ONE of the characteristics of religiou activity in our day is the mobilization of young workers in church work. The ananal national and international assem blies of these societies attract world-wide attention and interest. These assemblies bring together as many persons as the national political conventions, and few cities now have halls large enough to accommodate them.

THE CONDITION of the wheat crop of Argentina is a very important matter for the American farmer. A large yield there will hammer down the price of the cereal below the discouragingly low price at which wheat has been quoted for some Mine past. The American Minister at Buenos Ayres reports that the Argentine grop for export next year will be but alightly in excess of that of last year. The rice of wheat now being marketed in that country is 37 cents per bushel. The corn crop has failed.

Words of Warning from Yokohama's Health Officer.

THE PLAGUE STEADILY INCREASES

The Mortality in Hong Long from the Disease Now Averages a Hundred Cases a Day-How the United States Should be Protected.

WASHINGTON, July 23 .- Recognizing the difficulties in the way of obtaining ac-curate information upon sanitary matters from Oriental countries Dr. Stuart Eldridge, the health officer of the port of Yokobama and member of the Imperial board of health of Tokio, has sent to the Marine hospital bureau a semi-official statement of the epidemic of plague in southern China. It appears from his re-port that this scourge, of which only fragmentary news has been received, is one of the most fearful on record, having its greatest hold at the port of Hong Kong, where most of the foreign commerce touches.

The disease broke out in Canton late last February, and at about the same time wna epidemic at Pakhoi, a port not ofter visited by Europeans. During March and April it steadily increased until it as sumed gigantic proportions. According to the letter of Dr. Eldridge the eastern authorities treated the discuss with their customary indifference. Although Hong Kong is the center of trade in the east, he says, but half a day's journey from ton and in constant communication ther with, the existence of danger was ignored Several cases appeared in Hong Kong dur ing the first days of May, but not unti-the 10th of that month was any official ac-tion taken. It has steadily increased in that place until the mortality has reached 100 a day, despite the exodus of 100,00 Chinese and many Europeans. The na-tives in most cases have left on feeling the first symptoms of the disease, in the hope of dying in their native villages, while a dozen Europeans have been attacked and most of them have died.

From Canton and Hong Kong the dis ease is speading through the neighboring country, and will probably soon appear in the coast towns of China north of Hon Kong, because from the carelessness in these ports no effective quarantine is likely to be established. Several case have already occurred on steamers trad ing from Hong Kong to Chinese ports but without serious consequences on ac count of prompt action by the ship's sur
