WASHINGTON, April 25.-Exact official information has been received as to Great Britain's bolligerent stops in Nicaragua. British troops are to be landed at Corinto. the custom houses are to be occupied by the British forces, and British forces are to exercise the functions of collectors of

ustoms. At the same time Nicaragua local com moree is to be crippled by a blockade. The limit of time allowed Nicaragua to yield expires today, and the blockade, landing of troops and seizure of customs is to be-

demnity Domanded.

gin immediately thereafter. The understanding is that the blockade will begin tomorrow unless Nicaragua yields to the demands in every particular. There is good reason to believe that the demands will not be altered, reduced or compromised in the slightest particular, one of the main purposes of Great Britain being to administer a lesson to Nicaragua, and indirectly to all southern republics as

to British methods of redress. The maneuvers will probably be a "pa-cific blockade," as heretofore explained, care being taken to bring Nicaragua commerce to a standstill, and yet leave for-eign commerce as free as ever. It is said, however, that Nicaragua's coast commerce is very small, so that Great Britain's pacific blockade may develop into a more forcible move in order to make it effective. As to the landing of British marines at Corinto, which is now understood to be part of the program, it is stated by officials that this will not menace or endanger the interests of the United States or other for

ignors. There is good reason to believe that Nic aragua is not likely to yield, but will al low British troops to occupy Corinto in order that conspicuous attention may be drawn to what is regarded by Nicaragua as an invasion of the Monroe doctrine. Nicaragua's hopes now are almost entirely centered on Washington It is not be lieved, however, that Dr. Guzman has suc ceeded as yet in eliciting the intervention of the United States.

Corinto is the heaviest import point in Nicaragua. The imports there for 1891.92 were \$0,006,805, while all imports to other points did not axceed \$500,000. It is evident from this why the British chose Cor into for their stroke. Almost one-half of the imports at Corinto are from Great Britain, so that the British seizure of the custom houses will result in their receiv ing the customs dues from British mer

chant ships. The British imports for 1891-92 were \$2,132,601; those of the United States came second, at \$1,497,650; Germany, \$1,042.055; France, \$958,144. The rost of the import trade was with neighboring South and Central American countries As the Corinto imports average about \$500,009 monthly it would not take long for Great Britain to appropriate the \$73,000 indemnity demanded.
