THE TARIFF CONFEREES The Dominant Party Members

Making Little Progress, DISCUSSING THE WHISKY TAX.

This and Other datters Threaten to Keep the Members from Reaching an Agreement for an Indefinite Period-Effort to Restore Coal to the Free List.

WASHINGTON, July 13.-There was more interest manifested today among senators and members of the house not members of the tariff conference committee than on any previous day since the conference of the Democratic members of the commit-tee began, and the air about both the senthe organ, and the air mout both the sen-ate and the house was full of runners as to what had been done. Many of these stories were considered sufficiently well founded to justify senators and members at members. to more to justify senators and methods in discussing them as accomplished facts. The most persistent of these rumors was that eval and iron ore were to be restored to the free list, as they were when the bill passed the house. A theorough investiga-tion revealed the fact that this story grow out of supersymptotic between members of out of conversation between members of the committee and senators and reprewentatives not connected with it, and while it had not been started in these con-

versations that the committee had agreed upon these changes the outside members were given to understand that this was The program, and that it was to be put into exception by the joint efforts of the house conference and two of the senate managers of the conference. The members of the contribute spoken

to upon the subject after adjournment of the committee, declared that no action had as yet been taken upon these two frems and they went so far as to declare that they had not even been discussed. They made the same denial of another story, which was current to the effect that changes had been decided upon in the sugar schedule

A report that Senator Gorman had told. the conferees that unless the one-eighth of a cent differential on refined sugar was retained the bill would be defeated in the senate is denied by both Senator Gorman and Senator Harris of the committee. It appears true that Mr. Gorman has inter-ested himself in having the senate bill preserved as nearly as possible as it passed, but he declares that he has made no threat as to what would happen in rase it should be changed. It developed late last night that the

whisky schedule was one of the main questions of contention. It was not scided, and the final determation will be tied, and the num determation will be made today. But the discussion was far from satisfactory to those who have been most watchful of this schedule. Mr. Mont-gomery, of Kentucky, one of the confer-ces, sought Senator Blackburn when the

conference closed, and later saw Secretary Carlisle at his residence. Senator Voorhees told Senator Allison yesterday that he thought the Republican senators would be invited into the conference early next week. Senator Aldrich states that the Republican members of the conference committee, when they shall be invited to participate in the conference, will resist any effort that may be made to present a partial report, but that they will insist that there shall be but one report, and that it shall show the en-tire scope of the Democratic plan. It is understood that Scontor Hill will stand with the Republicans in making this de-

In Senate and House.

WASHINGTON, July 13.—The appropria-tion bills are fast being considered by the senate, and at the present rate of progress it is probable that the next week will see them all disposed of. The house agreed to the senate amendments to the bill for the admission of Utah as a state, and the bill now goes to the president. After discussing a bill for retiring officers of the revenue cutter service the house proceeded with the consideration of bills reported from the foreign affairs committee. Eleven bils were passed, hone of national importance
