In twenty two minutes here subscriptions are supposed to have been at least five times the amount of bonds offered, and in two hours at London they were twenty times the amount there offered.

Considering the power which control of these bonds gives to regulate foreign ex-changes and to prevent experts of gold, the transaction has indeed greatly changed the financial situation, in spite of the fact that the government revenues are still deficient and that domestic trade shows carcely any gain as yet. A "CUE" FOR THE PUBLIC.

Helen Barry, the Actress, Finds a Splendid Tonic in Paine's Celery Compound

The play is done, the curtain drops, Slow falling to the prompter's bell

A moment yet the actress stops and looks Fround to say farewell. It is an irksome word and task,

And when she's laughed and said her say, he shows as she removes her mask a facthat's anything but gay.

Acting is not all gaiety, lights and ap There is a deal of drudgery, vexation and beartache that the people in the ront of the house little imagine.

Mary Anderson used to advise young tage struck girls to keep off the stage The feverish excitement, the late hours, he drudgery of rehearsals, the unnatural stimulus from new audiences, rivalry and applause, make the life full of perils to nealth of mind and body. The careless theatre-going public have no notion of the strain on the nerves that is inseparable from a dramatic career.

But members of "the profession" know what it is, and they have, as a body, earned how best to keep their nervous ystems strong and capable of doing the oard work demanded of them. This is why Paine's celery compound is so popu ar on the stage.

Helen Barry, the well-known actress, Box Cottage, Bellfort:

"I ate and slept as I had not done since I was a child, and I have never known since then an bour's inconvenience from nervous prostration.

"The medicine to which I owe so much is Paine's celery compound, and I have recommended it to all my stage acquaintances who have overtaxed their brains by too close attention to study, and all have experienced the same happy results as myself.

Marie Tempest also, and a host more of the most eminent artists who appear before the public, have recently testified to the wonderful reinvigorating power of Paine's celery compound. Their testimony is noteworthy because no class of women work harder or are under greater nervous strain.

Women in every walk of life have reason to be grateful to Prof. Phelps, of Darmouth, who discovered Paine's celery compound. He understood the peculiar weakness of the sex. He knew that the writes to a physician friend, from Tea backache, lassitude, headache, sleeplessness, and loss of appetite all mean that "It is with great pleasure I write to the supply of nervous force is low and inadequate to the demands upon it. The experience of thousands has taught the women of the country that only Paine's celery compound will give health to the overwork, by the advice of the wife of a nerves, and, through them, to the entire C.
