PEERLESS MINNEAPOLIS

The Cramps Have Constructed Another Record Breaker.

A REMARKABLY SUCCESSFUL TRIP.

All on Board Satisfied That on Her Offi cial Trial Trip the New Cruiser Will Exceed the Record by Her Sister Ship, the Columbia.

PHILADELPHIA, June 8. - The new United States cruiser Minneapolis, which is fast nearing completion at the shippard of William Cramps' Sons, returned at 6 o'clock last night from her preliminary or builders' trial trip. The big cruiser acquitted herself most creditably, proving herself the equal in every way, if not the superior, of her sister ship, the Columbia. While it is true that the Minneapolis did not equal the record of 22.87 knots an hour made by the Columbia on her official trip, she did better than did her sister ship on she did better than did her sister ship on the preliminary trip of the latter, the speed of the Minneapolis being 21.75 knots, while that of the Columbia was but 20.98. This was accomplished in spite of the fact that the new ship had to burn authracite coal, which is regarded as a handicap. As a result of this trial it is freely predicted

that the Minneapoils will make at least 23 knots on her official trial trip.

At 6:30 o'clock on Wednesday morning the anchor was weighed and Uncle Sam's newest commerce destroyer was ready to newest commerce destroyer was ready to essay her first venture upon the ocean. In the face of a stiff northwest brezze she steamed slowly and gracefully out to the Southwest lightship, twenty-one miles from the Breakwater. As she passed a line parallel with the lightship Captain Sargent gave the signal to Chief Engineer Patterson, to let her go ahead at full speed. The steam gauge at that time registered 160 pounds to the inch, and under natural draught. Mr. Patterson gave her natural draught. Mr. Patterson gave her the required power, and she headed for the Northwest lightship, 9.65 knots away. With her mammoth engines pounding away and her triple screws churning the

water in her wake into a boiling mass six or eight feet high, the latest wonder in mayal robitecture jumped away to show what she could do when called upon. So steady was the ship, even under this great pressure, that it was difficult for those on board to realize that she was being given and it was only by looking over the rail into the rushing waters beneath that an adequate idea of what she was doing could adequate idea of what she was doing could be had. The wind came over the decks like a hurricane, and landlubbers and sailors alike found it a task to keep on their feet in the face of it. In almost the time it takes to tell it the distance be-tween the lightships was traversed, and as she passed the ship the register showed that she was going at the rate of 18.73 knots an hour.

Describing a long and graceful curve, the steel racer rounded the Northeast lightship and headed for the original starting point. For more than four hours the cruiser flew back and forth between the cruiser new back and forth between the terminal points of the course until, on the fourth and last circuit, she had acquired the remarkable speed of 21.70 knots an hour, and it was known that a new world beater had been built. Then the vessel was run up the bay to Brown's Shoals, where she came to anchor for the

Shoals, where she came to anchor for the night.
Yesterday morning the Minneapolis steamed straight out to sea, a distance of about fifty miles. Then she turned, and at 10 o'clock started back for the Breakwater again. Now she was under forced draught, and the cinders were flying from her funnels like hail. The vessel flew along in the face of a spanking breeze that flung the spray in a shower clear over the bridge. Not a man in the party but was satisfied that she had exceeded 22.50 knots an hour, but when she pulled up again at Cape Henlopen Captain Sargent said she had only made 21.75 knots an hour. She had done this, he added, in water the mean depth of which is sixteen water the mean depth of which is sixteen fathoms, and can do better in deeper water. He added that the turn had been made in sixteen minutes, with the helm at two degrees. The record made by the Columbia on her preliminary trial was 20.98 knots, so that the Minneapolis has heaten it by about three-quarters of a knot. In horse power, too, she excels the Columbia, having developed 20.800, while

that of the Columbia is about 18,000.

After passing Cape Henlopen the cruiser steamed up the Delaware, reaching her berth at the shippard at 6 o'clock. On the berth at the analysis at a o'clock. On the homeward trip she was greeted by a chorus of tooting whisties, and when she passed the Columbia, lying at League Island, the crew of the latter, lined up at the rail, and gave the Minneapolis round after round of rousing cheers.

The crew which manned the Minneapo-lis on her trial trip numbered 407 men.

Hs on her trial trip numbered 407 men The maximum revolutions of the shafts were 128 to the minute. She burned almost 600 tons of broken coal, and the highest steam pressure was 160 pounds to the inch. The new cruiser will have her official trial sometime between the last and the 15th of July, probably off the

New England coast.

