There is only one treatment of the horse-the noblest of all excuse for the "staving off" process, and animals, but evidently the least appre. that is that the men who are engaged in clated by most people here. For almost it hope some day to defeat the judgments an hour a brute in human form heat a by casting the borough into bankruptey, horse on Market alley, between Oak and and at the present rate of public water Cherry streets. It was a distressing works operations it will not take long to sight to see the manner in which the poor get the borough there. beast was treated and the offender deserved a dose of his own medicine. People who treat dumb animals in such a manner | Defeuts Patchen in Three Straight Heats. can be counted upon nine times out of ten as of the cowardiy class who are brutal to their families. They vent their event in the northwest witnessed the bental meanicle upon such as cannot defend themselves or retaliate.

North, who sees the way in which the important work of naturalization is performer in this county or homes it described, can fall to realize that there are large opportunities for fraud. The greation of a citizen of the United States ought to as if be conducted with a due degree of deliberation. Instead, the policy assems to hinge upon the turning out of as great just a street, these let Robert J.

The loss bent was the sensation of the man, an 'around the world' nicebing of the Woman's Christian Temperature upon the turning out of as great just the street, there is the Robert J.

The loss bent was the sensation of the man, an 'around the world' nicebing of the Woman's Christian Temperature in the world' nicebing of the Woman's Christian Temperature in the world in the world' nicebing of the Woman's Christian Temperature in the world in the a number as possible in a given time. No effort worthy of the name is made to was a cyclone of applicase when the time describes whether these men are fitted was announced, 2.03 , within a second of for citizenesip. The courts are "naturallcation milis" in very truth, in which vitizens are "ground out." A remedy for this wandalous state of things is loudly ealled for.

THE Chinese Japanese warfare is an object lesson of the march of civilization. Japan's army and navy are officered by men who have either had training abroad, or have been thoroughly deilled at home by American and European instructors. China's navy includes a number of modern ships of war, and some of its officers have had the benefit of English tution. The Chinese army, however, is woefully behind the times. Its generals most unanimously voted for no bill. have little idea of military tactics, and the private soldiers are practically an undisciplined mob. Some of the troops have condemned muskets, more dangerous to the handlers than to the enemy, while a large proportion of the latest the private soldiers are practically an un-

recruits are armed only with bows and arrows. An inevitable result of the con flict will be to open up China to foreign trade, since the magnates of that Empire will be brought to a full realization that the country suffers from its fessilized

In Pottsville, as elsewhere, there is a coterie, if they cannot run things to suit themselves, try to undermine and harrass others who may be engaged in projects which tend to benefit the town. The efforts of the new management of the electric rallway system of railways in Pottsville, in trying to secure invaluable benefits for the town by bringing it in close touch with all the outlying places should be commended by all the people of Pottsville, but instead of that the management is being continually har rassed by a party of guerilias who must know that their dirty work can at the worst only postpone the attainment of the benefits in store. Some people of this kind occasionally reach the end of their rope with surprising suddenness, and prosecution for conspiracy before the court at Pottsville may be expected in the near future.

THE Borough Council is making a mistake in appealing the case of Constable Tallesin Phillips. The sum involved is comparatively small, and by the time the final result is announced the borough will find that instead of having less than three hundred dollars to pay, the principal costs interests and attorney's fees will amount to almost one thousand dollars. Besides, no good can be accomplished in an appeal Mr. Phillips is not to blame for recover ing the judgment. The Council would be better employed in chasing with a sharp stick the property owners who defy the sanitary laws and wink at the disease breeding beds on their premises. Mr Phillips sued to recover \$5,000 damages for the death of a child which he alleged, and which he evidently proved to the sat isfaction of a jury, died from a diseas caused by the improper drainage of property, to which Council's attention had been repeatedly called, but without avail. The borough should consider itself lucky In keeping so far away from the \$5,000 mark. This staving off of the payment of judgments is false economy, and this is exemplified in the case of the HERALD The paper sued, and as in almost every case in which the borough has appeared as defendant, judgment was obtained for the full amount with interest and costs, and interest amounts to over \$360. The B rough Council asked time to apply for a new trial, but has not taken a step in in interest and costs. A judgment against the borough drawing six per cent, interest The society for the prevention of cruelty is better than an investment in govern-

INCREASE THE ARMY.

General Schofield Thinks It Extremely Necessary.

