THIRDEDITION

A MILLION A YEAR.

This Vast Sum Annually Expended in Advertising by One Concern.

Much has been written and said about advertisers and advertising, but it is perhaps not generally known that, not only is the greatest amount of advertising done in America, but that the largest America, opened upwards of half a aged 16 million dollars per year in advertising but the advertiser referred to has actually

but the advertiser referred to has actually expended during the past year over a million dellars wholly in advertising. This wast aum of money has not been squandered, but has been carafully, judiciously, scientifically expended, and it has paid a profit of fifty cents for every dellar expended.

Here is certainly a valuable lesson for those who advertise or liave advertising in contemplation. It shows that half-hearied attempts at wooling the foodless of Fortune by advertising are not profits bis, and that even extended efforts are unprofitable unless done systematically, scientifically and with the greatest care and judgment. It is not our purpose to give the name of this advertiser, who, besides being the largest one in the world, is certainly the most retiring and modest, but we may say, incidentally, that he is the projector of the pre-digeated food. Paskola, which, however, is only assemil part of the business transacted by the concern. Men of this special genins are rare and the success which attends their efforts still rarer, but such success shows what can be accomplished by well conceived plans and superior effort.
