THE shark that brought the ship's pa p is of the trainp steamer Capacisafely from Rin de Janeiro to Guadaloupe, in the West Indies, a distance of several thousand miles, really deserved a postal anishiy, though it is now beyond the reach of any token of reward or approbation. It is not known exactly how long the lish held the custody of these docu men's, but it was much longer than Jonah occupied the whale. The occurrence is interesting to everybody concerned excepthe shark, which had to be cut in two be fore becoming celebrated.

MR. CARLISLE's state bank plan would not relieve the Treasury in the alightes degree if it were adopted. On the contrary, it would only aggravate the existing ditrust and the difficulties which the Treas ury has to meet. If it wore passed, it would first of all impel vational banks

sell their Government bonds, amount ing to several hundred millions. In which money is now locked up, which, under Mr. Carlisie's plan, they could use more profitably. This sale would at once depress the price of bonds and lower the credit of the Government, and make it far more difficult for the Treasury to raise money for its expenses and the redemption of its notes. It would be simply amazing folly to precipitate upon the market, already weakened by the belief that the Government revenue will not equal its expenditures, so large an amount of bonds. Idle capital would find investment there, rather than in the industries which need its, help, Prostration of Government credit would injuriously affect all other securities, and retard recovery even if it did not cause another disaster.
