RIO JANIERO REJOICES.

Peixoto Releases Five Hundred Insurgent Prisoners.

SUPREMACY OF REPUBLICANISM.

This is the Lesson Taught Our Statesmen by the Beault in Brazil-Our Sallors Will Now be Relieved from Duty at Rio Janeiro.

RIO JANEIRO, March 15.—The insurgent forces, it now appears, described Fort Ville-gaignon and the ships on Monday night, leaving the flags flying, and took refrage on the islands of Enchedas and Paqueta. There was not a soul on board the rebal ships during the bombardment of Tuesday. ships during the bombardment of Tuesday. Beveral insurgent officers on Monday took refuge on merchant vessels. Admiral da Gama left the harbor on board the French vessel Magon. The Magon re-turned here yesterday. It is not known whether the admiral is still on board. All the insurgent officers, with the exception of the surgeous, have fled. The insurgent officer its surgeoder on

of the surgeous, have field. The insurgents offered to surrender on Monday, but the government refused to promise that amnesty would be granted. Some sixty rabel privates gave themselves up, and by order of President Peixoto [00] rebel prisouers have been liberated from the jails.

The rejoicing among the people that the war has proved a fizzle is general. The streets are crowded, and everyone is keeping a holiday. BUENOS AYRES, March 15.-The insur-

gent Admiral de Mello is at liba Grande, sixty-eight miles west sonthwest of Ris Janeiro, with the warships Aquidalan and Republica. It is not thought that he will attempt to hold out longer, but that he will surrender to the government.

was very welcome to Secretary Greshum and Secretary Herbert particularly. To the first it serves as a relief from the ever assistance from any source. A general present apprehension lest something improvement in all lines has set in. United States government in some ugly dispute with one of the combatants, or perhaps with some of the powers that so perimities with some of the powers that so-jealously watched the course so firmly and consistently pursued by this govern-ment. To Secretary Herbert the surren-der means the ability to relieve most of the American sailors who have endured such hardships and exposure from yellow fever, from further service at Blo, and to utilize the ships now there for duty in other places where they are much needed. It also means a considerable saving to the navy department, for the maintenance of the large fleet at 1410 has been very exensive, coal alone costing \$11.50 per ton. Minister Thompson and Admiral Benham have both acquitted themselves of their delicate and responsible duties to the perfect satisfaction of the president and perfect satisfaction of the president wild their superior officers. Societary Groshim said today that there was nothing for the United States to do now at Rio. We had acted with perfect fairness throughout, and there was no occasion now for inter-ference so long as American interests were out.

Whether or not the French and British and Portuguese naval commanders have Iaid themselves liaide to a charge of violation of neutrality in receiving the fugi-tive relead officers aboard their ships is a matter in which the United States teels no concern practically, as we are biancless on that score. The naval officers here are well pleased

that Da Gama should have escaped, be lieving that he is a man of sterling qualities and brave to a fault. It is surmised that he will be landed at Montevideo or some other neutral port, and it is believed that he will have nothing more to do with rebellion in Brazil. It is suspected with renealing in Brazil. It is suspected by naval officers that Da Garna has been made a scapegoat by De Mello, for it is now believed that when the latter salled away from Rio with the Aquidaian and Republica he realized that the rebol cause at that place was absolutely hopeless. He had proved his ability to safely run past the forts with those two ships, but it was manifestly impossible for the other haif disabled and unprotected insurgent ships disabled and unprotected insurgent sales to run the gaunties. It became a question of losing everything or escaping himself. He escaped, leaving Da Gama to share the lost fortunes of his man. Nobedy knows what De Mellowill do now. If he scuttles the vessels he is liable to punishment for
