### NO VACATION FOR MANY.

Times Are Hard.

When Escape From Debilitate ing Summer is Not Possible.

Thousands Will Follow the Example of Mabel Jenness.

Vacations are in sight-for some. But there are myriads of over-worked men and women who will get no vaca-tions this year, who will stay at home and simply work and suffer. Employers plead hard times

But these tired out, too often unco mlaining men and women need to be told how poor they, and not their employers really are. They endure the worst kind of poverty, as if it were something there was no use struggling against-poverty of blood and nerves; and it is not untitheir bodies and brains break down that they complain and seek help.

Continued headaches, poor appetite, constant tired feeling and nervousnes should convince any reasonable person o the need of a tonic and restorative for

MISS MABLE JENNESS.

exhausted blood and nerves. The ideal invigorator and reconstructive remedy for a "run down" system, for thin, poor blood and diseases of liver, kidneys and stomach is Paine's celery compound. It feeds worn-out nerve centers and builds up the strength and elasticity of the body. One takes on new weight with its use; pale cheeks gain color, and the skin, undoubtedly the best index of health, is cleared up and freed from the disfiguring signs of the bad humors that are in the blood

Miss Mabel Jenness, who is celebrated the country over for her suscessful crusade for physical culture among the gentler sex, has set them a good example, as appears in a letter written by her from Wa hington.

"I was induced." writes Miss Jenness "to try Paine's celery compound at a time when I was suffering from overwork and the effect of an accident. I began im mediately to realize tonic and blood nourishing effects, I take pleasure in saying that, although opposed to medicine in general, I really consider this an excel lent preparation.

"I have not been able to take one day" rest since I returned from my long, hard testeen trin. I am sure were it not fo Paine's celery compound, which has a tonic effect, I should not be able to keep up and work hard.

"I recommended Paine's celery com pound to a friend who dined with us yes terday, and on leaving here she went and bought a bottle. I shall do all I can for it, for I believe in it.

So the society woman, whose health and grace are famous the country over, and who is in a position to command the besmedical advice, finds in Paine's estery compound the same relief from the effects of overwork and illness that the poorer harder working woman finds.

And it is within the reach of all.

Last June, Dick Crawford brought his twelve mouths old child, suffering from infantile diarrhors, to me. It has been weened at four months old and being sickly everything ran through it like water through a sleve. I gave it the usual treatment in such cases but without henefit. The child kept growing thinner until it weighed but little more than when horn or perhaps ten pounds. It her started the father to giving Chamberlain's Colle, Chelera and Inarrhoes Remedy. Before one bottle of the 13 cant size had been used, a marked improvement was seen and its continued use oured the child. Its weakness and pusy constitution disappeared and its father and myself believe the child's life was saved by this remedy. J. T. Marlow, M. D. Tamaroa, Ill. For sale by Gruhler Bros.

STREET TALK.

What an Oceasional Contributor Finds to Write About.

The Borough Council's action in refus ng to accept a livense fee for a street corner huckster stand is in line with good sense. Many of these stands are the worst possible obstructions to pavements, especially in places where the hucksters have established in annex on the curis of the pavements. Sometimes it is almost impossible for pedestrians to secure passage way at these points. The Council would have no right to legalize these obstructions and by attempting to do so it would only give additional encouragement to the nulsance. As a rule the owners of properties derive ample revenue from the present scale of rents without assuming the right to absorb the pavements as a source of furnased revenue, and it is with them the Council should deal. The occupancy of street corners by huck ters has long been a custom, but it is very doubtful if one of the stands was ever constructed by permission sought of or granted by the Borough Council, which goes to build up a presumption which many municipalities would not hesitate to promptly resent. This presumption has gradually developed into impudence, and should a citizen ask some of these hucksters why he does not keep barrels and boxes off the pavement the latter do not hesitate to show the impudence by their answers. Now that the question has been brought up it would be well if the Chief Burgess would notify the proprietors of such places that unless they exert themselves to keep passage ways clear for pedestrians vigorous steps will be taken; in other words, the borough will assert its power over the pavements and have them cleared. It is recognized that in some instances the owners of stands are men incapacitated for bard work and deprived of other means of livelihood, and it is this recognizion which has made the Council merefful. This suffrage should be pursed by the recipient-exerting themselves to see that the public is inconvenienced as little as possible, and not abused by an assumption of easement. sense. Many of these stands are the worst possible obstructions to pavements, es-

I admire the pluck of the Council as exhibited in its action at the last meeting a connection with the public water works t seems that Council has been informed It seems that Council has been informed from one source that certain pipe has been ordered, and from another source it has received contrary information. It also appears that Council has always experienced difficulty in getting the engineer in charge of the work and the contractor in attendance together at its meetings, and for that reason the confreences of the past have not been very satisfactorily. These are the circumstances which have led the Council to decide that if the contractor and engineer do not make a joint appearance at the next meeting, work on the water works will bestopped.

Anyone who has paid attention to the proceedings of the forongh Council cannot fail to see that there is a spirit of disastisfaction lurking under the roseate has which most of the Councilmen are inclined to give the works, and I am satisfied that it would not require the strength of an eight-year-old boy to create an open rapture unless the Council, engineer and contractor get together and understand each other. For the sake of the taxpayers of the community it is hoped this will be accomplished very soon, for should the project become muddled they alone will be the sufferers and I would not dare estimate to what extent.
