with the New Year. ACTUAL INCREASE IN PRODUCTION.

Distinct Improvement in Business

Both Dun's and Bradstreet's Commercial Agencies Report That More Industries Have Resumed Than Have Closed Down During the Week.

New York, Jan. 13 -- R. G. Dun & Co.'s. weskly review of trade says. Busines has distinctly improved since the new year came, and the gain is no longer visi-ble only in peculative markets. It is the only kind of improvement that has in it possibilities of insting, because it is based upon actual increase in the production by upon actual increase in the production by industries. As all rejoics to see it, there is perhaps a little disposition to recken the gain greater than it is as yet, but several large establishments have started with part force, hoping to increase, and more smaller works have started than have stopped. Orders from dealers whose stocks approach exhausilon form a prominent cause, another is the widely prevalent impression that action at Washington will be more satisfactory than many have will be more satisfactory than many have expected; and a belief that in any case the situation will not be changed until goods now in the works can be marketed has weight in some trades. Whatever the causes, even a moderate gain is most cheering.

Fattures for the week have been 474 in Fallures for the week have been 474 in the United States, against 356 last year, and 57 in Camada, against 20 last year. The Habilities of all firms failing for the week ending Jan. 4 were 85,672,544.

Bradstreet's review says: Special telegrams from leading trade centers bring evidence not only of much that is encourable to the control of the contr

withence not only of minn that is encouraging regarding the outlook, but that the
lide has actually turned. It appears be
youd question that the depression in industrial and commercial lines has for
some time been at low obb, and that a
movement in the direction of an expansion of the volume of business has appeared.

The pendulum, which swung in one direction from May last year until 1894 should soon be seen swinging in the opposite direction, and Bradstreet's points as evidence of that fact to the increase of 84 per cent. of that fact to the increase of 34 per cent, in the production of pig iron within three months, to an excess of deposits ever payments at some of the largest savings banks in the United States, and to the resumptions of work at industrial establishments in all directions leven though with lower wages and on shorter time) as contrasted with the apidemic of shutdowns prevalent a month or more ago. In addition there is direct evidence that the tide is rising at various points. Thus, the tide is rising at various points. Thus, the volume of business in Iron and steel at Pittsburg within a week is larger than in any week in December, and the general feeling there is that the improvement will be more pronounced.

Repulsed by Gatling Guns

Lisnon, Jan. 18.—Letters from Bissao, an island and Portuguese settlement on the west coast of Africa, report that the Portuguese colony of Angola was attacked in December by 3,000 armed natives, who were only regulated after a hot battle which lasted many bours, and in which camon and Gatling guns were used. Not a single member of the Partuguese garri-son was hort, though hundreds of natives were killed.
