

What Pre-Digested Food is Doing For Dyspeptic People.

ITS WONDERFUL EFFECTS.

Thin People Rapidly Gain Flesh by Taking Paskola, the Newly Discovered

Pre-Digested Food - Remarkable Cures of Indigestion.

Paskola works wonders!

That is what people who take it say, and the statement is repeated by the druggists who sell it. There has never been such a demand for any preparation as there now is for Paskola, the pre-digested food.

Dyspeptic sufferers, who have tried Paskola as a last resort, after taking every other remedy they could find, have been delighted to notice their symptoms soon disappearing.

The fact of the matter is, Paskola is a scientific discovery. It is not an old-fashioned remedy like the greasy oil-smelling cod liver oil, a relic of a past age.

Paskola is not a medicine, but a food, pleasant to the taste and agreeable to the weakest stomach.

Children thrive wonderfully when they are given Paskola. They like it, and can get enough of it. As a means of imparting health, strength and vigor to the puny little ones it is unsurpassed.

You can obtain Paskola of any good druggist and a free pamphlet will be mailed by the Pre-Digested Food Co., 20 Reade street, New York.

The circus which exhibited here last evening - as good as could be expected for the admission fee. Acrobatic performance, comic recitations and the performance of a troupe of trained dogs were most notable. The audience was very large. Many people being obliged to remain outside.

The Shamrock club, of Byrnesville, defeated the Girardville club at the former place on Sunday. The Shamrock took the lead in the beginning and it was only a question of how many runs they could pile up before the innings were played. They succeeded in scoring 18, while Girardville scored 4.

The Centralia foot ball team begins practice this week. A number of new and good men have been secured and the team promises to make some of their old time opponents "bite the dust" before the season is over. The team is composed of boys between the ages of 15 and 19 and are now ready to receive challenges from similar teams. Address all communications to C. McBrearty, manager.

At the circus here yesterday Manager Welsh offered a prize of \$25 to any one who could successfully wrestle a large bear which he had. One of our popular young pumpkins intended to compete for the prize, but was unable to do so, as he had to work last evening. He is a good wrestler and we feel certain that he would secure the prize if he had entered the contest. His friends are arranging to have the match take place to day, at Mt. Carmel, or at some other town that the show will visit in the near future.

PULLMAN MEN WEAKEN.

They Have Given Up Both the Strike and President Debs.

Special to the HERALD. CHICAGO, July 17.-The hardest blow Debs has yet received is in the announcement that the Pullman strikers are getting ready to return to work.

Thomas W. Heathcote, one of the leaders of the Pullman strike committee, admits that the strike, so far as the Pullman employees are concerned, is practically over. According to his views the men have been literally starved out. The difference between employes and employers, he says, is slight, a mere matter of rent.

Mr. Heathcote was somewhat disheartened to-day as he spoke about the strike and the prospects. "The men here are becoming weak, and it is all the leaders can do to keep them in line. The people have no money. Not one-third of them have enough money to pack on their goods and move as far as Kensington. I myself have not a dollar in the house. Those who had a little saved up have used it by this time, and every day more and more are coming to the relief fund and drawing a small amount in order to keep alive."

It is the general opinion that if the works of the Pullman Company are opened to-morrow there will be a stampede of the men to regain their old positions. During the last twenty-four hours the attitude of the strikers has undergone a marked change, and where previously they were talking about how the light was won, to-day little groups of workmen talked of how they had lost the strike.

Heathcote, chairman of the strikers, admitted that he had practically given up hope, the only reason for holding on being that Debs might be able to come to the rescue. He said if Debs would declare the general strike off, the Pullman strike would also be at an end. Heathcote finds difficulty in keeping the strikers together on account of the diversity of nationalities. The Poles, Germans, Bohemians and the Hungarians with equal numbers, who together constitute a majority of the Pullman employes, are anxious to return, regardless of the feelings of the other nationalities.

Pullman officials say a week would be required to get ready for opening the works. They expect the announcement of opening to be made this week, and expect to begin operations with all the men needed to get out contracts now on hand. Mr. Heathcote made the statement that the A. R. C. had never donated a dollar to the hungry Pullman strikers, and that the only way Debs had shown his sympathy for the strikers had been by calling out railway men right and left. Mr. Heathcote added that he did not expect the Railway Union to furnish funds, although a number of strikers thought that would be an appropriate manner to show sympathy.

Vice President Wickes, of the Pullman Company, stated to-day that the company is willing to take back its striking employes. "Our manager at the works," Mr. Wickes said, "has been instructed for several weeks to put the men back to work just as soon as enough of them agree to work to make the running of all departments complete when shipped. Best people, and the question is settled. Try it."

Last June, Dick Crawford brought his twelve months old child, suffering from infantile dysentery, to me. It had been sick at four months old, and had taken nearly everything he ran through like water through a sieve. I gave it the usual treatment in such cases but without benefit. The child kept growing thinner until it weighed but little more than when born, or perhaps ten pounds. I then started the father to giving Chamberlain's Colic, Cholera and Diarrhoea Remedy. Before one bottle of the 25 cent size had been used, a marked improvement was seen and its continued use cured the child. Its weakness and purgative constitution disappeared and its father and myself believe the child's life was saved by this remedy. J. T. Marlow, M. D., Tamaqua, Ill. For sale by Grubler Bros.
