Wolld comes out of Chicago that a few resolute reformers there have decided to introduce the fashion of shirt waists for men. A man hardly dares to step into the street without his coat, but a woman with one of these waists feels under no obligation to wear a jacket. The shirt waist is not only cool but charming. A woman never looks so well as in one of them. It is said, and with truth that a man never looks so well as when clad in shirt and trousers. The waist will permit which will raise it above the rank of a shirt. It is a think of great possibilities said by an enthusiastic reformer, the women are gradually learning to wear men's ciothes, and why should not men Cearn to wear such of theirs as coolness and common sense suggest ?

DROWNING casualties are always to be expected on a hot Sunday, and last Sunday had its full quota of them. Most of these were due to the recklessness of the victims themselves; but the capsizing of the tug James D. Nichols off the Navesink Highlands should lead to better protective measures than appear to exist now. The hoat may or may not have been old and rotten, as claimed. That does not seem to have had anything to do with the disaster: but she was certainly cranky and unfit to carry so many people as she did, also she would not have "turned turtle" in a moderate gale of wind. Either there is no law in New York to prevent the overloading of an unsafe boat or it was not enforced in this case, and so seventythe lives were put in jeopardy and pro-bably one-third of them lost. The magnitude of the disaster should cause magnitude of the disaster should cause five lives were put in jeopardy and proas Immediate reform in the regulation of

It is almost incredible that the cuckoo Senators should have been led into the trap set for them on Saturday by Mr. Hill, whose amendment, exempting the Prosident of the United States and the Federal Judges from the operations of the proposed income tax, the Administration Senators swallowed as blandly as if this swere their first year away from apron strings. The New York Senator had no possible object except to bring the proposed tax into additional disrepute by exempting a few persons who were better sable to pay it than many thousands instuded within its scope, and to likewise bring ridicule upon the income tax Senators for exempting a President who advocated the laying of that tax. We can, in exchange for New York assume also that he was not averse to chrowing a certain quantity of ridicule upon the President also, but we must confees surprise that the latter should have allowed his friends to walk into the trap. With the exception of the Populists, the originators of the income tax idea in its refation to this decade, the Presblent should he the last to accept exemption upon any ground.

A BUGLE CALL.

The people need not be surprised if they and Senatur Cameron, of Pennsylvania, before them as a candidate for President arn the Rapublican ticket in 1896. We said this at the time he took a distinct stand when the silver bill was before congress and his recent letter to the Republican League in session at Denver has caused us to repeat it. In this letter the distinguished Senator said: distinguished Senator said:

The Republican party held power for a when you have Catarrh, use the sure rem-whole generation, and during that time edy—Dr. Sage's. \$500 for an incurable case.

made only one fatal mistake. Under the influence of the banking interest of the ountry the party fell into a conspiracy for making a single gold standard, and what was worse, did it with a foreign air of conspiracy. We cannot afford to repeat that error. The time has come for decision, and the decision must be open.

This is not only a manly confession but t is a courageous act, carrying with it a a summons to the Republican party to restore sliver to its place as the money of the Constitution. The one great blunder made by the Republican party must be retrieved, and, as Mr. Cameron says, it must be done openly and at once. The false light that led the party astray must be no longer followed.

THE fact that Mexico is proposing to admit Chinese immigrants without restrict ion, and to allow them to become citicens on the same footing another foreigners, is making a stir in our Pacific States They want to know what our govern ment is going to do when a Mexican from China crosses our border in order to make \$1.75 a day instead of 30c. It is hardly worth while to borrow trouble about the Mongolian attired in sombrero, serape and silver spurs until he puts in an actual appearance.

Lessons From Trees,

The student of nuture may tearn some useful and interesting lessons by careful observation of the range in the trunks of trees. He will observe that some rings are wide, others narrow; some full, close our and regular; others, baseed, one sided and perhaps spotted or stained or maybe deeply indented. These accurately indicate the condition of the tree during its various stages of growth. As each ring is a year's progress, so each is a perfect record of that year's development, so we may know how it was nourished. A full, wide, even ring shows that during that year the tree had abundant moisture and nourishment. A thin, irregular line is evidence that the tree was not in a flourishing condition. Spots, stains and breaks in the lines show that the outside of the tree may have been brulsed or bent, or the bark and wood injured in some way. In fruit trees, imper-fectly developed rings may be caused by an unusually large crop of fruit, which so taxed the vital powers of the plant that but little was left to be turned toward the formation of new wood. By careful ex-amination and counting the skilled botan-ist is enabled to read the history of the tree runk, and to tell in what years it best lourished, when there was little for it to grow on, and when it was too constantly occupied with fruit production to give any care to its own growth other than the ab solutely necessary formation and solidify ing of its outer coating. It would be o great advantage to the student if the hab-its and needs of trees could be explained by competent persons. Some day, when tree planting becomes more important than most people seem to believe, this knowledge would be of great value.—New

THE STRIKE SPREADS.

Discouraging Effect of the Boycott of the Pullman Company.

JUDGE CALDWELL'S STRIKE ORDER

The Men of the Atchison Road, Who Are Employes of the Court, Must Obey Orders of Company Officials or Leave the

CRICAGO, June 29.—The following message was received here by Receiver Wilson, of the Atchison road, from Judge Ealdwell, of the United States circuit court, who is now in Michigan on a pleas

The men in the employ of the receivers of the Atchison rallway system must dis-charge all their usual and accustomed duties or quit the service of the receivers altogether, and permit other men to take their places who will discharge their duties. Any or all of the employes can qui the service of the court if they desire to do so, but when they do quit they must not interfere in any manner with the property or the operation of the road or men emplo a to take welr places. Any such interiors nos will be promptly dealt with as a contempt of court. The men who wish to continue in the service of the court must discharge all the duties appropriately and properly belonging to the service. A refusal to perform any part of these duties will compel their discharge and the employment of other men to take their places. All the powers and author-ity of the court will be vigorously exer-cised to enforce these reasonable rules.

