Is view of the reluctance of Demogratito accept the nomination for Governor, it begins to look as if the Empire State Democracy would be compelled to issue a call for volunteers.

MAINE and Vermont have spoken in no. uncertain tones, and now the country is waiting to hear what New York has to say. It rests with the Republican voters of Pennsylvania to make her voice ring through the land in overwhelming condemnation of Democratic perfidy and dishonor,

GOVERNOR ALTORLD glories in his shame. He proclaims with emphasis that he did right in pardening the Anarchists, and that if he were confronted with the same question now he would act as he did then Illinois has had a severe lesson as the result of putting such a man in the Governor's chair, and the lesson is one not like ly soon to be forgotten. One Altgeld in a generation is more than a sufficiency.

UNDER the present Administration the distribution of Federal patronage in Maine has been in the hands of a little ring of Dem scrats known as the Plum Trust. The Plum Trust, it appears, contributed not w little to the enlargement of the great Republican victory last week. It is neatly named and seems to have been exceptionally successful in distributing plums in such a way as to make Republican votes.

Bisnor Porren makes a valuable suggestion when he says that it would be a good idea if in connection with our public schools there should be an arrangement whereby at the end of each year students who have acquitted themselves with unusual credit should be sent abroad for a tour la Europe, which, he well says, "is a liberal education." He would not have the expenses of such pupils paid from the public funds, but he thinks that publicspirited citteens would be glad to contribute to a fund for such a purpose. The Bishop believes that more of our people ought to go abroad, and that if they did so the disease known as the "big head" would be less prevalent in this country.

THE approaching Christian Endeavor convention at York is arousing general interest. The Christian Endeavor movement had its genesis in Willston Congregational church, Portland, Me., in Febru-

ary of 1881. The founder of the society was the present head of the general organization, Rev. Francis E. Clark, D. D. The principles of the new society commended it so generally that ere long slm llar organizations began to spring up all over the country. To-day, the movement Why Are These Questions Asked By So Many numbers over two million members, in societies all over the world. She Says She Will Being Her Husband Back to Civilization When She Comer Home Again-Stories of an Insufficient Food Supply Denied.

PHILADELPHIA, Sept. 26.—The little steamer Falcon with the Peary relief party on board docked late yesterday afparty on board docked into yesterday af-ternoon at the Industrial Navigation com-pany wharf, in the lower portion of this city. Long before the vessel ranched her moorings thousands of people had gath-ered to welcome the little party of explor-ers. As soon as the Falcon was tied to the dock Mrs. Peary with her haby, Marie Abnorito Peary, and as Kathanata Ahnogito Peary, and an Eskimo girl, whom Mrs. Peary had brought with her from the Arctic regions, was escorted to a waiting coach and hurried to the Pennsylvania railroad station, where she boarded a train for Washington, the home of her mother. of her mother.

An Associated Press reporter had a

short interview with Mrs. Peary before she left the city. The brave little woman showed plainly by her manner that she is much chagrined because of her husband's determination to remain in the Arctic region. She declares she is going back again next summer and bring her nusband back to civilization if she has to drag him with her. Mrs. Peary appeared in elegant hoalth, and the baby born amid icebergs. which is now a little more than a year old and a beautiful child, seems to be all the better for the rough life it has been com-

pelled to lead.

Commander Bryant, who had charge of the relief party, says the expedition was a great success. "We made many valua great success. "We made many valuable collections, the ethnological specimens being very rare. I think we have the finest series of photographs of life and scenes in the Arctic country that were ever taken."

The party killed eight Polar bears and have the skins with them on the Falcon. They also have the skeleton of one of these animals. In addition they brought back about fifty Eskimo dogs.

All on board were very reticent. It was intimated by one of the men who was with Peary that several who came away would have remained with the explorer in the far north but for the scarcity of food. When asked if it was true that the ex-plorer and his party had been compelled to est whale blubber the man declined to either confirm or deny the story. It is be-lieved, however, that Peary is threatened with a lack of food that may become ser-ious. The Falcon will load with coal and return immediately to St. John.

WELL PROVIDED WITH FOOD, Mrs. Peary Denies Statements of a Scarcity of Provisions.

Washington, Sept. 28.—Mrs. Peary arrived here at 9 o'clock last evening. She was accompanied by her brother, Mr. Emil Diebitach, who was a member of the auxiliary expedition of the Falcon, and with him went to the home of her mother, where Mrs. Peary accorded a brief inter-view to a representative of the Associated

Mrs. Peary took occasion to deny some of the statements made concerning the welfare of the party. She declared that there were ample food supplies for the members of the expedition during the past winter while at Anniversary Lodge,

has whiter white at Antiversary Lodge, and she enumerated a long list of eatables that were at their disposal.

"It is not irue," said she, "that we ate walrus or whale blubber to help out the ment supply. During the fall and spring 250 deer were killed and used for food, and their skins were used for clothing.
"The statement that we left Lieutenant

Peary without adequate provisions for the coming winter is also without found ation. He is amply provided for, and as a precautionary measure had the meat from the Faicon left at the place."

Mrs. Peary then briefly recounted the effort made by her husband to reach the northern coast of Greenland for the pur-pose of outlining it, and said he was com-pelled to turn bank, after proceeding 125 nles, because of a sickness that broke out s and rendered them less. Mr. Peary expects to undertake the work again next year. Mrs. Peary said her present expectation was that she would next year accompany the expedi-tion that will go to the scene of her husband's work

"The most important thing accom-plished," said Mrs. Pearv, "was the discovery of the Iron mountain, which Sir John Ross heard of in 1818 and which all Arctic explorers since then had looked for in vain. There were three masses of this mountain, which was apparently of meteoric formation."

The Everhardt-Abboit Fight.

New Oblians, Sept. 26.—Jack Ever-hardt and Stanton Abbott entered the ring of the Olympic club last night to flight for a \$1,500 purse. Everbardt was acconded by E. S. Willis, J. J. Butes and the Sutherland brothers. Abbott was be-friended by John Dann, Billy Plimmer, Al Bobb and Billy Chittenden. Ever-hardt had all the best of the contest, but Abbott stuck to his work to the end, and at the end of the twenty-fifth round the battle was declared a draw.

Stevens on Trial for Murder.

CAMDEN, N. J., Sept. 26.—Josiah Stevens, colored, was placed on trial in the crim-inal court before Justice Garrison yesterday. He is indicted as a principal in the murder of William G. Kairer, a Camden cracker baker. Theodore Lambert, who is in the county jall awaiting sentence, has already been convicted of the murder, principally on the testimony of Stevens. Lambert claims that Stevens fired the shot that killed Knirer.
