Special Agent Ayer's "Suppressed" Re-port Given Out for Publication.

Washington, Sept. 6.—Special Agent Ayer's much talked of "suppressed reort" on tin plate has been given out by he treasury department. It shows that during the period from July, 1801, to March 31, 1802, the aggregate production of tin plate in this country from sheets rolled in the United States was 34,633,052 pounds. The aggregate amount of imported black plates which have been converted into tin plate in the United States was 29,290,282 pounds, unking the grand total of both kinds 75,022,834 pounds.

The increase of the March quarter over the December quarter of tin plate pro-duced in this country is 3,300,000 pounds, and of imported black plate 6,750,000 pounds. Ten firms use their own black plates exclusively, thirteen firms use both American and foreign plates, and nine use

only foreign plates.

Agent Ayer states that his figures as given are made up from the sworn returns of manufacturers and he encloses the oaths to disprove the assertion that the figures of tin production are based on estimates. He estimates the production for the June

100,000,000 pounds. He gives figures which show that many of the tin plate manufacturers are adding to their plants. No decrease of plant or working force is mentioned in a single

quarter at 35,000,000 pounds or a total production for the fiscal year of more than
