The Compromise Measure Drawn by the Arkansas Senator.

# PROVIDES FOR A BIG BOND ISSUE.

It Also Contains Provisions Against Either Unifue Infinition or Contraction-Said to Have Received Pavorable Indorsement from the Condicting Elements.

WASHINGTON, Jan, 14.-The probabilities washingrow, and the the probability are that this week will see the introduction of still another currency bill in the senate Senaror Jones, of Arkanaas, who at the critical stage of the tariff legislation tool that matter in hand and harmonized the tildecent elements so as to bring delinit results out of a decidedly chuotic condi-tion, is the author of the new bill, and be comes to the front this time as a comcomes to the front this time as a co-promiser and harmonizer. There has be objection mide to the bills prepared Senators Visit and McPherson on t ground, in the cose of the Vest bill, the I leave too much towards silver, and the case of the McPherson bill, that is too exclusively in the interest of bonds. Similar hore wellaw that silver Senator Jones realizes that silver a bonds are the two autogenizing cleane In this question, and his effort has been prepare a measure which, while it will b be all that the friends of either can would naturally domand, will in the or secure the support of both elements. I has been in consultation with many the leaders of both these contending efments in the senate, and it is understood that his bill as outlined to them has received very favorable indersement from the representatives of conflicting interests It is also understood that the terms of the bill are not unfamiliar to leaders in th Furthermore, it is probable that it has been brought to the attention of the proper authorities in the executive branch

of the government. The bill will first provide for the issu-ance of 2½ per cent, bonds to the amount of \$500,000,000, which are to be paid in gold. and are to be used both for the purpose o meeting the current expenses of the gov ernment and the redemption of treasury notes. The bill will also provide for the issue of bank notes to take the place of the treasury notes in such way as not to produce a contraction of the currency. An other provision is that the national banks shall be allowed to issue up to their part value, and the tax on national bank clicu-lation is fixed at one-quarter of T per cent. In the interest of silver, the bill pro-vides for its uniimited coinage under the condition that the holder of silver buillou may take it to the mint and have i reading as seignorage the difference by reading as seignorage the difference by tween the coinage value of the build and its market value on the  $d^{-1}y$  that the builden is taken to the mins. The build also provides for the withdrawal from ci-enlation of all greenbacks, treasury note and national bank notes below 8.0 a the substitution of silver certificates in nominations of less than \$3), which as be payable in silver. The sill will comrovisions providing against either undu

initiation or contraction. The prospect is that the time of the senate will be divided during the week be-tween the discussion of the income tax based on the urgent deficiency bill and th based on the urgent deliciency bill and the continuation of the debate on the News rugan bill. Semator Cockreil, chairman of the committee on appropriations, is very hopeful of being able to dispuse of the in-come tax question by the time the week shall be half gone, and if he should suc-ceed in an Senator Morgan, who is in dependent of the Version and the time tax charge of the Nienragun bill, toluks ther will be no difficulty in scenning a volue the canal bill before the close of the w thus leaving the way clear for the ban ruptcy and torritorial admission and oth as well as the other appropriatio bilta:

soure is no dofinite progress for the ity that a new curcomey off will be thrown into the arena of debate, but it is only a possibility. The concensus of opinion new seems to be that any proposed currency legislation to be successful must be he itiated at the other end of the Capitol.

and we think you will agree with us when you hear his story.

For to years Rhenmatism had tortured him. Arms and legs all out of shape; and for two years was fed with a spoon like a baby. To walk was simply an impossibility. His flesh left him; his weight falling from 155 to 75 pounds. It was Rheumatism to be sure ; but it was Impurity of the Blood all the same. As a climax, Eczema appeared; some of the impurities thus forcing their way to the surface. For this he took DANA'S, knowing its reputation as a blood purifier. The Rheumatism his physician assured him was incurable, what was the result? Not only did the Eczema leave him, but "I can now walk without the aid of crutches on cane."

See that you get DANA'S.
