THIRD EDITION WHERE LIES THE DANGER?

So Say the Various City B ards of Health.

THE ANSWER HAS BEEN FOUND.

Evidence That Even Impure Vegetables and Tainted Meat are Not so Bad as Food Undigested.

There has been a great deal said in the papers about adulterated foods. Every large city has a Board of Health that carefully inspects the fruits and vegeta bles that come into the city. This is all very well, but it does not reach the source of the trouble, from which men and women suffer. No food is healthy if it is not digested. If the sweetest and freshest vegetables form acid or gas in the stomaci they are polsonous. A boiling, rotting mass of food in the stomach that is no and cannot be digested, becomes simply rank poison, no matter how pure and guothe food may have been before it was eaten, so that the trouble is not so much with the foods as it is with our power of digesting them and turning them into pure blood, flesh, muscle, nerve, brain and

What is the lesson from these clear and often unthought of truths ! Look to your digestion : Food will help you if it is the right kind, providing you digest it. If not, any food will injure and polson. It is here that science has come to the rescue. The discovery of a process of artificially digested food has actually been made a that the stomach becomes relieved of the necessity of overwork, and so that perfec digestion can take place without effort The discovery of this pre-digested food has aroused a great deal of attention in medical and scientific circles, and nov that it is being manufactured and put up in a form so that people can obtain it, it has worked a revolution in the subject of foods. It is known to the public as Paskola, Increased weight, freedom from dyspepsia, and the pleasing sensation of healthy acting organs are certain to be found by all who use this great pre-digested food.

This has been strikingly illustrated in the case of Mrs. Charles Bock, who reside at No. 381 24th street, Detroit, Mich. She

"I had been feeling sick for five months. My strength and flesh were so fearfully reduced that I could not leave my room for weeks. My appetite was poor and it seemed as though I could not find anything that would restore my strength, appetite or health. My complexion was very sallow during this time, my sunken eyes were surrounded by deep, black circles, and my nervous system was so badly shattered that the faintest noise would send me into hysteries.

"One day while I was suffering very much and felt pretty despondent my hus band brought me a bottle of that great pre-digested food Paskols. I commenced its use and in four days I not only ate heartily, but I gained sufficient strength rants for the arrest of the negroes. to leave my room and look after my usual duties. By the time the first bottle was consumed I had gained five pounds, the circles disappeared from around my eyes. and my complexion showed a marked improvement. I continued the use of Paskola and have gained 14% pounds, am believe I owe it all to Paskola, and that provoke the interference of Great Britain, any others who may be suffering like as the arsenal is pronounced to be an immyself may receive the same wonderful benefits.

Such statements as the above confirm what the best scientists, doctors and physicians have already learned, namely, that Paskola, the pre-digested food, which is justly so popular, does accomplish what was never before known in the history of the world.

A pamphlet giving full particulars respecting Paskola will be sent on application to the Pre-Digested Food Co., 3 Reade St., N. Y. City.
