FOR A PACIFIC CABLE.

Russia, France and Japan United in the Scheme.

PUSHING THE PROJECT FORWARD.

American Capitalists, Backed by Moral and Financial Support from the Countries Named, Rapidly Perfecting Preliminary Arrangements.

WASWINGTON, March 9 .- Whon congress failed to provide for building the Hawailan cable it by no means ended the question. On the contrary, it has brought () and a proper of Externational import. which Russia, France, Japan and Hawai will join in an American enterprise for laying a cable from the United States to Hawali and thence to Japan, with branch cables to the French islands and extensive naval stations in the southern Pacific.

The negotiations with these govern-ments have proceeded quietly, but with such satisfactory results that they are well along toward completion. The chief interest of France is in securing cable con-nections with Tabiti and her other Pa cific possessions and with her naval ren dezvous which is now cut off from com manieation.

Russla's interests in the project are regarded as even more important than those of Japan or France. Russia's cable com munication with the Western Hemisphere Is now westward through London or Paris and this filtering of all her news and of ficial measures through Loudon, in partie ular, has long been a source of irritation. The Russian imperial family already have a cable from Viadicostock, the easterly point of Siberia, to Japan, so that the new line would give Russia through calde com munication costward instead of through London or Paris. The military and strat egic importance of this is very great, for should Russia be arrayed against the triple alliance she could not communicate west-ward to the oncer world, but could always maintain communication eastward to the United States and to France

Hawaii is also interested in the enter prise, as she regards it as a practical real fration of her efforts to communicate with the outer world. The United States con gress failed to act, and it also declined to vacate the treaty in order to let Great Britain build the cable. Under these circumstances the new enterprise, with Russia, France and Japan joining, has com-

sunk. The accident was a c c of peculiar hor-ror. It was daylight, the fog had disap-peared, the great steamer, tearful of peril of passing the bridge piers, had been given the assistance of the powerful towbeat Herbules Carroll. The powerful cross cur-rents which no human foresight could be been given the save located caught the long scenner like a toy and turned the bow away from the course given it. At the same time the smoke from the lowered chimney, which had been let down to allow the boat to pass under the bridge, was wholly ob-scuring the pilot's vision. And to the fated Longe dow was carried against the arms immovable passend emission and a wreek So quick was the work of destruction the in five minutes not a vestige of the great steamer was visible except hits of wrock age floating on the river.

The records of the steamer were los with it and no passenger list is ever let ashore. Late in the afternoon, in a portlo of the wreckage which had been lande some distance below the city, the body of a young woman was found. She was wearing a satin night dress and a black skirt was about her feet, as if she had been in the act of dressing. This was Mrs. W. J Aull.

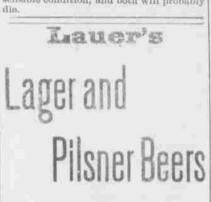

The dead so far as known are as follows: David Aldrich of Rome, N. Y., passenger; J. L. Carter of Newport, Ky., clerk; An gustus Chanvet of New Orleans, bar keeper; James Miller of Cincinnati, co ored portor; Mr. and Mrs. W. J. Ault o Dayton, O.

dod itself to Minister Thurster Hawaiian minister, and to other leading men of Hawail.

The foregoing gives the international scope of the enterprise. The American branch is on similarly broad lines. Ad-miral John Irwin, United States navy, who wrote the notable report when in command of our fleet in Hawaii, and General Roy Stone, are principally interested in the enterprise in Washington. With them (r associated President Alvord, of the Bank of California, and the vice president of the bank; also the president and vice president of the San Francisco chamber of commerce; John D. Spreekels, son of Claus Spreckels; Herman Odrichs, son-in law of the is a Sonator Pair, and other millionaire capitalists. Boddes these there will be several weatby Japanese capital-Ists. Negotiations are also in progress which cannot now be made public, by which a financial house known the world over will be among the projectors. The principal work of organization is be

ing consummated here in Washington The only question at present is whether the incorporation shall be under the state laws of New York, New Jersey, Mary-land, Virginia or California. Their adwantages are being compared, and the in-corporation will be under the state laws most favorable. An effort was made a few days before congress expired to secure ; national incorporation, but it was denied, as it threatened at that time to be harm ful to the government cable project, then in conference committee. It was not made known at that time that France. Russia, Japan and Hawali were interested in the project. But the failure to secure a national charter has in no way checked the enterprise. The arrangements are so far along that the filing of the articles of incorporation will be during the present month.

The consummation of these plans, which are now made known for the first time. cannot fail to arouse keen interest in Great Britain and throughout Europe. The British project of a cable starting from Vancouver appears to be ended with the failure of the senate to so modify our treaty with Hawaii as to let the British cable land on Neckar Island. The only recourse for Groat Britain would be to in-duce Hawaii to break this treaty obligasion with the United States, but it is known positively that this will not be done.

Instead, therefore, of a British cable across the Pacific, as has long seemed im-

"Perhaps you would not think so, but a very large proportion of diseases in New York comes from carelessness about catch-ing cold," says Dr. Syrus Edson. "It is such a simple thing and so common that very few people, unless it is a case of pneumonia, pay any attention to a cold. New York is one of the healthiest places on the Atlantic Coast and yet there are a great many cases of catarrh and con-sumption which have their origin in this neglect of the simplest precaution of every day life. The most sensible advice is, when you have one get rid of it as soon as possible. By all means do not neglect it." Dr. Edson does not tell you how to oure a cold but we will.
