Tired, Weak, Nervous Could Not Sleep.

Prof. L. D. Edwards, of Preston, Idaho, says: "I was all run down, weak, nervous and irritable through overwork. I suffered from brain fatigue, mental depression, etc. I be-came so weak and nervous that I could not sleep. I would arise tired, discouraged and blue. I began taking

AFFAIRS IN THE ORIENT.

Japan Blot Easdy to Yield to the Demands of Russia.

RUSSIA READY FOR HOSTILITIES.

At the Same Time the Cenr's Government Is Not Inclined to Hurry Japan in Presenting a Reply-Neither Germany Nor France Will Actively Interfere.

LONDON, May 3 .- A dispatch from Odessa says it is semi-officially announced that Russia has made every preparation and is quite ready to begin heatilities if Japan refuses to modify the terms of her treaty of peace with China.

A Berlin dispatch says that negotiations are actively proceeding to secure an ami-cable settlement of the trouble between Russia, Germany and France on the one hand and Japan on the other. As a con-sequence of these notices Japan has not made a formal protest to the powers. A St. Petersburg disputed says there is reason to believe that one protection.

reason to believe that an early official answer from Japan to the protest of Russia Germany and France was not expected. Russia is inclined to give Japan plenty of time in which to reply, without the latter stultifying herself in the eyes of the Japanese people by anything like a too hasty compliance. The Russian envoy at Tokio has lately pressed for a raply to the pro-test, and has been told that it will be test, and has been told that it will be given in a few days, on the return of Count Ito, president of the Japanese council of ministers. In diplomatic circles there is great confidence that a pacific solution of the matter will be reached.

The Times' Paris correspondent says that the papers of that city are trying descential band to applicate the appendix.

perately hard to complicate the question of the attitude of the powers in regard to the Chinese-Japanese treaty of peace. The correspondent adds: "From an excellent source I am informed that the rumors of an ultimatum, collective notes, etc., are not founded on fact. Bussia, in fact, is not so determined as is generally supposed to push matters to a practical issue of open hostility. The military resources of Sibe

'Germany, while apparently determined to afford meral support by diplomatic pressure, has given no grounds for sup-posing that she will actively intervene. "France, while faithfully keeping Rus-sia company, has certainly not entered

upon any agreement by which she will embark upon adventurous complications. Finally it is not true that Great Britain is inciting Japan to resist. Indeed it is quite the contrary. Great Britain urges Japan to meet the susceptibilities of Europe with all concessions compatible with Japan's dignity and permanent in-terests. This advice will not be given in valn. It is expected that Japan will give the European powers a mark of deference and moderation and will renounce a definite occupation of the Liao Tung peninsula, consenting to allow her occupation to cease with the fulfillment of the other clauses of the treaty. This arrangement may be taken as probable, and it will shortly come about."

The Vienna correspondent of The Stand-ard telegraphs: "I am told that the Jap-anese declare that it is impossible for them to yield to the dictation of Russia, and are making their preparations accordingly. Large orders have been placed in several European countries for war material, and Japanese agents are busy in the dock yards of Europe and America buying war-ships, mostly small, swift cruisers. No respite will be allowed China for the ratification of the treaty. The march to Pekin begins the moment the armistice ends. As regards Russia, her claims will be politely waived, and it will then be imperative that the allies bring matters to an issue."

Natural gas has become so important a factor in the increased facilities for cheaper manufacturing that many have turned from other vocations in life to study and perfect the modes of transmitting it to our larger cities, but out of the many who have seen in it a great field for improvement and taken up the subject, few, very few, and taken up the subject, few, very few, become experts, and only those of peculiar adaptabilities can hope for success. Mr. T. J. Driscoll, of Pittaburg, Pa., is one of these favored few. In the Pennsylvania oll regions he is well known, and the fame of his ability at piping natural gas spread to Canada. He was engaged by the Outario Gas Company, to pipe gas for Windsov and Walkerville, and while performing this operation, which he successfully accomplished, he made the discovery of a remedy which he speaks of as follows. We give his story in his own words: "I have been suffering with a kidney affliction which has troubled me more or less for years. I have tried many of the less for years. I have tried many of the remedies on the market for such compiaints without any relief. During an engagement with the Ontario Natural Gas gagement with the Ontario Natural Gas Company, while piping the city of Windsor for natural gas, I had the good fortune to hear of Doan's Kidney Pills. I procured some and commenced taking them with the most beneficial results. I have not felt as well in years, and I feel that it is all due to the agency of Doan's Kidney Pills. I feel like a new man, with an ambition in life, and wish every speces due

bition in life, and wish every success due to such a wonderful medicine."
