MAGIC WORK OF SCIENCE

A Newspaper Man Sees a Strange and Interesting Experiment-Meat Completely Digested in an Open Dish. views of Col. J. R. Fellows,

and Other New Yorkers.

## (New York Exchange.)

It is not often that science makes a dis covery that demands special investigation on the part of the newspapers. Once in a while it does, however, such as occurred in New York recently.

It has been stated positively that a procress has been found whereby food, mixed with a certain ferment became digested before it had even entered the mouth. Certainly if this were true it would mark fire for miles, and the damage will be an era in the history of civilization, and before it had even entered the mouth Certainly if this were true it would mark the writer was delegated to thoroughly investigate and report upon the same.

The first call was made at the office of the company which is now manufacturing the food in question, and I was permitted to inspect the process of manufacture. I road between here and Smethport are re found it exceedingly elaborate and scien tific, and after inspecting it thoroughly 1 was shown the way in which it actually worked.

A piece of fresh meat was placed in an open dish and some of the pre-digested food mixed with it, when the temperature was raised to that of the stomach. Almost immediately there was a change in the color of the meat, next its fibers seemed to separate, and soon it assumed a liquid form, the same as it does in the human stomach after being eaten. The effect, the change, the entire process, was most wonderful and speedy.

"This, as you see, is a demonstration of what can be done," said the manager, "but we prefer that you ascertain just what this food accomplishes with the people who use it. Here is a list of names, and you are at liberty to see them and ascertain just what their opinions may be.

Armed with this list the writer began a tour of investigation, with the following result:

Sergeant Elias B. Dunn, chief of the Weather Bureau, was found in his office. looking exceedingly well. In response to my inquiry he said : "I have used the pre-digested food Paskola myself and in my family, and I must say that I have found it just what is claimed for it. In fact, I have been chanting the praises of it very steadily ever since I first began to use it. Why shouldn't I? It has built me up and made a new man of me. You nee how fresh and rosy 1 am, and I intend to keep so.

Colonel John R. Fellows, the eloquent District Attorney of New York, in response to my question said : "If I am called upon to deliver an address or make a speech upon which much depends, I first look out for my stomach. When that is healthy my brain is clear, my thoughts are logical, and it is a comparatively easy matter to clothe them in proper language. When I am not feeling well I take Paskola, the pre-digested food, which sets the stomach right, clears the cobwebs from the brain and sets the machinery of thought and eloquence in motion. There is nothing like Paskola for such a pur-pose and I believe it has won more cases before a jury than you would imagine." Both Messrs, Howe and Hummel, the

well-known lawyers, fully confirmed what I had already heard. Mr. Howe and:

PENNSYLVANIA FOREST FIRES Twenty Man Narrowly Escape Sufficiention In a Minn

WILLIAMSFOIL, Fa., Sept. 4. - Forest fires are reported as burning flercely in the Pine creek inmher region, and valu-able property is in great danger there. Cummings & Heilman's bark and lumber yards have been threatened, but by back Gring it has thus far escaped destruction. The fire has been burning in the Habb's creek district since Enturday. The woods have been back fired for a distance of six miles in order to save property. Forest fires are also reported from Potter county. The flames from the forest fires came near sufficienting twenty men who were working in the Keystone mine, near here, last evening They were in an upper gangway, which filled with smoks from the fire above, and the alarm was given that the mins was an fire. The men rushed to the bottom of the shaft, and all but four of them succeeded in reach-ing the surface. These were overcome, and fell unconscious in the gangway. Rescuers brought them out, but they are so seriously injured that their recovery is doubtful. Their names are Jacob Staf-ensky, Michael Arnot, John Mateo and

John Batski. BRADFORD, Sept. 4.-Forest fires are raging all along the line of the Buffalo, Rechester and Pittsburg railroad. Re-ports from all points on the narrow along the pilts to Corydon are on fire for miles, and oil property in the vicinity of the west branch is threatened. Should the fire spread to the oil field serious consequences would result. The woods along ported on fire, and valuable property is in danger of being destroyed. On the big level between Mount Jewett and this city and the head of the west branch the woods are ablaze and several oil well rigs are reported burning. At Songbird and the Quintuple the woods are a roaring mass of flames, and valuable oil property is be-ing devoured. At Lewis Run the woods are ablaze, and the people are fighting the firs to save the property. KANS, Sept 4.-Forest fires are within

a mile of town. Should no rain fall the damage and loss to property will be great. Men are watching the fire and are preparing to prevent it from reaching the oil wells and nitroglycerine magnifibes lo-eated close by. A heavy fire near John-sonburg is destroying millions of feet of lumber and timber. Authentic reports eay fires slong the line of the Pittsburg and Western railroad in Elk and Forest counties have destroyed several sawmills and a large amount of sawed lumber and

timber in the last few days. RussgLL Cirv. Pa., Sept. 4.—The woods are on fire on both sides of this place and the fire extends over an area of twenty miles. A large gang of men are fighting the flames and digging trenches to pre-vent the fire from spreading to the oil and gas field in this vicinity. There are a number of sawmills and lumber camps in the woods south of here, and nothing has been learned from them as to their condi-tion. It is feared the mills have been destroyed and that some loss of life has oc

curred. RUSSELL CITY, Pa., Sept. 4 .- Word was received here at 7:50 to the effect that the forest fires have reached the Watson farm in Forest county, and several oil wells are now burning. The loss will be heavy, as there is a large number of oil wells on this farm, and it is feared the fire will spread to adjoining property.

