## OH, THE BABIES

175 Died in Boston in a Week.

### Cholera Infantum Raging Now.

Lactated Food Should be Fed to Little Ones.

August a Critical Time for Thousands

#### Every Wistake in Diet Must Be Avoided.

The death rate goes up with a jump. There were almost a hundred cases of mortality due to cholera infantum alone in Boston during the last week, says the Herald of that city.

One hundred and seventy-five bables died from this and simillar causes.

The fearful jump in the infant death rate that comes in August is due to improper feeding during hot weather.

thousands of homes where love and watchfulness seem to have surrounded baby with every safeguard, these two con ditions that lead to cholera infantum often exist-improper diet and possibility of contagion in food.

These causes are preventable, and every death from an intestinal disorder shows either neglect or ignorance on the parts of

There is no reason to-day why baby should not receive proper nourishment, and be kept absolutely free from any pos . bility of contagion.

Lactated food is always obtainable. Physicians and mothers who have brought up a family of children know how nutritions, how easily digested food is, and how engerly it is taken by children that cannot take other nourishment. Lactated food saves bables' lives,

The diet of a child from six months to three years old should be as carefully regulated as in the first weeks of its life. And during hot weather, especially, the first symptom of diarrhoea should cause redoubled watchfulness.

Children who are evidently not thriving, who show a lack of energy, who are be-coming listless, fretful, thin and weak, must quickly gain strength, or the slight attack of diarrhoea that a strong child readily overcomes will prove fatal.

There is always a chance of slight mistakes in feeding baby, and in hot weather such errors often result in cholers infantum, in case the baby is not strong and abundantly nourished.

Babies properly fed on lactated food never succumb to cholera infantum !

The experience of hundreds of physiclans, public institutions, and thousands of mothers prove that lactated food is the safest article that can be used as the diet of young children during the hot months.

Mothers who have never used lactated food should remember that it is so inexpensive as to be within the reach of the humblest hon made from a dollar package to last nearly four weeks. The food thus prepared from plain directions on each package costs less than five cents a quart, and lactated food saves bables' lives.

### CHILD

Head and Scalp Raw with Places Size of Silver Dollar. Various Remedies only caused Fresh Eruptions. Applied CUTICURA. Change in Twenty-four Hours. Perfect Cure in Two Weeks.

My little son, aged three, was very much troubled with a breaking out on his scalp and behind his ear. The places affected were about as large as a silver dollar; the flesh seemed raw and covered with little blisters. The child suffered considerably, and was naturally very fretful. I tried several remedies without obtaining any beneficial results; in fact the eruptions secured to be spreading and new places breaking out. I concluded to try the Curreura Resembles. I washed the affected parts with the Curreura Boar, taking care not to irritate the fesh, and applied Curreura. I noticed a change for the better in the apparature of the eruptions in twenty-four hours, and in two weeks the eruptions actively disappeared, leaving the skin smooth and the scalp clean; in fact a perfect cure, as I have not seen any indications of any eruption or trenking out since. I gave the child only a few doses of the Curreura Resembles very satuable. I believe Curreura Reservation or trenking out since. I gave the solvest. I consider your curreura Reservation or trenking out since. I gave the child only a few doses of the Curreura Reservation for applying to inseet hites, which are very annoving in this country.
