THE EVENING HERALD, Shennodonh, Penna

Evening Herald.

WEDNESDAY, NOVEMBER 31, 1894.

WE haven't heard yet what sort of an explanation Chairman Wilson has sent to his English constituents.

THE present Administration has difficulty even in getting the proper quantity and quality of adhesive gum on the backs of postage stamps. What next !

Mas. Klock, who expected to be elected to the Colorado Legislature, didn't strike 12 as she said she would. She stopped short, but she says she will run again one of these days.

EVERY confirmed drinker in this country is in hearty sympathy with the declaration of the Baltimore Woman's Christian tion of the Baltimore Woman's Christian were even overcome. In a short time a remperance Union, against the use of rescuing party was organized and went shampagne in naming vessels. They say it is a shameful waste of fire.

THE Doylestown Board of Health is commended for the vigorous measures it took to stop the spread of diphtheria there, ordering the store in which one of the cases occurred to be closed, that a warning be posted on every house in which it might appear, and the doctors to report every case under penalty of a fine. The commendation is deserved, and if the example were followed in other places when the exigency arose, there would be less suffering and fewer deaths from the dreadful disease

THE news that Chairman Wilson and his Massachusetts Democratic colleague on the Ways and Means Committee have causused and decided that there shall be in the investigation. no attempt to pass any popgun bills at the coming session of Congress, and that the tariff shall be left severely alone, will be gratifying to the country. It shows that the lesson of last week's election bas not been lost upon the very men whom leaves in the association only the Burling the people of the nation wanted to teach and St. Paul and the Chicago and North-it to. Some of Mr. Wilson's post-election western. All of these lines may withdraw the people of the nation wanted to teach utterances seemed to show that the lesson before the end of the week. Several of the utterances seemed to show that the lesson lines that have pulled out of the association had been lost upon him, but it is acts tion have already declared thomselves in rather than words which tell the real favor of reorganizing, and such action will undoubtedly be taken at the moeting. story, and his decision not to further dis- next Monday. turb the business of the country with useless tariff agitation speaks louder that his wildest utterances to the contrary.

LAST week about ten thousand men in various establishments regained work, tation of her betrayer, Georg and though several thousand were deprived of work, the producing force probably increased on the whole. Several concerns reduced wages, one of some importance 18 per cent., but—a feature not portance 10 per cent., but-a feature not observed before for many months-several others advanced wages, probably counting for more in number of hands and wages prid. These facts rightly take the lead of all other business indications at presults of all other business indications at presults. The prisoner, left Payne at Booneville. Masked men also met the ent, because increased employment and wages add to the purchasing power by which, if at all, future business and industry must be sustained, and because they disclose something of the orders which manufacturers are receiving. Other Landis Hostetter, a young man who has indications which reflect the actual movement of products or sattlements through banks on current or past transactions, are all somewhat discouraging. In short, such business as has been completed already is scarcely larger than it was a year ago, and not quite four-fifths of the business done two years ago. Improvement and resumption of work have been constantly reported for more than two months, since the danger of the most the United States, giving in that country vicious tariff legislation passed, and for ten days have been materially increased by the sweeping Republican victory, and yet the gain scarcely lifts business above last year's low level. Presently will come Thanksglving week, and then the holiday season, and marked enlargement of production or trade outside of holiday lines can hardly be expected before a new year begins. At that date some of the most important changes in the tariff take effect, and it is by no one expected that these will add to the demand for products of American make. Hence every indicason of present increase in working force is welcomed the more since conditions likely to effect the future are not entirely favorable.

Coal Dust in a Mine Ignited by an Overcharge Blast.

PIVE OF THE DEAD LEAVE FAMILIES

In Addition to Those Killed Four Others Were Budly Injured, One of Whom Will Die-The Disaster Caused by an Incom-

When the W. Va., Nov. 21.—The most appalling mime disaster that ever occurred in this section of West Virginia happened shortly after mean yesterday at the Blanch coal mines, on the Pan Handle railroad at Cellier's Station. A new miner, an Italian, put off an overcharge blast, which is nited the coal dust in the mine, and a fearful explosion followed, carrying death and destruction in its path. There were forty-eight men in the mine at the time, and the following are known to be killed: Michael Booney, Thomas Jordan, Thomas Tucker, David Rowland, John Donnelly, Antonio Sattle and Mazzle Gissiedeo. The last five leave families. The following are bully injured: Raefel Neckl (will die), Jose Refael, Jusper Lawrence and Thomas Morris (colored).

