THERE is a tide in the construction of water works which, when taken at the flood, leads to early completion.

ALL our citizens should now co-operate with the Councilmen in hastening the completion of the public water works.

SECTOR and incessant work is required on the new water works, for when the cold weather sets it little will be done until spring

IF another special election will be necessary for the completion of the water works let the sum to be asked for be fixed high enough. Two bites at a cherry is an expensive practice.

This host of friends and admirers of Richard Trevellick, the labor orator, will regret to hear that he has been stricken with paralysis and may never again be able to appear on the platform as a speaker.

COXEY armies are still headed toward Washington, and will reach there in time for the winter session of Congress. Precisaly what they expect to achieve there, beyond free living, is a question not one of them can tell.

Now THAT comparative peace has been restored to this distracted country. Gov Pennoyer breaks out again in an interview in which he says that all the trouble might have been avoided if the President had taken his advice.

### Early American Coins Took Odd Shapes-A Notable Collection.

Notable Collection. The collection of coins, or, more exactly birrown down the gauntiet to the A. R. U. The collection of come, or, they passed for a fight to the death. The following for money in different countries and in different ages of the world, at the National that road at St. Louis who had reported different ages of the world, at the Margars miscom is a complete one and well repays two days age for his old position: "This one for a visit. The earliest American is to certify that —— has been employed in the capacity of clerk in the yard departby Cortes, by permission of the Spanish ment of the Missouri Pacific system, St. Louis terminal division, from April, 1893, inter of the death of Columbus, which oc-curred in 1506. They are of copper, and on the ano side is a representation of the "Pillars of Horenies." Next in point of time comes the money is a superior of any, but in the meantime in the mean time of the second of the second of any.

Next in point of time comes the money for Bermuda which was minted in Eng-land. These coins are of copper of the values of a shilling and sixpence, and on one face is the unterpreter of the sixpence, and on values of a shilling and sixpence, and on one face is the picture of a log; hence it is known as the "hog money." The early satisfactory." It is probable that a civil action for damages will be brought these animals rearring about that they against the railroad for its action in this used it to mark the coin. Only one six-pence and two shilling pieces of this money are believed to exist, and both are money are believed to exist, and both are awand in Boston. Among the oddities of the collection is the "knife money" of the wreck at Sacramento, was resumed at Chinese, used about the commencement of the Christian ern. The pieces are shaped something like a razor, about 6 inches long,

are of copper and worth about 8 cents. "Ring money" is another curious variety, which was used by the carly Gauls and Britons. In those days, as there were

negotiations are pending between the strike leaders and the railway officials,

but these rumors positively cannot be authenticated. It is simply known that the strike a at Oakland wired to Presi-

icials, and that Debs answered practically

The story that a bomb was carried into the Puliman building during the strike with design against the life of Vice Presi-

It is believed that he sent the bottle into

age to the fort. Just after breakfast Sergeant Chinn went into the store room, where he had his carpenter tools, to do some work. In the room were neveral casks of powder, in all about 400 pounds, and a lot of fixed ammunition. As he had done often be-fore, he took a handful of powder from one of the casks, and wet it at he pump. He ignited it in the middle of the room in order to drive out mosquites. In carrying the handful of powder from the cask day after day he had left a train of dry pow-der from the middle of the floor right up As soon as he had ignited the po to it. der it burned along the train and the 400 pounds exploded.

There were three large explosions, each within a few seconds of the other, and he was kuccked down three times in trying to get out of the door. He managed to get as far as Foreman Austin's quarters. Mary Washington, his mother-in-law who was approaching the door at the time, was harled about forty feet and badly burned about the face and arms The wood casements in the southwest corner of the fort were ignited and the inrge, heavy beams burned slowly for a ong time

The fort has a historic record. It was built by General Gilmore and afterwards bombarded by him from Tybes Island un-til a heavy breach was made in the southeast corner. This was April 11, 1862. It was defended by Colonel C. H. Olmstead, of the Confederate forces.

Sergeant Chinn, who was in charge, is of the Twenty-fourth infantry. He was burned and blistered over three-fourths of his body and will die.

### The Indiana Whitecapping.

COLUMBUS, July 21.-The outrageous whitecapping in Brown county has been found to be more serious than at first reported. The Stevens brothers and the Broomfields have left the county to save their lives, while the officers remain indo lent. All the Stevens brothers except the one who was shot through the foot and unable to leave, have gone. Other citizens fear trouble

#### Double Murder in Texas.

SAN ANTONIO, Tex., July 21:-A terrible tragedy has been enacted on Cherry creek, thirty miles north of here. Jin Crancy went to the house of a man named Layton, where he met John Crain and son. In a quarrel that took place between Craney and Crain's son Craney drew a pistol, and shot and killed both Crain and his son. Craney then escaped and has not been apprehended.

# Probable Murder and Suicide.

RACINE, Wis., July 21.-Captain John Crangle shot his wife twice, once in the back and once in the right shoulder, and then turned the smoking revolver to his right temple and pressed the trigger. He died instantly. His wife may recover, Captain Crangle was one of the best known navigators of the chain of lakes.

As examination of staple prices compared with the middle of 1891, following the Baring embarrassment, indicates that flour has declined 40 per cent., wheat 45 per cent. and corn 31 per cent., while oats are 30 per cent, higher than three years ago. Pork and lard are respectively 18 and 10 per cent, higher than three years ago, while changes in prices of butter and cheese are less significant. No such radical movement is exhibited in prices for print cloths, sugar, coffee, cotton, refined petroleum and anthracite coal, but raw wool has dropped 37 per cent. pig iron, Hossomer, and anthracite, 25 per cent., billets if per cent. and bituminous coal 30 per cent.

THE Democratic Congress are in the attitude of the fellow who was going along the road and saw four fellows beating one man.
