch" process of slow corrosion possesses qualities that cannot be obtained by any other method of manufacture. This process consumes four to six months time, and produces the brand that has given White Lead its character as the standard paint.