## Incendiaries Caught in the Act.

ABILLAND, Wis., Sept. 4.—Smoke and dirt begrimmed settlers have been strag-gling into town all the morning with tales of losses of cattle and everything on their farms. They are taken in hand and everything possible is being done for their re-lief. To add to the intensity of the scane at Washbarn incendiaries got out and started fires in different parts of the city. Five have been arrested, three being caught in the act. When the first one cangot in the act, when the first one was caught rumors of lynching were prevalent. A large number of deputies were placed on guard in different parts of the city with instructions to guard the docks in particular. A straggler who walked in from Henoit says that every-thing is gone there but the mill. Fires have raged around on all sides, but there is no more danger of the inhabitants be-

There seemed to be a misunderstanding about the meaning of the above cut-the 500 lbs. does not refer to the STRENGTH of the Butter. It means that we sell over 500 pounds a week of the Finest Creamery Butter made in the country-we get it fresh every other day and our customers understand that the 500 refers to QUANTITY, not QUALITY.

## The Power of a Voice.

Storles abound to Illustrate the power Stories abound to illustrate the power possessed by arcat speakers and actors to stir the emotions by the tones of the voice. It is said of the elder Booth that he brought tears to the eyes of a company upon one occasion by the way in which he uttered the opening words, "Our Father," of the Lord's Praver. Lord's Prayer.

Whitefield, it is said, could so utter the Whitefield, it is said, could so utter the word Mosopotamia as to startic his hearors into tears. A story is told of the great Irish orator, O'Connell. An attack had been made upon him in the heave of com-mons. When O'Connell rose to reply, his lofty brow was black with thunder and his arm uplifted as if to strike. Then, checking himsilf, he said: "But the gentleman says he loves Ire-hand."

Inrud. Lowering his tone to the rippling mur

mur of a summer brock, he continued, "I have no words of bitterness or reproach for any man who loves Ireland.

The pathos in the fragmentary utterance of the last word brought tears to the eyes of many veterans of the house.—London Tit-Bits.

### Re Thought She Whistled.

There was a ludicrous incident in or of our street cars recently. A daintily dressed gentlewoman tried to signal the conductor to stop at the next corner. Sh should use of the next corner. She stood up in her seat, waved her parasol foolly, but made not the faintest sign of a chirp, and consequently her attempts were failures. She was just about to give up in failures. She was just about to give up in despair when a man behind her, who had noticed her vain attempts, gave vent to a whistle which rang out like a fog horn. The conductor and half the passengers looked up in amazement under the im-pression that she was the autnor of the unmelodious note, and as she left the car the knight of the bell punch murmured andtible:

the Emight of the bar part of an early part "Well, there ain't no danger but what she won't get left." The few passengers who saw the whole performance are still laughing every time they think of the lu-dicrous scene.—New York Advertiser.

Antiquity of Wire. The manufacture of wire is of very an-The maintained the wave is done by data oftent orlight. It has been traced back to the earliest  $E_{g}$ yptian history. Spectmens are in existence which can be proved to date to 1700 B. C. The Konsington mu-geum has a specimen which was made in Minera 800 years B. C. Ancient literature contains many references to wire. From the ruins of Herculaneum metal heads the runs of recomment miscal heads have been exhumed on which the hair is represented by wire. There is no question that this ancient wire was made by hum-mering out the metal, which was always bronze or of the precious group. This held true of all made previous to the fourteenth century, during which the process of forming wire by drawing or elongating the metal by forcing it through a conical ori-fice, made in some substance harder than metal treated, was invented .- Casster's Magazino,

You can see I am in perfect health, and yet I was, not long ago, advised by my doctor to go away for my health. My present condition is the result of the use of Paskola. It is a labor saving discovery saves your stomach the labor of digest ing food. Try it as 1 did, and grow fat and jolly.

His partner, Mr. Hummel, said :

"I have seen a number of people try Paskola whose stomachs were so weak that they could digest nothing else, but who were able to assimilate this predigested food without the slighetst diffi culty. I have known an adult man wasted to a shadow by indigestion, who gained 40 pounds in three months by its 1150

Wherever I went the reports were the same, and I was forced to the inevitable conclusion that a great discovery had cer tainly been made for building up the system, increasing the strength and prolonging the life, without any drain or strain upon the digestive organs, which has been the great band of our American life. Certainly the results of the research prove so

Forest Fires in New York State. DOLGEVILLE, N. Y., Sept. 4.-The sun bas not been seen here for nearly a week, so dense is the smoke overhead from for-est fires in the west The Associated Press correspondent drove twenty miles north of here to investigate, and found not less than a dozen fires burning in the woods. Most of them were north of the Canada lakes in the neighborhood of Caroga, but they have not yet reached the valuable sprace timber tracts south of Caroga. The fires are being fought stubbornly by the farmers.

### Grave Robbers at Bulfalo.

BUFFALO, Sept. 4 - A ghastly discovery has been made in Forest Lawn, the cemstery most commonly used by the Pro-restants of this city for the burial of their dead. In a clump of underbrush were found the remnants of seven coffins and ons complete casket, almost new. There are also fragments of rough boxes and grave boards. The newest cashet had evidently been dug up recently, rifled of its contents and then hidden in the bush. The ghoulish rascals who have been at this work have probably carried on this business for a long time. Every mark of identification had been removed from the