After the explosion there was a terrifle whirlwind in the mine, carrying every-thing before it. Donnelly and Rooney were in the mine some distance, and were going towards the entrance. The force of the explosion drove them nearly a hun-dred yards from the mouth of the mine and landed Rooney on the railroad track, killing him instantly. Donnelly, who loaves ten children, landed in a gully, striking his head against a post. His brains were dashed out and scattered for yards around. His wife was the first to find him, and she swooned away and is now lying prostrated by the shock. There is little hope that she will recover. The news of the disaster quickly spread,

and in a few moments hundreds of people were crowded about the mouth of the mine. Many heartrending scenes were enacted. The wives and children of the miners were frantic, and the strong men into the mines after the bodies. When the bodies were brought to the surface many yomen swooned at the sight.

There were miraculous escapes when the explosion occurred. William Davis was in the entry, 150 feet from the entrance and when he heard the explosion he lay down near the rib of the mine, and the whirlwind, carrying rocks, fire and death, passed over him. An empty coal car stand ing at the entrance of the mine was blown twenty five yards.

The mine is owned by W. E. Smith, of Wellsville, and L. C. Smith, of New Cumberland. The miners charge that the ac cident was one to the inexperience of the Italian miner, and declare they will not work with Italians any more.

Prosecuting Attorney Cotton and Cor-oner Walkinshaw, of Wellsburg, were soon on the ground and took charge of the bod-les, and will conduct a rigid investigation. This is the second accident of the kind which has occurred at this mine. Just two years ago, Nov. 21, 1892, a similar explosion occurred, in which three were killed and seven injured. The state mine inspector arrived here today to take part

Withdrawing from the Association. CHICAGO, Nov. 21.—Two more lines with from from the Western Passenger assoglation yesterday, the Chicago Great West-ern and the Burlington, Codar Rapids and ribern being the ones to pull out. ton, Illinois Central, Chicago, Milwanke

A Fatal Criminal Operation.

PASKOLA VINDICATED.

Gross Ignorance Exposed.

Its Value and Healthfulness Fully Established.

The results obtained by certain pro-fessed chemists in an attempt to analyze Paskola are so far from the truth that we have every reason to believe the perpe-

NOI

trators to be in the employ of rival manufacturers. manufacturers, (possibly people in terested in prepars tions of cod liver oil), whose business has been injured by the merited popularity of Paskoia. This suspicion is strengthened by the fact that the untrathful reports as in the composiantrathiui reports as to the composition of Paskola have been widely circulated through the mails and otherwise. Among the things, the so-called "chemists" have stated is that have stated, is that Paskola was noth-ing but glucose and bydrochtoric acid, the ridiculousness of which assertion will be made clear by the following Take two pint ottles and in one

place a tablespoonful of glucose and in the other a like quantity of Paskola; fill them with water, shake thoroughly and add to each forty drops of muriatle or hydrochloric acid, in order to imitate the acidity of the natural gastric juice. Having previously finely minced a quantity of rare or raw lean beef, chicken, the white of hard boiled eggs or similar foeds; put into each bottle one ounce. Immerse the bottles in warm water and carefully maintain the contents at a temperature of 100 to 105 degrees Fahrenheit, frequently shaking in order to thoroughly expose the food to the action of the solution.

In the course of a very short time the contents of the bottle containing Paskola contents of the code containing raskos, will be seen to undergo a change, and in two or three hours the food will have become entirely dissolved or digested; whereas the contents of the other bottle containing the glucose and acid will show no change beyond a slight difference in

containing the glucose and said will show no change beyond a slight difference in appearance.

If you have neither the facilities nor the inclination to make the test for yourself, we have no doubt that your druggist will be glad to try the experiment. The inbes herewith show the results of a test made in our own laboratory, the cuts being from a photograph. No. 1 contained glucose, and No. 2 Paskola. What are we to conclude 5 One of two things: either that the so called "chemists" are ignorant or dishonest.

Glucose has no digestive properties. This is a well-known fact, whereas Paskola is giving relief to thousands of dyapaptics, a truth attested by the un solicited testimonials that pour in upon us. The presence of digestive ferments in Paskola cannot be determined by chemical test. No one has even seen digestive ferments in a pure form, and the only way to determine their presence is by observing the effects which they produce upon food. This is a fact recognized by every authority and will be found stated in Foster's Physiology and other standard works.