A CHAPTER ON STRIKE DISORDERS.

The General of the Army Thinks the President Should Have Power to Increase the Army in Such Cases-The Lesson Taught by Japanese Victories.

WASHINGTON, Oct. 12.-Major General Schoffeld, general of the army, has made to the secretary of war his report on the operations of the army during the past year. The report is of peculiar interest, both on account of the fact that General Schoffeld, who has been at the head of the army since the death of General Sheridan, announces his retirement next year, and from the fact that it is principally devoted to a discussion of the necessity for strength

to a discussion of the necessity for strength-ening the military arm of the government to cope with internal disorder as well as possible danger from without, particular reference being unde to the Bobs strike. "During a large part of the year," the report says, "the army has been employed in the suppression of domestic violence, which took the form in many cases of for-cible resistance to the greation of the cible resistance to the execution of the laws of the United States, seizure or dis-truction of property under the care of United States offices, and open defiance of the national authority.

"These disorders, at first local in their paracter, spread at length to about one half in number, and two-thirds in area, of hair in number, and two-thirds in area, of all the states and territories, excluding Alaska. So widespread and formidable an insurrection called for the vigorous action dictated by the president.

"It would seem unnecessary to point out the fact that any force like the militia of a state, or the police of a city, acting principally under another authority, though highly efficient in their appropriate service, cannot be made a reliable instru-ment for the prompt and effective execu-tion of the laws of the United States. Manifestly, every government should have an adequate force of its own for the execution of its own laws, no less than the judicial and executive officers necessary

for the same purpose.
"The country is now for the first tim squarely confronted with the necessity of making adequate provision, not only for defense against any possible foreign ag-gression, but also for defense against demestle violence in the form of foreible re-sistance to the laws of the United States. A just estimate of these means of defense requires consideration of the vast extent of the United States territory and the great amount of property, widely dispersed great amount of property, which dispersed throughout this territory, either belong-ing to the United States or in such condi-tion as to be under the protection of the national government. When these facts are duly considered it becomes manifest that the present strength of the army is not adequate to the performance of the service which may at any time be required. (Such discates as those which have "Such disorders as those which have afflicted the country during the last year do not come studienly, or unexpectedly Intelligent observation fully justified the prediction of such troubles a year before they appeared. Coincident with the first indication of coming disorder was a dimination of industrial employment, by which arge numbers of honest and faithful la-horers were deprived of their accustomed work, and hence sought enlistment in the is president could have received a fer housand of these men into the ranks they would have become well disciplined, re-

de. She has had spasies continually, come six to severe a month.

"She is the smallest child for her age that can be found. All medicines could do nothing for her until I gave her Dr. Greene's Nervura blood and nerve remedly, and then she was cured in a short time. I cannot say enough in praise of this wonderful medicine, it has done so much for me and my family. I heartly advise everybody to take it."

If you have any of these complaints or for any reason don't feel just an well as you want to, take Dr. Greene's Nervura blood and nerve remedy and you will be made well and strong. It positively cures all such complaints.

All physicians recommend it, as it is the discovery and prescription of the moot successful specialist in caring nervous and chronic disenses, Dr. Greene, of 25 West 14th street, New York city. He can be consulted free, personally or by letter.

The most populous and one of the most populous and one of the most supplies to the cutire world.

The most populous and one of the most intrinsipality appears to have resulted very largely from the unitional self-cate understance out of the period from 18th to 1803. The condition of the public mind since that time has been that of confident invincibility against any possible foreign attack. However humiliating it may be to this self-esteem, it is nevertheless a simple duty to point to the great done and one of the most populous and one of the most.

taught to the catire world.

"The most populous and one of the most wealthy of all the nations of the earth is subjected to extreme humiliation and dis-grace, to result possibly in the overthrow of a dynasty, at the bands of a little nation of one tenth its population and about one-tenth its territorial area. And why is this? It is not because great people are lacking in talent, or general education, or military courage, but because they have failed to develop their military strength and resources, in which they are far be hind the enterprising little military nation that is now teaching them and the work this tremendous lesson.

"The relation of the United States to the great military powers of Europe nov the great initiary powers of sureope now oxibitis a far greater dispurity in respect to preparation for war than that which has existed between China and Japan. Will the people of the United States and their requessalistives have the wisdom to profit by this lesson?"
