THE new immigration bill passed by the lower house of Covgress should find speedy passage in the Senate. It is a needed measure.

SENATOR HILL is now the Moses of the Democratic party. He is the only Demoerat in the country and is now on top. Great is David B.

MUCH of this heated term is attributed to the Democratic party on account of its hot squabbles. Let the party hurry up, finish its business, and adjourn

Pickics and excursions to the country and seashore are now at their height. The low rates on the respective railroads has given an impetus to travel by rail.

THE present Congress has been an expensive one for the people. If they had to do it over again some other party would be in power now. But, then, they did not know any better; in fact they didn't know it was loaded.

REPUBLICANS used not build any hopes for a Democratic split. There will be a love feast, a tariff bill passed and signed by the President, and all will be forgiven. Somebody will have to eat crow, but they won't mind such a little thing as that.

HAY fever patients who want relief can find it by going to Eagles Mere, near Williamsport, which can be reached via the Pennsylvania and Reading Railroads. It is a beautiful, quiet place and those who once spend a summer vacation there will go often.

THE population of China and Japan is to large that the inhabitants are tumbling over each other. The war between these countries will kill several millions of the people and thus relieve the crowded condition of those kingdoms. We believe that is why the war has been precipitated.

SERGT. CHARLES CHINN, at Fort Pulaski, lighted a fire in dampened powder to drive out mosquitoes. When the successive explosions of powder, shells and other war supplies ceased to shake the fort and the neighborhood it was discovered that the sergeant was mortally hurt, and that his mother-in-law was badly injured. In the course of the day the flames about the woodwork of the fort were extinguished. and after a new roof is put on the garri son store room things will begin to look all right again. All these points are gathered from the printed reports of the necurrences under review. But one essen tial piece of information is omitted from the stories. No one has thought to tell what became of the mosquitoes.

RIOTING appears to have infected the almost entire world. We hear of its preva lence in not only nearly every part of our own country, but in many other lands. One of the latest phases of this helligerent spirit has just manifested itself in one of the Russian provinces, where the cholers prevails. The people, terrified by the fearful ravages of the plague, refused to allow the burial in the town cemetery of the bodies of a number of persons who had died from the dissame. They compelled those having charge of the burials to take the corpses alsewhere. The hospital tents were atancked and cholers patients carried out of them into other localities. The authorithe being unable to cope with the rioters the services of the military were called

into requisition, the mob fired into, and a number of the rioters wounded. They deal in a very summary manner with rioters in Russia