Another thing which these ignorant and jealous rivals have said about Paskola, is that inasmuch as its basia is predicested starch, it is calculated to encourage diabetes.

We cannot better answer this charge

courage diabetes.

We cannot better answer this charge than by quoting a paragraph from a report made to Mayor Gilray, of New York, by Dr. Cyrus Edson, Commissioner of Health for the City of New York, and for the State of New York. New York, and for the State of New York.

"Pre-digested starch is starch in the
exact condition that we find it prepared
by the digestive organs for assimilation.
It is pre-eminently a fat-forming, heat
producing food. Under a diet of predigested starch or glucose, a man can perform more muscular work than under
any other single article of food. Predigested starch not only is not injurious,
but it is an essential article of food, without which in some form, man cannot en-

was healthful.

Paskola contains a specific form of predigested starch as well as digestive ferments, and is not alone a fattening food
but it aids the digestion of other foods in
the stomach, just as you may see in the
above experiment. The tired, feeble
stomach of the dyspeptic is too weak to
doitedure. It needs do its duty. It needs a little help; this help Paskola gives. Its use is at once

Nº 2

Its use is at once followed by a sense of well being, strength, vigor and courage. The apcourage. The appetite improves and the sufferer can eat with comfort where before distress followed every meal.

Paskola correct a

teresting pamphlet, and learn about this wonderful preparation. We will gladly mail you a copy free, upon application. The Phe Digested Food Co., 30 Reade Street, New York.

THE EARTHOUAKES IN SICILY.

Later Reports Increase the Death List to

Rose. Nov. 21.—The earthquake shocks continue at Miszza, on the morth coast of the Island of Sicily, and the fact that the volcane of Stromboli is nearly in a state of eruption is accepted as proof that the dis-turbances are of volcanic origin. The in-habitants of Milazzo continue in a state of

habitants of Mihamo continue in a state of the greatest error. They are living in huts havily erected in the fields. Elsewhere the feeling falarin is subsiding and business is resuming its normal course.

Heyerts received from the province of Heggio de Calabria against the momber of deaths and the amount of damage done. Two hundred corpses have her extricated from the rains of homes at ran Procopio, of which number forty-eight bodies were found beneath the rains of the church. found beneath the ruins of the church. The number of possons said to be injured

It is estimated that the damage dene to buildings at Palmi, not counting the loss incurred in furniture destroyed, will amount to 2,000,000 lire. Fifteen buildings amount to 2,000,000 lire. Fifteen buildings relianced entirely and 300 others are irreparably damaged. Every house in the town has suffered more or less, and not one remains habitable. At Palmi six persons were killed and over 300 injured. Eight persons perished at Sominara, and 200 people were injured. The tembstones and mortonry chapels in the cemetery of Seminara were unhanced and completely Seminara were upheaved and completely shattered. The villages of Barapieri and

Santa were destroyed.

In Reggio the postoffice, prefecture, town hall, court house and prison were almost wrecked. Cases were heard yesterday in the open yard attached to the court house, and the prisoners were placed on board ships, where they will be kept until the prison is repaired

Offers of Mediation Declined.

Toxio, Nov. 21.—It is learned that the Japanese government has sent its reply to the note of United States Minister Dun, asking whether a tender by the president of the United States of his offices in the interest of restoring peace in the east would be agreeable to Jupan. Before reaching a conclusion the ministry gave the matter consideration for several days, and finally stated to Mr. Dun that, although the friendly sentiments which prompted the government and people of the United States were deeply appreciated, the success of the Japanese arms had been such that China should approach Japan directly

Warlike Guntemalans.

Oaxaca, Mexico, Nov. 21.—The situation on the Guntemalan and Mexican borders very threatening, and it is believed that the Guatemalan troops are at this time preparing to make an aggressive move days. A feeling of great apprehension exists among the people of the states of Tab-fleo, Chiapas and Oaxaca, which are situated on the border, over the threatened in-vasion, and many settlers are leaving the turbulent section pending a settlement of

To Bury General Fremont's Body. NEW YORK, Nov. 21 .- The body of Gen eral John C. Fremont, the "Pathfinder" and first candidate for the presidency on the Republican ticket, has never been interred, but has remained for several years in the receiving vaults of Rockland cometery, on the Hudson. Recently Mrs. Fre-mout, who lives in Los Angeles, Cal., requested that the interment take place at once, as privately as possible. As a result the body will be buried tomorrow after-