Edwin H. Cramp, who accompanied the vessel on the trip, Captain Sargent, her commander, Lieutenant Lewis T. Nixon, her designer, and Supervising Engineer Towne, who planned her engines, were delighted with the vessel's performance. They unhesitatingly pronounced the Min neapolis the best ship of her class and the fastest of her size in the world.

Kelly's Navy Dismantled. Carro, Ills., June 8.—Kelly yesterday broke up his boats. The man on whose farm he is camped had ordered him to vacate at 6 o'slock in the morning. He compromised by giving the lumber from his boats for permission to stay a day longer. Specula-tion is rife as to what his next move will be. His army is in need of rations, and many are reported sick. He has no tents and no transportation, and each hour makes the situation more critical. The quarantine against him is very strict, and none of his men are allowed to enter

Pennsylvania's Democratic Ticket, HARRISBURG, June 8.-It has been de eided by Democratic State Chairman Stranahan to formally open state head quarters on the evening before the state convention is held and hold an informal reception. The feeling grows stronger every day that either Secretary Harrity or Attorney General Hensel ought to head

Death of Ex-Governor Price. PATERSON, N. J., June 8.—Ex-Governor Rodman M. Price, of New Jersey, disd at the home of his daughter, at Oakland, yesterday, aged 78.

JOHN M. MEDALIS, JOHN J. O'HAREN.

A PERILOUS HAILSTORM

Great Destruction by the Stones in and About Vienna.

ARTILLERYMEN PUT TO FLIGHT

Thousands of Panes of Glass Broken in the Emperor's Palace and in Other Buildings, Which Appear to Have Been the Targets for a Musketry Volley.

VIESSA, June 8.—The worst hallstorn that ever visited this city commenced at 7 o'clock yesterday morning. At that time dense copper colored clouds rose with alarming rapidity. The wind raised the dust in columns to the height of four story houses. This lasted a few minutes, and then the hall began to fall and covered the city in a short time to the depth of six to sight inches. In less than fifteen minutes the city looked as if it had undergone a bombardment. It is estimated that 100,000 windows were smashed by the that 100,000 windows were smashed by the hail. Five hundred panes of glass were broken in the ministry of commerce build ing alone. On the upper floors and the emperor's wing of the palace hardly a pane remains unbroken. To a large mill on the Danube nearly 4,000 panes were

The hall stones averaged the size of The hall stones averaged the size of hazlenuts, and descended in streams. Three deaths are reported as due to fall-ing trees. Numerous horses were fright-ened by the storm and ran away, causing

serious accidents.

Much damage was done in a field outside of Vienna, where a detachment of artillery, with thirty-two guns, was overtaken. The horses boited in fright in all directions, and thirty soldiers soon lay helpless on the ground. Several of them were run over, and one was killed. Three efficers were severely injured. Many per-sons were bruised by the hall in the prin-

cipal streets.

The beautiful gardens of the city are a pitful sight. The trees are stripped of their leaves, the flowers destroyed and the avenues strewn with branches and small avenues strewn with branches and small trees. The fronts of many houses have the appearance of having been the target for a musketry volley. Telegraph and telephone poles were blown down in exposed situations, and the wires are stretched on the ground like huge cobwebs, causing the death of thousands of birds, and stunning many horses. The thermometer during the storm sank to 10

degrees (Resumer.)

It is feared that irretrievable damage has been done to the crops. Reports from Pressburg show that that place was also visited by a disastrous hallstorm, and that the vineyards were almost ruined. Vio-lent storms have occurred during the week at Odenburg, Veszprim and in Croatia. Immense damage is reported to have

Beaten to Death by Drunken Negroes. WESTOVER, Md., June S.—A crowd of drunken negroes beat Constable Ned Car-ver to death near here with clubs and empty beer bottles. Frank McCready was also badly beaten over the head. Carver had tried to prevent the negroes from doing damage in a general store. Ten ne-groes, all from Virginia, have been ar-rested and lodged in Jail at Princess Anne. Sheriff Sterling and a posse of deputies are guarding the jail, as threats of lynching have been made.

Killed by a Telegraph Pole.

PHILLIPSUURG, N. J., June 8.—Edward Smith, of Easten, a freight conductor on FOR LEGESLATURE, lat Dist. Smith, of Easton, a freight conductor of the Lehigh Valley road, met a horrible death near Picton, N. J. He was looking out of a car window while the train was running full speed, when his head came in contact with a telegraph pole and he was killed instantly.

A Big Price for Matchbox.

LONDON, June 8.—Lord Allegton has sold his bay coit Matchbox, which flu-ished second in the derby on Wednesday and in the 2,000 guineas at Newmarket, to Baron de Hirsch. The price paid was \$75,000.

YESTERDAY'S BASEBALL GAMES. National League.