"The men must understand that they cannot remain in the service of the receivers and refuse to perform any duty pertaining to that service. They must make their election, whether they will take their orders as to the cars to be switched and handled from President Debs or the court. If they elect to obey the orders of the former they may do so but in that event they must understand that they are no longer in the service of the court, and that other men will be employed to take their places permanently, who will be guarded and protected in the discharge of their duties.

The general managers of two of the leading roads said today that they anticipated and were prepared for a general tie up of all the roads. There was nothing left for the railroads to do but to resist the boycott. They reserved the right to haul any man's cars that was offered hem, regardless of his business or politi-al affiliations.

H. H. Porter, chairman of the board of lirectors of the Chicago and Eastern Illinois railroad, in a communication to President Carpenter, of the road, says if the aims of the strike leaders are carried out wage workers will be reduced to absolute slavery, presently be rendered valueless, and the result will be a revolution.

Several thousand men are thrown out of employment this morning at the stock yards by an order from the Knights of Labor for a strike because the employers refused to agree to the demand that freight cars of lines hauling Pullman cars should not be handled. The entire packing in-

dustry is completely paralyzed.

The effect will be so serious that the proprietors of the packing houses and the railroad officials refused to believe that any such action would be taken. About 400 switchmen, trackmen, number takers, firemen and engineers left their posts. The roads affected by the tie up in the yards include nearly every railroad sys-tem running into Chicago. Reports from various sections show

that the strike is spreading rapidly. San Francisco is completely shut off by the strike from railroad communication with the outer world. The main seat of the trouble is Oakland where many trains and tons of mail and express are already tied up. Large quantities of fruit are going to waste in orchards and in stations and

Superintendent J. C. Gibbsons' of the Pullman car department of the Pennsylvania railroad in Jersey City, says that not the slightest trouble has been exper-ienced in this section of the country on secount of the Pullman boycott. There was excellent reason to belleve, he said, that none of the Pennsylvania company's

lines would be effected.

President Debs, of the American Rail-Ind., for Chief Sargent, of the firemen. and the latter, who has been in Canada, has started for Chleago. In view of the unfriendly attitude of Sargent to Debs' organization, much interest is felt as to the attitude of the firemen.

Master Workman Sovereign, of the Knights of Labor, who is at Des Moines, Ia, predicts the strike against the Pullmans will be the biggest one in the his-tory of the country. He said the Knighta, would fight it out with the railroad men to the bitter end.

At Pittsburg yesterday a number of men were engaged to go to Chicago to take strikers' places. Most of them were A. H. U. men or their sympathizers, how-ever, and less than two score s arted for Chicago,

ANOTHER STAR FOR THE FLAG Mexico Statebood Bill Passed by the House.

Washington, June 29.—The New Mex-ico atatchood bill was passed by the house yesterday, practically in the same shape as it came from the committee, without any organized opposition being made to it. A number of bills and resolutions were passed in the morning hour, the most important being one allowing receivers and managers appointed by United
States courts to be sued without permission from the appointing court, the same
as corporations of which they were appointed receivers. At 4:18 p. m. the house
was forced to adjourn for want of a
outerm.

Only two sections of the tariff bill remain to be acted upon by the senate. On the final vote on the income tax only three Democrats, Messrs. Hill and Murphy of New York and Smith of New Jer-sey, voted in favor of the motion to strike it from the bill, while six Republicans Hansbrough (N. D.), Mitchell (Ore.), Pet tigrew. Power, Shoup and Teller voted against the motion. The three Populists also went on record in favor of the income tax. The provision so vigorously at-tacked by Mr. Gray on Wednesday and by Mr. Teller and others yesterday was tax. modified so that the inspection of books of corporations should not take place unof corporations should not take place un-less there was grounds for the belief that the returns made were fraudulent, and that this belief was supported by affi-davits of the collector, in which event the corporation would be requested to pro-duce its books, and if denied the collector should make his estimate from such in-formation as he was able to obtain and formation as he was able to obtain, and add a 50 per cent, penalty on account of the refusal of the corporation to permit an examination of the books. The in-crease of the whisky tax to \$1.10 and the extension of the bonded period to eight years were agreed to. Only one of the two sections of the tariff bill remaining will meet opposition—the one providing for the repeal of the reciprocity provisions of the McKinley law.

Singular Tragedy at Believille, N. J. BELLEVILLE, N. J., June 29.—By a single blow of a club Theodore Jerolomen, a prominent resident of this place, killed John Breen, of Harrison, N. J., yesterday afternoon. Breen, with three companions, attempted to take some cherries from two boys who were gathering the fruit in Je relomon's orchard. The boys called for help and Jerolomen went to the rescue. The men fled and the latter gave chase. Breen ran to a barbed wire fence, and as se was bent over it Jerolomen simed a blow at him. Just then a strand of the wire broke and Breen fell back. The club struck him squarely on the top of the head, crushing in the skull. Breen dropped like a log, and died shortly afterward. Jerolomen at once gave hin to the police, claiming that the killing was accidental.
