BOMB EXPLOSION IN ROME.

Evidently Intended to Murder Members of the Chamber of Deputies. Rome, March 9.—A terrible explosion took place on the Piazza di Monte Citorio, near which stands the chamber of deputies. The explosion shattered all the windows in the neighborhood. Eight persons were wounded by the explosion, including one lady. Six of the wounded are in the hospital. One of them is reported to be dying and three others in a critical condition. The seriously wounded include a soldier of the Seventh regiment, wounded in the head, chest and arm; Molinari, an employee of the ministry of public works, had his leg shattered, and it was amputated; a man named Bardi was injured in head, arms and legs.

It is believed that the purpose of the perpetrator was to have the bomb explode at the hour the debate in the chamber was expected to end and the deputies and ministers would be trooping out. It is probable that a massacre was frustrated by a simple accident, which is regarded as almost providential. Premier Crispi had begged the indulgence of the chamber, to postpone his reply to questions under discussion, on the ground that his voice had failed him, owing to a cold. The chamber thus adjourned earlier than was expected.

A Mason named Polidori, who was slightly wounded, was placed under arrest. The police believe him to be the man who threw the explosive. Three other suspects are under arrest.

The exceptional surveillance recently adopted by the authorities probably prevented the miscreant from entering the chamber and causing a repetition of the Vaillant outrage in the French chamber.

ANOTHER LOCOMOTIVE EXPLODES.

Resulting in the Death of a Fireman and Two Workmen. WILKESBARRE, Pa., March 9.—The boiler of a locomotive on the Lehigh Valley railroad exploded at Tannery last evening, killing three men. The three men who were on the engine were killed. Their names are as follows: John Lantry, fireman; Edward Fox, brakeman; John Dotter, brakeman. All were new hands, having taken place of brotherhood men in the late strike. The cause of the explosion was low water in the boiler.

A lover of pictures, a man of means, making a tour of the art galleries of the world, realized that the luxury of seeing all these beauties was limited to the very wealthy, and to them only by wearisome and expensive traveling and time. "Why not in the present age of perfect photographic reproduction, why not reproduce the most beautiful, the most popular, the most noted of these art treasures?" was the question he asked himself. Why not indeed; no sooner thought of than he applied his means and prestige to secure large photographs of the choice pictures.
