"NEVER BEFORE," says the New York Sun, Taxan American President issued orders for the assazsination of a free and successful government." And when this administration is over it will be safe to present that such athlag will be ordered-never again?

Thuse who think they know say that Carible will ask Congress to let him issue three per ceritum, bonds redeemable any time after three years This is his scheme for keeping things going until the Republicans come to their own again.

CONGRESSMAN CONN. of Indiana, a Democrat and manufacturer, says: "1) an election had been held in Indiana last Tuesday the state would have gone Republican by at least 25,000 plurality. Indiana is a manufacturing state, and an analysis of the vote Tuesday will show that Republicans made their gains in manufacturing districts." It is a great pity Indiana hadn't an election last week.

THE EXPRESS TRAIN robbers seen to make a success of it, whether on account of timidity on the part of the train hands or superior brayado on the part of the marauders is not clear. Such a band consisting of only three masked men got over seven thousand dollars from a train in Kentucky Saturday, without any apparent reistence, to the discredit of those who permitted the robbery.

Mas. EDWARD ROBY, of Fort Wayne Ind., has been presented by one of the railread companies passing through that city with a large water jug and cups of hammered stiver. This is in return for Mrs. Roby's action during a recent train disaster near her home. She turned her house into a hospital, her family into nurses and gave up he parlor to railroad officials for business meetings. She refused any compensation, saying that she had only done her duty as a Christian.

THE case with which desperadoes, armed to the teeth although few in number, marched boldly into a town. overawed thousands of inhabitants and cooly plundered a bank, speaks STOCK AND PRODUCE MARKETS very poorly for the courage of the in- Closing Quotations of the New York and habitants. A man with a gun always has the advantage of a score of citizens aparmed. Thus it was that Quantrell with only a hardful of Confederates was able to make a raid on Lawrence, Kan., and loot the whole town, shooting down right and left all those who appeared in the pathway of the hand. A posse armed to the land, A posse armed the latter of the land, and look the land, and latter the latter than latter the latter than latter the latter than latter th in similar manner in times of peace can still more ensity terrorize a community. THE latest electric light invention seems so marvelous that one is inclined to think the story of it is a fake. If it is feasible, however, then the electric light companies siready occupying the plants will find their occupation gone.

If there is anything in the new invention, therefore, we may expect some movement on the part of the electric light companies either to buy it up or fight it down. If it is a success, then every honochoid can have its own apparents for neuting, lighting, and cooking at very little expense. Dr. Franz Fullier, of Chicago, claims to have invented what he calls the "primary cell?" electric system: Within a cell binches high, 3 Inches across, the docfield with their enormous machinery

tor puts a zinc filament three wixlyning Hera d. fourths of an inch thick, nearly eneire ling the cell. The center of the cell contains a small, hollow, whitish care. MHED DAILY, SUNDAY EXCEPTED The cell itself is filled with a dark liquid whose composition is the in ventor's secret. He declares, however, that the whole arrangement is very cheap-cheaper than any material for lighting yet known. The primary cell furnishes the current for each electric light. Wires from the cell conduct the current where it is wanted, as in ordinary electric lighting. The only care over required is that the gine filament shall be renewed several times a year.
